(b) That it will carry out all of the terms and provisions of said contracts or contract to the end that its obligations under the Detroit Contract may be fully performed.

(c) That it will apply the funds to be provided, as hereinafter stated, to increase the capacity of its existing main pipe line to the end that it shall be able to deliver to Indiana (or Michigan) at the Illinois-Indiana state line the quantities of natural gas at the times and at the pressure necessary to carry out the terms and provisions of its proposed contract with Indiana (or Michigan) referred to in Subdivision (a) of this Article 1 hereof.

(d) That it will offer pro rata to the holders of its Common Stock preemptive rights to subscribe to such number of shares of its Common Stock, at such price per share as will yield not less than $4,000,000, payable on or before April 1, 1930; and that it will sell to Columbia Oil, at such subscription price, all of the shares of Common Stock so offered to its other stockholders which shall not be subscribed for by them or by their assignees.

2. Columbia Gas agrees with the parties hereto as follows:

(a) That it will cause Michigan to enter into the proposed contract with Eastern referred to in Subdivision (a) of Article 1 hereof and will cause Michigan to carry out the terms and provisions thereof.

(b) That it will cause Michigan to construct a natural gas transmission pipe line from a point on Indiana's existing pipe line near Zionsville, Indiana, to the place
[fol. 15232] of delivery specified in the Detroit Contract, said pipe line to be of a size, design and construction adequate to deliver at said place of delivery the maximum

amount of natural gas called for by the Detroit Contract, and that it will furnish the funds necessary to enable Michigan to finance the construction of said pipe line.

(c) That, to provide the additional sum of $4,600,000 required by Eastern for the further increase of its pipe line capacity, Columbia Gas will purchase from Eastern 6% Bonds of Series A under the Mortgage Trust Indenture of Eastern, at par or, if the restrictions of said Mortgage Trust Indenture do not at the time permit this, will purchase Second Mortgage 6% Bonds of Eastern at par, which shall be exchangeable at the option of Columbia Gas into such Bonds of Series A when the restrictions of said Mortgage Trust Indenture to permit such exchange can be met.

(d) That it will advance, on open account to Columbia Oil until funded by the agreement of the parties, the necessary funds required by Columbia Oil to carry out its obligations under this Agreement.

3. Columbia Oil agrees with the parties hereto as follows:

(a) That, upon the issuance by Eastern of rights to subscribe for shares of Common Stock of Eastern, as provided in Subdivision (d) of Article 1 of this Agreement, it will (1) immediately subscribe for its pro rata proportion of such shares, and (2) on April 2, 1936, will either (a) purchase such of the shares of Common Stock of Eastern so offered for subscripiton as shall not have been subscribed for by the stockholders of Eastern or their respective assignees or (b) if the time for the payment of such subscriptions shall have been extended by Eastern [fol. 15233] to a date later than April 1, 1936, advance to Eastern the amount that would be payable if all of the subscriptions to such shares of Common Stock which may be exercised later than April 1, 1936, had been exercised, the portion of such advance represented by the subscription rights later exercised to be repaid by Eastern, with interest at the rate of 6% per annum, upon the exercise of such subscription rights.

(b) That it will cause Indiana to enter into the proposed contract with Eastern referred to in Subdivision

(a) of Article 1 hereof, and will cause Indiana to carry out the terms and provisions thereof (unless Eastern shall elect to contract solely with Michigan as herein provided).

(c) That it will cause Indiana to make any necessary additions to or reinforcements of its existing pipe line necessary to enable Indiana to transport through said pipe line the maximum quantities of gas called for by the requirements of the proposed contract between Eastern and Indiana referred to in Subdivision (a) of Article 1 hereof, and that it will provide Indiana with the funds necessary therefor.

4. All of the parties hereto severally agree with each other as follows:

(a) The parties hereto recognize the possibility that the corporate relationships between the parties hereto, Indiana and Michigan, may be changed, through the acquisition by Columbia Gas or by Michigan of the stock or pipe line of Indiana or by the merger of Indiana and Michigan, or by a combination of the foregoing, or otherwise. In any such case, this Agreement and the contracts referred to in Subdivision (a) of Article 1 hereof shall be appropriately amended, provided that such amend- [fol. 15234] ments shall be such as to preserve the following basic principles:

(1) That Columbia Gas and Columbia Oil shall be responsible for their respective obligations with respect to the financing of the reinforcement of Eastern's existing pipe line as set forth in Subdivision (c) of Article 2 and in Subdivision (a) of Article 3 hereof;

(2) That Columbia Gas and Columbia Oil shall each be severally responsible for the financing of that portion, if any, of the pipe line from the Illinois-Indiana State line to the Place of Delivery specified in the Detroit Contract, which shall at the time in question be owned by their respective subsidiaries;

(3) That the operating contracts among the several pipe line companies (including Eastern) shall contain such terms and provisions as shall insure the delivery to De-

troit City Gas Company of natural gas in the quantities and upon the terms and conditions specified in the Detroit Contract; and

(4) That such operating contracts shall be as favorable to Eastern as the forms of contract referred to in Subdivision (a) of Article 1 hereof.

(b) That if, for any reason not involving a breach of the Detroit Contract by Eastern, Indiana or Michigan, the Detroit Contract shall fail to be performed, all the obligations of the parties hereto then unperformed shall become void and shall be of no further force or effect whatsoever.

(c) That this Agreement is subject to the securing of such consents to the taking of the action described hereunder from Federal and State authorities as may be necessary.

[fol. 15235] 5. Anything herein contained to the contrary notwithstanding, Eastern shall have the right provided for in clause (b) of Article V of the Stipulation accompanying the Decree of the United States District Court for the District of Delaware entered on January 29, 1936, in the cause entitled United States of America, Petitioner, against Columbia Gas & Electric Corporation, Columbia Oil & Gasoline Corporation, and others, Defendants, being cause No. 1099 in Equity, which Stipulation was entered in the United States District Court for the District of Delaware contemporaneously with said Decree and is hereafter referred to as the Stipulation, to arrange for the financing of its undertakings under the Detroit Contract otherwise than through the assistance of Columbia Oil and Columbia Gas which they have agreed to furnish under their agreements herein. It is therefore agreed by all parties hereto that Eastern shall have twenty days from the date of the curing of the default of its 6% Promissory Notes referred to in said clause of said Stipulation, or their retirement, in which to arrange for such financing from other sources. Eastern agrees that it will forthwith take the appropriate action necessary for such curing of default or retirement

of its Notes and that if, by the expiration of twenty days thereafter, it shall not have notified in writing Columbia Oil and Columbia Gas, by notice delivered to their respective New York City offices, that it has been able to arrange such financing from other sources, this Agreement shall be binding on Eastern and Columbia Oil and Columbia Gas according to its terms. Pending said period of twenty days, both Columbia Oil and Columbia Gas remain bound according to the terms hereof. In case Eastern shall be able to arrange said financing from other sources and shall so notify the other parties hereto, both Columbia Oil and Columbia Gas shall be freed of their obligations hereunder to provide such financing. Eastern agrees that it will submit any such alternative method of financing, before entering into it, to the Trustee appointed under said Decree for his approval and will not enter into it without his written approval.

[fol. 15236] In Witness Whereof, the parties hereto have caused this Agreement to be signed by their respective Presidents or Vice-Presidents thereunto duly authorized, and their respective corporate seals to be hereto affixed and attested by their respective Secretaries or Assistant Secretaries, the day and year first above written.

Exhibit "H-9".

Agreement

Between

Columbia Oil & Gasoline Corporation

and

Columbia Gas & Electric Corporation.

and

Panhandle Eastern Pipe Line Company

and

Henry T. Bush and C. Ray Phillips

As Receivers of Missouri-Kansas Pipe Line Company

Dated as of June 1, 1936

[fol. 15238] Agreement dated as of the 1st day of June, 1936, between Columbia Oil & Gasoline Corporation, a Delaware corporation (hereinafter called Columbia Oil), party of the first part, Columbia Gas & Electric Corporation, a Delaware corporation (hereinafter called Columbia Gas), party of the second part, Panhandle Eastern Pipe Line Company, a Delaware corporation (hereinafter

called Eastern), party of the third part, and Henry T. Bush and C. Ray Phillips, Receivers (hereinafter called the Receivers) of Missouri-Kansas Pipe Line Company, a Delaware corporation (hereinafter called Mo-Kan), appointed by the Court of Chancery of the State of Delaware, parties of the fourth part.

Whereas Columbia Oil and Columbia Gas made an offer to the Receivers, dated January 31, 1936, to settle certain claims between them, said offer as extended, supplemented and modified having been duly approved by the Court of Chancery of the State of Delaware by an order dated April 29, 1936 and accepted by the Receivers; and

Whereas Columbia Oil, Columbia Gas and the Receivers desire Eastern to take certain corporate action to carry out the terms of the aforementioned settlement; and

Whereas Eastern is willing for the consideration hereinafter mentioned to take the corporate action on its part necessary to carry out the aforementioned settlement; and

Whereas Columbia Oil, Mo-Kan and The National City Company have heretofore entered into an agreement dated the 17th day of September, 1930, and various agreements supplemental thereto bearing the dates September 19, 1930, September 30, 1930, October 8, 1930 and October 23, 1930, respectively; and

[fol. 15239] Whereas The National City Company has fully performed all of its obligations under the aforesaid agreement dated the 17th day of September, 1930 and the agreements supplemental thereto and has received full performance of all obligations due to it thereunder and has been dissolved; and

Whereas Columbia Oil, Columbia Gas, Eastern and the Receivers, acting in their capacity as Receivers and on behalf of Mo-Kan, are desirous of releasing, terminating, canceling, satisfying and discharging all rights, obligations and liabilities of whatsoever nature of Columbia Oil, Columbia Gas, Eastern, Mo-Kan and the Receivers, or any of them, with respect to, on account of, or in any way arising out of, appertaining to, or in connection with said Agreement, dated the 17th day of Sep-

tember, 1930 or any amendments thereof or supplements thereto; and

Whereas, in connection with the aforesaid agreement of September 17, 1930, Mo-Kan and Eastern entered into an agreement dated the 20th day of October, 1930; and

Whereas Eastern and the Receivers, acting in their capacity as Receivers and on behalf of Mo-Kan, are desirous of releasing, terminating, cancelling, satisfying and discharging all rights, obligations and liabilities of whatsoever nature of Eastern, Mo-Kan and the Receivers, or any of them, with respects to, on account of, or in any way arising out of, appertaining to or in connection with said agreement dated the 20th day of October, 1930;

Now, Therefore, the parties hereto, in consideration of the premises, of their mutual covenants and agreements herein contained, and of other good and valuable consideration, the receipt of which by each of the parties hereto from each of the others of the parties hereto is hereby acknowledged, have agreed and do hereby agree as follows:

[fol. 15240] I. Eastern agrees with the parties hereto as follows:

(a) That it will execute and deliver to Columbia Oil, Columbia Gas and the corporations and individuals or classes thereof referred to therein, a good and sufficient release, in the form attached hereto as Exhibit A.

(b) That it will execute and deliver to the Receivers and to Mo-Kan and its subsidiaries a good and sufficient release in the form attached hereto as Exhibit B.

(c) That it will cause its subsidiary Central Distributing Company to release the claim of such subsidiary in the amount of $2,704.31 filed in the Mo-Kan receivership, by the execution and delivery to the Receivers of a release of claim in the form attached hereto as Exhibit C.

(d) That, subject to action by its stockholders, it will amend its Certificate of Incorporation so as to authorize, in lieu of the 110,000 shares of Convertible Cumulative Preferred Stock now authorized, two classes of Preferred Stock, to be designated as Class A Preferred Stock and

Class B Preferred Stock and to have powers, preferences and rights, and qualifications, limitations and restrictions, respectively, as set forth in the form of Certificate of Amendment of Certificate of Incorporation attached hereto as Exhibit D.

(e) That it will amend its Mortgage Trust Indenture dated as of October 1, 1930 (as heretofore amended) so as to increase the sinking fund for the Bonds of Series A thereunder to an amount calculated, on a cumulative basis, to retire the principle amount of all of the Bonds of Series A by October 1, 1951, as set forth in the form of Third Supplemental Indenture attached hereto as Exhibit E.

[fol. 15241] (f) That it will fix the period within which the subscription rights now held by Panhandle Corporation to subscribe for 80,000 shares of the Common Stock of Eastern may be exercised, to and including the ninetieth day following the termination of the receivership of Mo-Kan, but in no case beyond January 1, 1937; provided, however, that, if prior to the exercise of said subscription rights it shall appear, either from an opinion of Eastern's counsel or from action by the Securities and Exchange Commission, that registration of said subscription rights or of the Common Stock of Eastern called for thereby under the Securities Act of 1933, as amended, is necessary, then and in that event Eastern will file a registration statement under said Act at Eastern's expense in respect of said rights or Common Stock, as the case may be, and will extend the period during which such subscription rights may be exercised to and including the 90th day following the effective date of said registration statement. That it will consent that such subscription rights owned by Panhandle will be assignable and will, on such reasonable notice as shall suffice for preparation and printing, issue transferable subscription warrants upon the request of the person or persons holding such subscription rights.

II. Columbia Oil agrees with the parties hereto as follows:

(a) That, in the event Eastern elects to redeem at any time part of its Class A Preferred Stock out of earnings,

it will waive the premium of $10 per share payable on the redemption of such shares of Class A Preferred Stock as may at the time be owned, held or controlled by it and be then called for redemption.

[fol. 15242] (b) That it will join with Columbia Gas in executing and delivering to Eastern and its subsidiary companies a good and sufficient release in the form attached hereto as Exhibit F.

III. Columbia Gas agrees with the parties hereto as follows:

(a) That in the event Eastern elects to redeem at any time part of its Class A Preferred Stock out of earnings, it will waive the premium of $10 per share payable on the redemption of such shares of Class A Preferred Stock, if any, as may at the time be owned, held or controlled by it and be then called for redemption.

(b) That it will join with Columbia Oil in executing and delivering to Eastern and its subsidiary companies a good and sufficient release in the form attached hereto as Exhibit F.

IV. The Receivers agree with the parties hereto that, in their capacity as Receivers and on behalf of Mo-Kan, they will execute and deliver to Columbia Oil, Columbia Gas, Eastern and the corporations or individuals or classes thereof referred to therein, a good and sufficient release, in the form attached hereto as Exhibit G, and will execute and deliver to Burt R. Bay Covenants Not to Sue in the forms attached hereto as Exhibits G-1 and G-2.

V. All of the parties hereto severally agree with each other as follows:

1. All rights, obligations and liabilities of whatsoever nature of Columbia Oil, Columbia Gas, Eastern, Mo-Kan, and the Receivers, and each of them, with respect to, on account of or in any way arising out of, appertaining to, or in connection with, said agreement dated the 17th day of September, 1930, or any amendments thereof or sup-[fol. 15243] plements thereto are hereby in all respects terminated, rescinded, canceled, satisfied and discharged.

2. Each of the parties hereto, namely Columbia Oil, Columbia Gas, Eastern and the Receivers, on behalf of themselves as Receivers and on behalf of Mo-Kan, has remised, released and forever discharged the others of said parties, and does by these presents for the respective heirs, administrators, executors, representatives, successors and assigns of said party or parties, remise, release and forever discharge the others of said parties, their respective heirs, administrators, executors, representatives, successors and assigns, of all and from all manner of action and actions, cause and causes of action, suits, debts, dues, sums of money, accounts, reckonings, bonds, bills, specialties, covenants, contracts, controversies, agreements, promises, variances, trespasses, damages, judgments, extents, executions, claims and demands whatsoever, in law or in equity, or by force of any statute of the United States or any state thereof, which any one of said parties, their respective heirs, administrators, executors, representatives, successors or assigns may now have against any one or more of the other parties hereto, or their respective heirs, administrators, executors, representatives, successors or assigns, for, upon or by reason of any matter, cause or thing whatsoever with respect to, on account of, or in any way arising out of, appertaining to, or in connection with, said agreement dated the 17th day of September, 1930, or any amendments thereof or supplements thereto, or any thereof, or the execution of the same.

VI. Eastern and the Receivers in their capacity as Receivers and on behalf of Mo Kan agree with each other as follows:

[fol. 15244] 1. All rights, obligations and liabilities of whatsoever nature of Eastern, Mo-Kan, and the Receivers, and each of them, with respect to, on account of or in any way arising out of, appertaining to, or in connection with, said agreement dated the 20th day of October, 1930, are hereby in all respects terminated, rescinded, canceled, satisfied and discharged.

2. Each of said parties hereto, namely, Eastern and the Receivers, on behalf of themselves as Receivers and on behalf of Mo-Kan, has remised, released and forever discharged the others of said parties, and does by these

presents for the respective heirs, administrators, executors, representatives, successors and assigns of said party or parties, remise, release and forever discharge the others of said parties, their respective heirs, administrators, executors, representatives, successors and assigns, of all and from all manner of action and actions, cause and causes of action, suits, debts, dues, sums of money, accounts, reckoning, bonds, bills, specialties, covenants, contracts, controversies, agreements, promises, variances, trespasses, damages, judgments, extents, executions, claims and demands whatsoever, in law or in equity, or by force of any statute of the United States or any state thereof, which any one of said parties, their respective heirs, administrators, executors, representatives, successors or assigns may now have against any one or more of the other parties hereto, or their respective heirs, administrators, executors, representatives, successors or assigns, for, upon or by reason of any matter, cause or thing whatsoever with respect to, on account of or in any way arising out of, appertaining to, or in connection with, said Agreement dated the 29th day of October, 1930.

[fol. 15245] VII. The foregoing Articles V and VI are without prejudice to the right of any of the parties hereto to enter into any contract or contracts with any of the other parties hereto relative to the purchase and sale of gas, when duly authorized in the case of corporate parties by their respective Boards of Directors.

In Witness Whereof, Columbia Oil & Gasoline Corporation, Columbia Gas & Electric Corporation and Panhandle Eastern Pipe Line Company, have caused this Agreement to be duly signed by their respective Presidents or Vice-Presidents thereunto duly authorized and their respective corporate seals to be hereunto affixed and attested by their respective Secretaries or Assistant Secretaries and the Receivers of Missouri-Kansas Pipe Line Company have duly executed this Agreement all as of the day and year first above written.

[fol. 15256] Exhibit C.

Release of Claim.

Know All Men by These Presents, that for and in consideration of the sum of One hundred dollars ($100), law-

ful money of the United States of America, and other good and valuable consideration, to us in hand paid, the receipt whereof is hereby acknowledged, Central Distributing Company, a Delaware corporation, for itself, its successors and assigns, has remised, released and forever discharged and by these presents does remise, release and forever discharge Missouri-Kansas Pipe Line Company, a Delaware corporation, and its subsidiaries, successors and assigns, and Henry T. Bush and C. Ray Phillips as Receivers of said Missouri-Kansas Pipe Line Company, and their respective heirs, administrators, executors, successors and assigns, of all and from all and all manner of action and actions, cause and causes of action, suits, debts, dues, sums of money, accounts, reckonings, bonds, bills, specialties, covenants, contracts, controversies, agreements, promises, variances, trespasses, damages, judgments, extents, executions, claims and demands whatsoever, in law or in equity, or by force of any statute of the United States or any state thereof, which against them or any of them said Central Distributing Company ever had, now has, or which it, its successors or assigns, hereafter can, shall or may have, for, upon or by reason of a certain payment made by Central States Gas Utilities Company, an Illinois corporation, to the United States Government, in respect of taxes and interest assessed against said Missouri-Kansas Pipe Line Company or its subsidiaries for the year 1929, for which payment a claim has heretofore been filed in the amount of Two Thousand Seven Hundred and Four Dollars and Thirty One Cents ($2,704.31) in the receivership proceedings of said Missouri-Kansas Pipe Line Company.

[fol. 15257] In Witness Whereof, Central Distributing Company has caused this instrument to be executed by its President or a Vice-President thereunto duly authorized, and its corporate seal to be hereto affixed and attested by its Secretary, this 3rd day of June, 1936, at New York, N. Y.

CENTRAL DISTRIBUTING COMPANY,

By

Vice-President.

Attest:

Secretary.

State of New York,
County of New York,—ss.:

On the 3rd day of June, in the year 1936, before me personally came James L. Harrop, to me known, who, being by me duly sworn, did depose and say that he resided in Maplewood, New Jersey; that he is a Vice-President of Central Distributing Company, a corporation of the State of Delaware, the corporation described in and which executed the above instrument; that he knows the seal of said corporation; that the seal affixed to said instrument is such corporate seal; that it was so affixed by order of the Board of Directors of said corporation; and that he signed his name thereto by like order.

.....

[fol. 15258] Exhibit 157-C.
Exhibit "I-2".

Columbia Oil & Gasoline Corporation
Sixty-One Broadway,
New York.

January 31, 1936.

Messrs. Henry T. Bush and C. Ray Phillips;
as Receivers of Missouri-Kansas Pipe Line Company,
Wilmington, Delaware.

Dear Sirs:

You are familiar with the relations which have heretofore existed between Missouri-Kansas Pipe Line Company, yourselves as Receivers thereof, Panhandle Eastern Pipe Line Company, Panhandle Corporation, Columbia Gas & Electric Corporation and the undersigned Columbia Oil & Gasoline Corporation, and particularly with the differences of opinion which have existed between the Missouri-Kansas interests on the one hand and the interests of Columbia Gas & Electric Corporation and the undersigned on the other with respect to the management and affairs of Panhandle Eastern Pipe Line Company. The principal

disagreement has arisen out of the problem of marketing Panhandle Eastern's available gas.

As the result of the contract dated August 31, 1935, between Panhandle Eastern Pipe Line Company and Detroit City Gas Company, under which Panhandle Eastern is afforded the opportunity to supply the City of Detroit with natural gas, the principal point of our controversy, namely, the marketing of Panhandle Eastern's gas, would seem to be removed inasmuch as this market should absorb all of the gas which we believe Panhandle Eastern can now safely contract to supply at such distance from its production area.

After a comprehensive study and extensive negotiations, we believe that, with this contract as a foundation, an opportunity is afforted to adjust the controversies heretofore existing between Missouri-Kansas interests and ours on terms we believe manifestly advantageous to your interests, and which at the same time would permit the financial rehabilitation of Panhandle Eastern and would materially strengthen the financial position of Missouri-Kansas.

We enclose a copy of the contract of August 31, 1935, between Panhandle Eastern and Detroit City Gas Company. You will observe this contract provides for the sale of gas by Panhandle Eastern to Detroit City Gas Company for a firm period of fifteen years on terms which we believe you will agree to be highly advantageous to Panhandle Eastern. The contract provides for delivery of natural gas at a point near the City of Detroit. Panhandle Eastern's pipe line system extends only to the Illinois-Indiana State line and its present capacity is not sufficient to transport the volume of gas that may be required under the Detroit Contract. It is estimated that the cost of the necessary increase in the capacity of the existing pipe line, with additional compressor stations and necessary equipment, will be approximately $8,600,000 and that the cost of building or acquiring an extension to Detroit will be approximately $8,300,000 more.

[fol. 15259] At the present time, as you know, the outstanding securities of Panhandle Eastern are held as follows:

Securities	Owned by Columbia Oil	Panhandle Corporation*
6% Mortgage Bonds	$18,200,000	—
6% Promissory Notes	4,945,500	$4,945,500
Common Stock	1,149 sh.	1,149 sh.

*At the present time Panhandle Corporation has outstanding $4,940,000 of Two-Year 6% Collateral Trust Notes (now in default as to principal and interest), which Notes are now held by others, and which are guaranteed as to principal and interest by Missouri-Kansas. Missouri-Kansas now owns 25% of the Common Stock of Panhandle Corporation, the remaining 75% of the Common Stock being owned by others; so that at the present time Missouri-Kansas' interest in Panhandle Corporation is the ownership of 25% of the Common Stock, the value of which is subject to the $4,940,000 defaulted Notes of Panhandle Corporation, which in turn are guaranteed by Missouri-Kansas.

The Panhandle Eastern Notes aggregating $9,891,000 have long been in default as to interest, which default entitles the holders of such Notes to call on the Trustee to accelerate their maturity and also constitutes an event of default under the mortgage securing the Bonds. Furthermore, the $4,945,500 of Panhandle Eastern Notes, as well as all the shares of Panhandle Eastern Common Stock, owned by Panhandle Corporation are now pledged to secure the $4,940,000 principal amount of defaulted Two-Year 6% Collateral Trust Notes issued by Panhandle Corporation mentioned above.

It would seem manifestly impracticable under present conditions for Panhandle Eastern to refund its present defaulted obligations, much less to finance the necessary capital expenditures amounting (exclusive of the investment in the extension to Detroit) to approximately $8,600,000 in new money, except through those already having a financial interest in its securities. Furthermore, such financing, even under favorable conditions, is costly. Under the proposal stated below, this financing would be done without cost to Panhandle Eastern or Missouri-

Kansas, the entire cost of financing being borne by Columbia Gas & Electric Corporation and ourselves.

Without prejudice either to the claims asserted in your suit against us or to our contention that such claims are groundless, we believe that with your cooperation a formal contract embracing the following plan, which we and Columbia Gas & Electric Corporation are able and willing and hereby offer to enter into, would provide a satisfactory compromise of our conflicting claims:

(1) We would agree to fund the entire issue of outstanding 6% Promissory Notes of Panhandle Eastern into 6% Preferred Stock in the amount and of the character hereinafter stated. This would be accomplished in connection with our acquisition, as hereinafter explained, of substantially all of the Notes and the 75% of the stock of Panhandle Corporation held by others.

(2) We would further agree to cause Panhandle Eastern to be recapitalized as hereinafter more fully set forth, and to cause Missouri-Kansas to regain its direct ownership of one-half of the Common Stock of Panhandle Eastern to be issued and outstanding prior to the new financing mentioned in paragraph (6) below.

(3) We would cancel the guaranty by Missouri-Kansas of the principal and interest of the Panhandle Corporation Notes, now amounting to more than $5,500,000, and would release Missouri-Kansas of all liability on this guaranty.

(4) The claim of Panhandle Eastern and its subsidiaries against Missouri-Kansas in the sum of $42,606.74 would be cancelled.

(5) We would agree to pay to you, as Receivers of Missouri-Kansas, the sum of $300,000 in cash, to be applied toward the expenses of the receivership and liquidating other obligations of Missouri-Kansas.

(6) The additional financing necessary to provide funds needed by Panhandle Eastern (estimated at approximately $8,600,000) would be provided by an issue of 160,000 shares of Common Stock of Panhandle Eastern, to be sold at $25 per share (producing $4,000,000), to which

[fol. 15260] Missouri-Kansas stockholders would be given the right to subscribe for one-half but would not be obligated to subscribe, we agreeing to take the entire balance not so subscribed; the remainder of the necessary funds (not to exceed $4,600,000) Columbia Gas & Electric Corporation would agree to supply by the purchase at par of 6% Bonds of Panhandle Eastern.

(7) In order to minimize the financial burden on Panhandle Eastern, we and Columbia Gas & Electric Corporation would agree to cause to be financed and constructed the necessary pipe line extension to the city gate at Detroit, without cost or expense or financial obligation of any kind on Panhandle Eastern. The existing pipe line at present owned by Indiana Gas Transmission Corporation (a subsidiary of the undersigned) and representing a cash investment of more than $1,500,000, would be used as far as a point near Zionsville, Indiana; and Michigan Gas Transmission Corporation (a subsidiary of Columbia Gas & Electric Corporation) would construct and own a pipe line from that point to the Place of Delivery specified in the Detroit contract at a cost now estimated at about $6,780,000. Contracts would be entered into whereby Panhandle Eastern would deliver to Michigan Gas Transmission Corporation (either directly or through the intervention of Indiana Gas Transmission Corporation) and Michigan Gas Transmission Corporation would in turn deliver to Detroit City Gas Company, all of the gas required for delivery under the Detroit Contract. Our engineers have calculated that, at the rates contemplated in these contracts, Panhandle Eastern would receive an average price of about 26½ cents per MCF when the line operates at a 70% load factor, and that these rates would produce, for the companies involved, an equitable apportionment of the net earnings to be derived from the Detroit Contract.

(8) In consideration of the taking of the foregoing action by us and by Columbia Gas & Electric Corporation, you would agree

(a) To dismiss the suit brought by you in the United States District Court for the Southern District of New York on July 18, 1935, and execute a general release, as hereinafter more fully set forth;

(b) To distribute to Missouri-Kansas stockholders, in the manner hereinafter set forth, the warrants evidencing the right to subscribe for additional Common Stock of Panhandle Eastern which you or Missouri-Kansas would receive as a stockholder in Panhandle Eastern;

(c) To join with us, Columbia Gas & Electric Corporation and Panhandle Eastern in an agreement for the cancellation of the contract dated September 17, 1930 between Missouri-Kansas, The National City Company and the undersigned, including specifically the provisions thereof with respect to the purchase or sale of gas or the execution of gas contracts; and

(d) To join with us in taking appropriate corporate action to liquidate Panhandle Corporation in such manner that through such liquidation you would receive one-half of the Common Stock of Panhandle Eastern and we would receive the Preferred Stock.

The following is a more detailed explanation and discussion of the several steps involved in this plan and of the reasons underlying its various provisions.

As stated above, the securities of Panhandle Eastern at present owned by Panhandle Corporation are pledged to secure its $4,940,000 of Two-Year 6% Collateral Trust Notes, which are now in default. Panhandle Corporation has outstanding 1,000 shares of capital stock, of which you, as Receivers, hold 250 shares. We have made offers to the holders of the other 750 shares of stock and to the holders of the Notes to acquire such stock and Notes, subject to certain conditions, and these offers have been accepted by the holders of the 750 shares of stock and by the holders of over 97% of the Notes. As part of this purchase price we are giving up approximately $3,613,500 of Panhandle Eastern Bonds. We propose that, if we acquire these Notes and stock, Panhandle Corporation be dissolved and liquidated in such manner that you receive Panhandle Corporation's half of the Common Stock of Panhandle Eastern. In connection with this liquidation we would cause Panhandle Corporation to satisfy such of its Two-Year 6% Collateral Trust Notes as we shall not have acquired, and we, as holders of the remainder of said Notes, would in this general plan release the guaranty by

Missouri-Kansas of the principal and interest thereof. [fol. 15261] The accomplishment of this liquidation in the most expeditious manner would require your cooperation with us in the taking of the appropriate corporate action.

It is proposed that Panhandle Eastern be recapitalized so that its outstanding securities (before the additional financing required to increase the capacity of its pipe line) would consist of $18,200,000 principal amount (subject to reduction by operation of the sinking fund) of First Mortgage Bonds, $11,000,000 par value of Preferred Stock and such number of shares of Common Stock without par value as would have an initial book value of approximately $25 per share after making certain adjustments hereinafter specified.

The First Mortgage Bonds would be the existing Twenty-Year Sinking Fund Mortgage Bonds, Series A, 6%, issued under the Mortgage Trust Indenture dated as of October 1, 1930, amended in the general respects (except as to interest and sinking fund provisions) set forth in the plan of Readjustment of Funded Dept and Capitalization dated March 12, 1934, with which you are familiar. They would mature October 1, 1950, would bear interest at the rate of 6% per annum and would be subject to a cumulative sinking fund calculated to equal the principal amount of the entire issue over the fifteen-year firm period of the Detroit Contract.

The $11,000,000 par value of Preferred Stock, which the plan contemplates we are to receive, is intended to reflect approximately the amount of investment which we would by then have made in the securities of Panhandle Eastern junior to the Bonds, in excess of the investment made by Missouri-Kansas. This would include the cost to us of the one-half of the 6% Promissory Notes and additional Common Stock of Panhandle Eastern which we acquired directly from Panhandle Eastern and the cost to us (payable in Bonds and cash) of the Notes and 75% of the stock of Panhandle Corporation (both purchased at substantially below issue prices), an advance to Panhandle Corporation to pay its obligations other than the Notes, and the $300,000 cash which we have been asked to provide, and which we are willing to provide, for your use toward

meeting the expenses of the receivership of Missouri-Kansas and the settlement of claims against it.

The Preferred Stock would have a par value of $100 per share; would be entitled to dividends at the rate of 6% per annum, dividends to be cumulative only to the extent earned (depreciation and depletion being taken at no increase over the current rate) until December 31, 1936; thereafter to be fully cumulative; would be redeemable at any time in whole or in part at 110% plus accrued dividends (premium to be waived in case of partial redemption from time to time out of earnings so long as the undersigned or Columbia Gas & Electric Corporation or their respective subsidiaries or affiliates own said stock); and would be entitled to full voting rights, share for share with the Common Stock; and each share would be convertible at the option of the holder into four shares of Common Stock at any time up to the date of redemption. While any of the Preferred Stock remains outstanding there must be set aside from earnings each year 4% of tangible property account to provide for depreciation, depletion and amortization of investment before payment of dividends on the Common Stock.

The Common Stock would consist of such number of shares without par value as would have a book value of approximately $25 per share, such book value to be determined in the following manner: the consolidated balance sheet of Panhandle Eastern and subsidiaries as of December 31, 1935 would be adjusted (1) to give effect to the capital structure above set forth and (2) to write off the claims of Panhandle Eastern against Missouri-Kansas; the resulting net worth applicable to the Common Stock would be divided by $25; and the quotient, to the next lower even number of full shares, would be the number of shares of Common Stock. Applying the foregoing principles to the preliminary figures subject to audit, the number of shares would be 648,652.

In addition to the 4% of tangible property account to be set aside out of earnings as mentioned above, Panhandle Eastern would also set aside out of earnings each year, before payment of dividends on the Common Stock, an amount sufficient to amortize over a ten-year period cer-

tain assets of a non-realizable nature now carried on its books at $3,053,391.53 (less reserves heretofore established [fol. 15262] in respect thereof and amounting, as of December 31, 1935, to $123,105.13).

The Certificate of Incorporation of Panhandle Eastern would be amended so as to provide for cumulative voting for the election of directors. The Board of Directors would be reconstituted so as to consist of 9 members, initially selected by application of the cumulative voting rights in accordance with the new capitalization and its ownership as proposed herein.

The effect of the foregoing would thus be to enable the Missouri-Kansas interests to regain their position as beneficial owners of one-half of the Common Stock of Panhandle Eastern, with the right of cumulative voting in the election of directors. This Common Stock would be subject only to senior securities representing substantially the additional investment made by the undersigned subsequently to the original Common Stock investment, and would be freed from the burden of the guaranty by Missouri-Kansas (amounting to some $5,500,000) of the principal and interest of the Panhandle Corporation Notes.

The resulting distribution of the securities of Panhandle Eastern would be as follows:

	Owned by		
Securities	Columbia Oil	Receivers	Others
6% Mortgage Bonds	$14,586,500	—	$3,613,500
Preferred Stock	11,000,000	—	—
Common Stock (approximately)	324,326 sh.	324,326 sh.	

In terms of Panhandle Eastern's book value (using December 31, 1935 consolidated balance sheet figures), the following table shows what the net assets of Panhandle Eastern would be under the proposed plan:

	Under the Proposed Plan
Net Assets applicable to all securities..	$45,458,943
Less claim against Mo-Kan (which Panhandle Eastern will release)	42,607
	$45,416,336
Less Bonds	18,200,000
Balance after Bonds	$27,216,336
Less Preferred Stock	11,000,000
Balance for Common Stock	$16,216,336
One-half of Common Stock	$ 8,108,168
Claim against Mo-Kan	42,607
Net interest of Receivers	$ 8,150,775

This table does not purport to reflect the value of the assets as affected by earnings, nor does it reflect the contemplated additions to Panhandle Eastern's property nor the additional Common Stock and Bonds to be issued therefor.

As stated above, it is estimated that, in order to carry out the Detroit Contract, Panhandle Eastern will require about $8,600,000 of additional capital to increase its present capacity to deliver gas at the Illinois-Indiana State line. The plan contemplates the raising of $4,000,000 on April 1, 1936 through the issuance of 160,000 shares of additional Common Stock at $25 per share and the raising of the remaining amount through the sale of up to $4,600,000 of 6% Bonds, as needed, within three years.

The stock would be offered by Panhandle Eastern for subscription, pro rata to the holders of its Common Stock, subscription rights issued to you as Receivers or to Missouri-Kansas to be distributed pro rata (according to the total number of votes represented by the outstanding stock) to the stockholders of Missouri-Kansas who sat-

isfactorily establish that they are such stockholders, and to be exercisable only by such stockholders or their re- [fol. 15263] spective assignees. The time for the exercise of the warrants so distributed would be extended until 90 days after the termination of the receivership, but in no case beyond October 1, 1936. We would subscribe for our own share of such additional stock, we would purchase any shares not subscribed for by your stockholders and, if the time for making subscriptions should be extended, we would temporarily advance the funds to Panhandle Eastern to be repaid with interest at 6% when the subscriptions were made, to assure the availability of the necessary $4,000,000 to Panhandle Eastern on April 1, 1936. The $4,600,000 of additional Bonds as needed would be purchased by Columbia Gas & Electric Corporation at par. No compensation would be paid to us or to Columbia Gas & Electric Corporation in connection with this financing.

As you know, the existing business of Panhandle Eastern has not been sufficient to yield it an adequate return on its investment. While, of course, we are not in a position to make any representations as to future earnings and do not do so, nevertheless Columbia Gas & Electric Corporation has caused its engineers to make an extensive study of the probable effects of the Detroit Contract on the earnings of Panhandle Eastern and they have estimated that this contract (after giving effect to the proposed gas contracts referred to above) would produce, during the first full year of operation, sufficient net operating revenue, after reasonable charges for depreciation and depletion, to cover all interest charges and dividends on the Preferred Stock contemplated by the plan and thereafter would produce additional net earnings which would be available for the Common Stock on the capitalization contemplated herein. These estimated earnings and the interest of Missouri-Kansas and its stockholders therein under the proposed plan, as compared with their interest in the earnings for the latest twelve-months' period under the existing financial structure, are more clearly shown by the following table:

	Consolidated Earnings for 12 Months ended December 31, 1935	Estimated Earnings Under Proposed Capitalization for 5th Year of Operation under Detroit Contract
Total Gross Revenue (inc. Other Income)	$3,614,877	$9,785,000
Operation and Maintenance	$1,064,409	$3,121,000
Provision for Retirements and Depletion	768,197	2,247,000
Taxes (inc. Federal income taxes)	284,598	1,366,000
Total Operating Expenses	$2,117,204	$6,734,000
Gross Corporate Income	$1,497,673	$3,051,000
Interest (other than Note interest) and Amortization of Debt Discount and Expense on First Mortgage Bonds	1,230,267	1,251,000
Balance for Junior Securities	$ 267,406	$1,800,000
Note Interest	593,460*	—
Preferred Stock Dividends	—	660,000
Balance for Common Stock	$ 326,054	$1,140,000

* Note interest for one year; as of December 31, 1935, there was Note interest of $1,383,091.50 in arrears to be made up before any earnings would be available for the Common Stock.

We should be pleased to submit to your examination the data from which the engineers have drawn these estimates, in order that you may make your own decision as to the correctness thereof.

In order to effect a complete settlement of the points of difference among the parties, it is essential that your suit be dismissed and that you and Missouri-Kansas give the defendants in that suit, Panhandle Eastern, their subsidiary companies, and the officers and directors of all said companies, a general release of all your claims. For the same reason the plan also provides for the cancellation of the obligations of the parties under the contract dated September 17, 1930, under which we made our original investment in the stock of Panhandle Eastern, including the [fol. 15264] obligations with respect to the purchase of gas from Panhandle Eastern by Missouri-Kansas and Columbia Gas & Electric Corporation, inasmuch as the obligation of Panhandle Eastern under the Detroit Con-

tract would be as great as it would be justified in assuming under present conditions.

Due to unforseen complications, we were unable to present this plan to you as early as we had originally hoped, so that it will be obviously impossible for you to obtain the approval thereof by the Court of Chancery of the State of Delaware in time to enable Panhandle Eastern to notify Detroit City Gas Company by February 1, 1936, as required by Section 7 of Article II of the Detroit Contract, that the financial arrangements contemplated by the plan have been completed. We are accordingly planning to make arrangements to meet this date, which will in no way prejudice your position under the plan and which will preserve for your stockholders the subscription rights which the plan contemplates they are to receive, provided that you accept promptly and secure, on or before March 15, 1936, the approval by the Court of the action necessary to carry it into effect.

The foregoing plan is conditioned upon the following: (1) the execution by you on or before March 15, 1936 of the formal documents necessary to carry out this plan together with the approval thereof by the Court of Chancery of the State of Delaware and the approval of any other Federal or State Courts or public authorities whose approval shall be necessary and from none of which approvals appeal shall lie or the right to such appeal shall be waived by all parties; (2) the appeal of such Federal or State public authorities as shall be required by law for the consummation of the plan; and (3) that the sellers of 75% of the stock and approximately 97% of the Two-Year 6% Collateral Trust Notes of Panhandle Corporation who have contracted to sell the same to us shall perform their contracts so that we shall be able to acquire all of the debt and 75% of the stock of Panhandle Corporation. If you should accept the foregoing proposal and if thereafter for any reason not involving a breach of the Detroit Contract by Panhandle Eastern, Indiana Gas Transmission Corporation or Michigan Gas Transmission Corporation, the Detroit Contract should fail to be performed, then all of the obligations of the parties then unperformed would no longer be binding.

The action called for by the foregoing proposal would be taken by the several parties concurrently on or before April 1, 1936, except that the performance of such action as could not in the nature of things be taken concurrently would be taken at the times indicated above.

The advantages of the proposed plan to the stockholders of Missouri-Kansas (assuming the consummation of the Detroit Contract) may be summed up as follows:

1. It would immediately restore to Missouri-Kansas a full one-half direct interest in the Common Stock of Panhandle Eastern, with Preferred Stock substituted for senior obligations which are now in default.

2. Missouri-Kansas would be released from its contingent liability of over $5,500,000 in respect of its guaranty of the Panhandle Corporation Notes.

3. A means would be provided for terminating the receivership of Missouri-Kansas.

4. Your stockholders would have a direct opportunity to participate in the further equity financing of Panhandle Eastern and consequently in any increase in its earning power.

5. The direct ownership by you and your stockholders of Common Stock of Panhandle Eastern, coupled with the provisions for cumulative voting would give the Missouri-Kansas interests representatives on the Board of Directors of Panhandle Eastern, and consequently a direct voice in its management.

Under date of January 29, 1936, a consent decree was entered in the District Court of the United States for the District of Delaware, in the cause entitled United States of America, Petitioner, against Columbia Gas & Electric Corporation, Columbia Oil & Gasoline Corporation, and others, Defendants in equity No. 1099. A copy of said decree is enclosed. The within offer should be read in the light of its provisions.

[fol. 15265] We suggest that you give this offer your careful consideration and advise us promptly as to your willingness to accept it. In the event of your acceptance, we shall be pleased to prepare and submit the formal contract embodying the above terms, so that proceedings may be instituted promptly for its approval by the Chancery Court of the State of Delaware within the time limit above set forth.

Yours very truly,

COLUMBIA OIL & GASOLINE CORPORATION,
By Charles A. Monroe,
President.

Messrs. Henry T. Bush and C. Ray Phillips,
as Receivers of Missouri-Kansas Pipe Line Company.

Dear Sirs:

The undersigned Columbia Gas & Electric Corporation concurs in the foregoing letter and, if you accept the plan set forth therein, will agree

(a) To take all of the action on its part set forth therein; and

(b) To enter into an agreement to furnish, to the extent that it may be necessary, the funds required by Columbia Oil & Gasoline Corporation to enable it to carry out its obligations therein set forth.

Yours very truly,

COLUMBIA GAS & ELECTRIC CORPORATION,
By E. Reynolds, Jr.,
Vice-President.

[fol. 15266]

The Ambassador
Park Avenue and 51st Street
New York.

March 4, 1936.

Columbia Oil & Gasoline Corporation,
61 Broadway,
New York, N. Y.

Gentlemen:

Under the date of January 31, 1936, you submitted to the Receivers of Missouri-Kansas Pipe Line Company a proposal of settlement of the controversies existing between Missouri-Kansas Pipe Line Company and Columbia Oil & Gasoline Corporation and Columbia Gas & Electric Corporation, which proposal had been negotiated by us some time previously.

Two days later the Receivers mailed you a letter purporting to reject this offer for the reason there stated that the proposal did not comply with the stipulation under which the consent decree of January 29th was entered in the District Court of the United States for the District of Delaware in the cause entitled United States of America, petitioner, against Columbia Gas & Electric Corporation, et al, in Equity No. 1069, and the further reason that the proposal was not acceptable to them.

We are advised that this action was taken without notice to creditors and stockholders whose interests would be affected by the acceptance or rejection of this proposal.

Substantial creditors and stockholders of Missouri-Kansas Pipe Line Company, upon learning of this action of the Receivers, have asked us to undertake to have this proposal resubmitted so that it may be presented to the Chancery Court of Delaware for consideration after due notice to stockholders and creditors whose interests are to be affected. These stockholders and creditors believe the proposal should be accepted and desire an opportunity to urge the acceptance of it by the Chancery Court of Delaware.

In the interest of fairness to creditors and stockholders of Missouri-Kansas Pipe Line Company, we ask that this proposal of settlement be resubmitted.

The proposal of January 31, 1936 required acceptance by the Receivers and approval of the Chancery Court of Delaware on or before March 15, 1936. It is manifestly impossible to fairly present this matter to the Court by that date. Accordingly we suggest that the time within which the offer must be accepted by the Receivers and approved by the Court be extended to May 1, 1936.

If you renew this proposal, may we suggest that your letter of transmittal include a statement of any changes that have taken place in the general situation affecting this proposal since January 31, 1936 and, if you are aware of the basis of the Receivers' contention that this proposal does not comply with the terms of the stipulation, a statement with respect to this matter.

Very Truly yours,

(Signed) FRANK P. PARISH,
(Signed) DUPUY G. WARRICK.

[fol. 15267] March 5, 1936.

Messrs. Frank P. Parish and Dupuy G. Warrick
Ambassador Hotel,
Park Avenue and 51st Street,
New York, N. Y.

Dear Sirs:

We acknowledge receipt of your letter of the 4th instant and in reply state that you may consider our offer of January 31, 1936, addressed to Messrs. Bush and Phillips, Receivers of Missouri-Kansas Pipe Line Company, as still

in force so that it may be submitted to the Chancery Court of Delaware as you propose. We also are willing that the time within which the offer must be accepted by the Receivers and approved by the Chancery Court be extended to May 1, 1936.

Referring to your request for a statement of important developments affecting this proposal which have taken place since January 31, 1936, we would say as follows:

On January 31, 1936, Panhandle Eastern Pipe Line Company entered into an agreement under which it received from Columbia Oil & Gasoline Corporation and Columbia Gas & Electric Corporation the assurance of sufficient financial assistance to enable it to comply with its Detroit Contract, by providing that they will undertake the construction of the new pipe line to connect with the Detroit market and will provide the funds needed by Panhandle Eastern for the reinforcement of its present pipe line up to the necessary delivery capacity. This agreement was not binding on Panhandle Eastern if, within the twenty days specified in clause (b) of Article V of the stipulation accompanying the Decree of the United States District Court for the District of Delaware entered on January 29, 1936, (copy of which has already been furnished you) it arranged for the necessary financing otherwise than through the assistance of Columbia Oil and Columbia Gas. Panhandle Eastern did not, within such twenty day period, arrange for the necessary financing from any other source and thereupon became bound by the said agreement. Furthermore, on February 28, 1936, Mr. Gano Dunn, the Trustee under the said Degree, approved of this arrangement with the two Columbia companies. A copy of his letter of that date to Panhandle Eastern so expressing his approval, together with a copy of the enclosure mentioned therein, is attached hereto.

Panhandle Eastern Pipe Line Company also on January 31, 1936 (notified Detroit City Gas Company that it had arranged for the financing of the construction of the connecting line and of the reinforcement of its present pipe line pursuant to Section 7 of Article II of the contract dated August 31, 1935, between them, and has re-

ceived Detroit City Gas Company's acceptance of such notice and of the adequacy of the financial assurance contained therein.

On February 6, 1936, Panhandle Eastern Pipe Line Company retired all of its previously outstanding issue of 6% Promissory Notes, due October 2, 1950, which had been in default as to interest and by amendment of the Mortgage Trust Indenture securing its Mortgage Bonds it cured its defaults in respect to said Bonds. It accomplished these objectives by a recapitalization as the result of which its outstanding securities and the ownership thereof are as follows:

[fol. 1526S]

Securities of Panhandle Eastern	Columbia Oil	Owned by Panhandle Corp.	Public
Mortgage 6% Bonds*	$14,574,500	$ —	$3,625,500
Notes due September 1, 1937#	800,000	800,000	—
Preferred Stock (par value)	4,700,000	4,700,000	
Common Stock	1,149 shs.	1,149 shs.	

(*) The Trustee under the Mortgage now holds $315,000 cash in the Sinking Fund and is calling for tenders of Bonds to exhaust said funds.

(#) These notes bear no interest until September 1, 1936, and 5% interest for one year thereafter, payable at maturity, and are convertible at the option of the holders, par for par, into Preferred Stock.

The Preferred Stock now outstanding has the voting and conversion rights and other preferences described in our said offer dated January 31, 1936. $1,600,000 (par value) additional thereof has been authorized to be issued on the conversion of the presently outstanding Notes of the same principal amount.

On and after February 6, 1936, the undersigned Columbia Oil & Gasoline Corporation acquired by purchase or made provision for the payment of all of the presently outstanding $4,940,000 principal amount of Two-Year 6% Collateral Trust Notes of Panhandle Corporation, which are now in default as to principal and interest and which are unconditionally guaranteed as to principal and interest by Missouri-Kansas Pipe Line Company. These Notes are collaterally secured by pledge of the Notes, Preferred Stock and Common Stock of Panhandle Eastern owned by Panhandle Corporation.

On February 6, 1936, the undersigned, Columbia Oil, also purchased 750 shares (75%) of the common stock of Panhandle Corporation and loaned to Panhandle Corporation the sum of $187,876.28 for the discharge of liabilities other than its Two-Year 6% Collateral Trust Notes and its notes evidencing these loans.

Within the period specified in the above mentioned Decree, Columbia Oil has transferred to Mr. Gano Dunn, as Trustee thereunder, the Preferred Stock and Common Stock of Panhandle Eastern owned by it as shown in the above table.

The nine directors of Panhandle Eastern, selected pursuant to paragraph (a) of Section III of the above mentioned Decree are at present Messrs. Gano Dunn, Joseph A. Bower, James L. Harrop, Dean Mathey, William P. Philips, Henry T. Bush, C. Ray Phillips, Ashton W. Hawkins and F. Cliffe Johnston. The last two named were selected by Mr. Dunn to be independent of either Columbia or Missouri-Kansas interests and Columbia Oil has advised Mr. Dunn that, as to Messrs. Henry T. Bush and C. Ray Phillips and to the two so selected by him, the nomination applies also to the next annual election of directors which will occur on March 9, 1936.

Replying to your request that if we are aware of the basis of the Receivers' contention that our proposal did not comply with the terms of the stipulation, we should enclose a statement with respect to this matter, we beg to say that we have not been advised by the Receivers of the basis for their contention. With respect to certain provisions of the offer which you and we have heretofore discussed, we can add the following as a clarification of their meaning:

The plan of financing the whole project of supplying the Detroit market with natural gas from Panhandle Eastern Pipe Line Company, as set forth in our said offer of [fol. 15269] January 31, 1936, embodied the terms on which the undersigned Columbia Oil & Gasoline Corporation and Columbia Gas & Electric Corporation would be willing to assist in this financing. (Their agreement with Panhandle Eastern dated January 31, 1936, described in the second paragraph of this letter, is in conformity there-

with.) The provision in said plan that Columbia Gas would construct or acquire the necessary connecting pipe line from Panhandle Eastern's present pipe line to the city gate at Detroit in no way restricted Panhandle Eastern in its freedom to make other arrangements for this financing within the period provided in the above mentioned Decree entered on January 29, 1936. On the contrary, this provision, acceptance of which was optional with Panhandle Eastern, relieves Panhandle Eastern of the burden of raising approximately half of the total new capital funds needed for the whole Detroit project.

Another of the provisions of our said offer dated January 31, 1936, contemplated the cancellation of those provisions of the contract dated September 17, 1930, (between Missouri-Kansas, The National City Company and the undersigned Columbia Oil) which relate to the execution of contracts for the purchase of gas from Panhandle Eastern by Columbia Gas and Missouri-Kansas. The differences of opinion arising from varied meanings attributed to these provisions constitute a part of the claims asserted by the Receivers of Missouri-Kansas in their suit against us and others which our said offer dated January 31, 1936, proposed to settle. If any settlement is to be made, manifestly it should be a settlement of all controversies. The requirements of the Detroit Contract so absorb the capacity of Panhandle Eastern's pipe line as then constituted that it can not make additional commitments for substantial quantities of firm gas. Furthermore, should it hereafter become possible to increase the capacity of the line beyond the requirements of the Detroit Contract, this arrangement would not prevent Panhandle Eastern from selling its then available gas to Missouri-Kansas or to any other purchaser on the terms which might then appear most advantageous to it.

If there are any other features of this matter about which you would care to make inquiry, we should be glad to have you take them up with us.

Yours very truly,

COLUMBIA OIL & GASOLINE CORPORATION,

By Charles A. Munroe, President.

The undersigned, Columbia Gas & Electric Corporation, concurs in the foregoing letter.

COLUMBIA GAS & ELECTRIC CORPORATION,

By E. Reynolds, Jr.,
Executive Vice-President.

In re: Missouri-Kansas Pipe Line Company Receivership.

Dear Sirs:

We, the undersigned, Receivers of Missouri-Kansas Pipe Line Company, suggest that your offer to us dated January 31, 1936, as supplemented by your letter of March 5, 1936, filed in the Missouri-Kansas Pipe Line Company receivership proceedings, be modified in the following particulars and we hereby offer, in the event you agree to the following modifications, that we will present the offer as so modified to the Chancellor of the State of Delaware at the adjourned hearing now set for Thursday, April 23, 1936, and will recommend that he enter an order directing us to accept the offer as so modified. Subject to your acceptance and such approval by the Chancellor, we agree to carry into effect with you the offer as so modified.

The modifications are as follows:

1. That the Preferred Stock of Panhandle Eastern Pipe Line Company, as described in your letter of January 31, 1936, be changed in the following respects:

(a) The provision for the convertibility of each share of Preferred Stock into 4 shares of Common Stock at any time up to the date of redemption be eliminated;

[fol. 15271] (b) The provision giving the Preferred Stock voting rights for the election of directors be eliminated and there be substituted in lieu thereof the following arrangement:

Of the 110,000 shares of Preferred Stock mentioned in your letter of January 31, 1936, 10,000 shares be set apart and designated as Class B Preferred Stock and the same be non-redeemable, non-convertible and non-participating in earnings except that such 10,000 shares shall bear a dividend provision identical with the dividend provisions provided for in your letter of January 31, 1936, and that said 10,000 shares of Class B Preferred Stock be entitled to elect as a class two of the nine directors to the Board of Panhandle Eastern Pipe Line Company. The balance of the directors, seven in number, shall be elected by the common stock and said stock shall have cumulative voting rights;

(c) The balance of the 110,000 shares of Preferred Stock mentioned in your letter of January 31, 1936, other than the shares to be set apart as a Class B, Preferred Stock, as mentioned in subparagraph (b) above consisting of 100,000 shares of Preferred Stock be designated Class A Preferred Stock and until redeemed shall be entitled to [fol. 15272] participate in earnings of Panhandle Eastern Pipe Line Company upon the following basis:

When in any year the preferred dividends plus any and all accumulations on both the Class A and the Class B Preferred Stock outstanding have been declared and paid and a dividend has been declared and paid upon the Common Stock at the rate of $1.50 per share, any further dividends declared and paid in any such year shall be shared by the Class A preferred Stock and the Common Stock by classes in the ratio of 25% thereof to the Class A Preferred Stock and 75% thereof to the Common Stock so long as the 100,000 shares of Class A Preferred Stock are outstanding. In the event that the Class A Preferred Stock is redeemed in part the percentage of participation of the remaining Class A Preferred Stock outstanding shall be in such proportion of 25% as such number of shares outstanding bears to 100,000 and upon said percentage (25%) being reduced through part of the Class A Preferred Stock

being redeemed, the percentage otherwise payable to the Common Stock (75%) would be accordingly increased;

(d) Said Class A Preferred Stock shall be redeemable at any time in whole or in part at par plus accrued divi- [fol. 15273] dends on or before July 1, 1941; after July 1, 1941, said Class A Preferred Stock shall be redeemable at any time in whole or in part at 110% plus accrued dividends. However, at any and all times the premium of 10% on such stock shall be waived upon any redemption from time to time out of earnings of the Corporation of any part of said Class A Preferred Stock then owned, held or controlled by Columbia Oil & Gasoline Corporation or Columbia Gas & Electric Corporation.

(e) Except as above stated, the Class A and Class B Preferred Stock shall contain identical provisions which shall be substantially those now stated in the Certificate of Incorporation.

2. The 80,000 shares of Common Stock which the offer of January 31, 1936, contemplates shall first be tendered to stockholders of Missouri-Kansas Pipe Line Company and thereafter taken up by Columbia Oil & Gasoline Corporation to the extent not purchased by said stockholders shall be tendered to said stockholders as provided in the offer of January 31, 1936, as modified by the letter of Ganno Dunn, Trustee, dated February 28, 1936, attached to your letter of March 5, 1936, and to the extent Missouri-Kansas Pipe Line Company stockholders do not exercise their rights to subscribe the same shall be subscribed by Columbia Oil & Gasoline Corporation, and to the extent Columbia Oil & Gasoline Corporation subscribes for said shares and [fol. 15274] purchases the same Missouri-Kansas Pipe Line Company or any new corporation taking over its assets under any plan of reorganization or readjustment or reclassification of its stock shall have the right to purchase said shares at $25 per share plus interest at the rate of 6% per annum from the date of purchase by Columbia Oil & Gasoline Corporation to the date of such purchase from Columbia Oil & Gasoline Corporation during a period of six months after the discharge of the undersigned as Receivers of Missouri-Kansas Pipe Line Company and the termination of the receivership estate except that in

no event shall such right continue after the 31st day of December, 1937. In your offer of January 31, 1936, you have the following statement:

"The stock would be offered by Panhandle Eastern for subscription pro rata to the holders of its Common Stock, subscription rights issued to you as Receivers or to Missouri-Kansas to be distributed pro rata (according to the total number of votes represented by the outstanding stock) to the stockholders of Missouri-Kansas who satisfactorily establish that they are such stockholders, and to be exercisable only by such stockholders or their respective assignees."

This should be changed to read as follows:

[fol. 15275] The stock would be offered by Panhandle Eastern for subscription, pro rata to the holders of its Common Stock, subscription rights issued to you as Receivers or to Missouri-Kansas to be distributed pro rata among the holders of your Common Stock and Class B Stock in proportion to the relative dividend and liquidation provisions of said classes of stock, namely, each Class B share would be entitled to one-twentieth of the right which would be accorded each share of the Common Stock. Such distribution to be made to the stockholders of Missouri-Kansas who satisfactorily establish that they are such stockholders and said rights to be exercisable only by such stockholders or their respective assignees.

3. The September 17, 1930 contract shall be canceled as provided in your offer of January 31, 1936 without prejudice, however, to Missouri-Kansas Pipe Line Company or its Receivers to enter into any contract or contracts with Panhandle Eastern Pipe Line Company for the purchase of gas which the Board of Directors of Panhandle Eastern Pipe Line Company agree upon and the releases to be given to you pursuant to your offer shall include all rights of Panhandle Eastern Pipe Line Company and its stockholders, you and we cooperating as the owners of its entire stock to authorize the same.

4. The provisions in the offer of January 31, 1936, with respect to the amount of cash which the undersigned shall receive, be changed as follows:

[fol. 15276] (a) The payment of $300,000 presently provided for, remains;

(b) Columbia Oil & Gasoline Corporation shall purchase from the Receivers at $25 per share up to 40,000 shares of Panhandle Eastern Pipe Line Company Common Stock which the Receivers will obtain under the offer, provided, however, that at least such number of shares be first offered to the present stockholders of Missouri-Kansas Pipe Line Company for purchase by them at $25 per share, in addition to, at the same time and in the same manner, as the 80,000 shares referred to in Paragraph 2 above. The obligation of Columbia Oil & Gasoline Corporation shall be to purchase only such portion as shall not be taken by the stockholders after such offering, but the money provided by Columbia Oil & Gasoline Corporation shall be used only for the purpose of paying claims adjudicated in the receivership proceedings and administration fees and expenses allowed by the Chancellor. Money raised from other sources or from stockholders may be used for other purposes. To the extent there would not be needed for said purposes the full $1,000,000 which would be so provided by Columbia Oil & Gasoline Corporation if it purchased 40,000 shares of the Panhandle Eastern stock at $25 per share, Columbia Oil & Gasoline Corporation shall not be called upon to make such purchase. In [fol. 15277] the event Columbia Oil & Gasoline Corporation is called upon to purchase any part or all of the 40,000 shares, Missouri-Kansas Pipe Line Company or any new company taking over its assets under a plan of reorganization, readjustment or reclassification, shall be given a right within a period of six months after the discharge of the undersigned as Receivers of Missouri-Kansas Pipe Line Company and the termination of the receivership estate to repurchase said shares at $25 per share plus interest at the rate of 6% per annum from the date of purchase by Columbia Oil & Gasoline Corporation to the date of such purchase from Columbia Oil & Gasoline Corporation, which right shall in no event extend beyond the 31st day of December, 1937.

(c) In the event the Chancellor of the State of Delaware shall request an extension of the offer beyond May 1,

1936, you will be willing to extend it for his convenience until the 10th day of May, 1936.

5. Except as the modifications suggested in this letter make changes in the offer of January 31, 1936, all of its terms and provisions shall remain unaltered.

C. RAY PHILLIPS.
HENRY T. BUSH.
As Receivers of Missouri-Kansas Pipe Line Company.

We hereby agree to the modification set forth above.

Gentlemen:

In re: R. H. McWilliams Co. vs. Missouri-Kansas Pipe Line Company, et al.
Consolidated and Constituent Causes

This is to advise you that Henry T. Bush and C. Ray Phillips, as Receivers of Missouri-Kansas Pipe Line Company, presented your offer dated January 31, 1936, as supplemented by your letter of March 5, 1936, and as modified by their letter to you of April 22, 1936, setting forth certain modifications which had been agreed to by you, the Chancellor of the State of Delaware at the adjourned hearing on Thursday, April 23, 1936, in the above-

captioned proceedings, and recommended that he enter an order directing them to accept the offer as so modified. This is to notify you that the Chancellor approved the offer as so modified and entered an order dated the 29th day of April, A. D. 1936, authorizing and directing said Receivers to accept the offer as so modified. Enclosed herewith is a copy of the order entered by the Chancellor.

The Receivers are now prepared and authorized to join with you in carrying the offer as so modified into effect, and, to the extent necessary, hereby accept the offer as so modified.

Yours truly,

HENRY T. BUSH AND
C. RAY PHILLIPS,
Receivers of Missouri-Kansas
Pipe Line Company.

By Marvel, Morford, Ward & Logan,
Their Attorneys.

[fol. 15285] (Exhibit 160)

Panhandle Eastern Pipe Line Company

Purchase Agreement

February 2, 1942.

Glore, Forgan & Co. and
Kidder, Peabody & Co.,
as Representatives of the respective
Purchasers named within,
38 Wall Street, New York, N. Y.

Dear Sirs:

The undersigned, Panhandle Eastern Pipe Line Company (hereinafter called the "Company"), hereby confirms its agreement with the several Purchasers, or with the Purchaser, as the case may be, hereinafter named, as follows:

1. Purchasers and Representative. If there shall be two or more persons, firms or corporations named in paragraph 13 hereof, the term "Purchasers" as used herein shall be deemed to mean the several persons, firms, or corporations so named (including the Representative hereinafter mentioned, if so named), and if there shall be only one such person, firm or corporation so named, the term "Purchasers" as used herein shall mean such person, firm or corporation. The term "Representative" as used herein shall be deemed to mean the representative or, if more than one, the representatives to whom this Purchase Agreement is addressed, who by signing this Purchase Agreement represent that it or they have been authorized by the Purchasers to execute this Purchase Agreement on their behalf and to act for them in the manner herein provided, and if there shall be only one Purchaser the term "Representative" as used herein shall be deemed to mean such Purchaser. All obligations of the Purchasers hereunder are several in accordance with their respective interests and not joint, and nothing herein contained shall constitute the Purchasers co-partners of each other.

2. Description of Bonds and Stock. The Company proposes to issue $10,000,000 principal amount of its First Mortgage and First Lien 3% Bonds, Series C, due January 1, 1962 (hereinafter called the "Bonds"), to be issued under and secured by its presently existing Mortgage and Deed of Trust (hereinafter called the "Original Indenture"), dated November 1, 1940, to City Bank Farmers Trust Company and James M. Kemper, as Trustees, and a proposed Supplemental Indenture to be dated January 1, 1942 (hereinafter called the "Supplemental Indenture"). The Original Indenture and the Supplemental Indenture are hereinafter sometimes collectively called the "Indenture". The Bonds and the Supplemental Indenture have been duly authorized by appropriate corporate action and will be in the forms or substantially in the forms, respectively, filed with the Securities and Exchange Commission (hereinafter called the "Commission") in connection with the Registration Statement of the Company hereinafter mentioned. Two copies of the Original Indenture and of the Supplemental Indenture are herewith delivered to you, marked for identification.

The Company also proposes to issue 150,000 shares of its 5.60% Cumulative Preferred Stock (hereinafter called the "Stock"), to be created and authorized by a Certificate of Amendment of the Certificate of Incorporation of the Company (filed under Section 26 of Chapter 65 of the Revised Code, as amended, of the State of Delaware) and a proposed Certificate Setting Forth the Designation and Certain of the Terms of the 5.60% Cumulative Preferred Stock (to be filed under Section 13 of Chapter 65 of said Revised Code.) The Stock and said two Certificates (said two Certificates being hereinafter sometimes collectively called the "Certificate of Amendment") have been duly authorized by appropriate corporate action and the stock certificates for such Stock and said two Certificates will be in the forms or substantially the forms, respectively, filed with the Commission in connection with said Registration Statement. Two copies of each of said Certificates are herewith delivered to you, marked for identification.

[fol. 15286] 3. Representations and Warranties of the Company. The Company represents and warrants to the several Purchasers that:

(a) The Company has filed with the Commission a registration statement, on Form A-2 (Registration No. 2-4919), and a prospectus, for the registration of the Bonds and Stock under the Securities Act of 1933, as amended (hereinafter called the "Securities Act"), and such registration statement, as heretofore amended, has become effective for the purpose of the Company's public invitation for bids for the purchase of the Bonds and the Stock. The Company has prepared and will promptly file with the Commission a post-effective amendment to such registration statement (hereinafter called the "Post-Effective Amendment") and an amended prospectus (copies of which are herewith delivered to you, marked for identification) and will not at any time before the effective date of the Post-Effective Amendment file any other amendment to such registration statement or any other amended prospectus of which the Representative shall not previously have been advised and furnished with a copy thereof or to which the Representative shall reasonably object in writing. Such registration statement, as heretofore amended, and as amended by the Post-Effective Amendment and by such other amendment or amendments thereto, if any, as may be filed before the effective date of the Post-Effective Amendment, and the amended prospectus now proposed to be filed or, if any other amended prospectus be filed before the effective date of the Post-Effective Amendment, the last such amended prospectus filed, are hereinafter called the "Registration Statement" (which term shall include all financial statements and exhibits) and the "Prospectus", respectively. The Company will not file any amendment to the Registration Statement or any supplement to the Prospectus or any amended prospectus after the effective date of the Post-Effective Amendment of which the Representative shall not previously have been advised and furnished with a copy thereof or which shall be disapproved by Messrs. Chadbourne, Hunt, Jaeckel & Brown who are acting as counsel on behalf of the several Purchasers for the purposes of this Purchase Agreement.

(b) When the Post-Effective Amendment shall become effective, the Registration Statement and the Prospectus will fully comply with the provisions of the Securities Act

and the Rules and Regulations of the Commission thereunder, and the Registration Statement will not contain an untrue statement of a material fact or omit to state a material fact required to be stated therein or necessary in order to make the statements therein not misleading, and the Prospectus will not contain an untrue statement of a material fact and will not omit to state a material fact necessary in order to make the statements therein, in the light of the circumstances under which they are made, not misleading; provided, however, that it is understood that none of the representations and warranties in this clause (b) contained shall apply to statements or omissions in the Registration Statement or Prospectus made in reliance upon or in conformity with information furnished herein or in writing to the company by or on behalf of any Purchaser for use in connection with the preparation of the Registration Statement or Prospectus, or to any statements in or omissions from the Statements of Eligibility and Qualification (Forms T-1 and T-2) of the Trustees under the Indenture.

(c) The accountants who have certified or shall certify the financial statements and schedules (except certain financial statements of Michigan Gas Transmission Corporation and Indiana Gas Distribution Corporation which are stated in the Registration Statement not to be certified) filed and to be filed with the Commission as parts of the Registration Statement and the Prospectus are independent public or independent certified public accountants, as required by the Securities Act and the Rules and Regulations of the Commission thereunder.

(d) Since the respective dates as of which information is given in the registration statement and the prospectus, as heretofore amended, there has not been any substantial change in the condition of the Company or in the condition of its subsidiary company, financial or otherwise, except changes on account of dividends declared or changes arising from transactions in the ordinary course of business or except as described in the Post-Effective Amendment and the amended prospectus now proposed to be filed.

[fol. 15287] (e) The Company has filed with the Commission an application and declaration on Form U-1 under the Public Utility Holding Company Act of 1935, seeking an appropriate order authorizing or permitting the issue and sale by the Company of the Bonds and the Stock and the transactions related thereto. The State Corporation Commission of Kansas has issued its order or orders authorizing or permitting the issue and sale by the Company of the Bonds and the Stock and the transactions related thereto. Copies of the said order or orders have been heretofore delivered to the Representative. If the order sought from the Commission is obtained and if such order and said order or orders of the State Corporation Commission of Kansas continue in full force and effect, no consent of or approval by any other public board or body is necessary to authorize the issue and sale of the Bonds and the Stock, except that the Registration Statement under the Securities Act must become effective and there must be compliance with the securities laws in the states in which the Bonds and the Stock are to be sold.

(f) All the real property and interest therein of the Company subject or to be subject to the lien of the Indenture are or will be adequately described in the Indenture, in order that the Indenture shall constitute a valid lien on all such property.

4. Time and Place of Closing. Delivery of the Bonds and Stock (excepting the maximum number of shares to be reserved by the Company for offering to certain of its Common Stockholders as stated in paragraph 14 hereof, delivery of and payment for the shares so reserved and not subscribed for by such stockholders to be made at the time provided in said paragraph 14) and payment therefor shall be made at the office of City Bank Farmers Trust Company, 22 William Street, New York, New York, at 9:30 o'clock a.m. (Eastern Standard Time) on the third full business day (unless postponed in accordance with the provisions of paragraph 11 hereof) following the day on which the Post-Effective Amendment shall become effective, or at such other time on such date, not later than ten business days after such effective date, as shall be agreed upon in writing by the Company and the Repre-

sentative. The hour and date of such delivery and payment is herein called the "Closing Date". Anything herein contained to the contrary notwithstanding, the obligation of the Company to deliver any of the Bonds or Stock hereunder, and the obligation of the Purchasers to purchase any of the Bonds or Stock hereunder, shall be subject to the condition that at the Closing Date the Company shall sell and receive payment for all the Bonds and all the Stock (except as otherwise provided in paragraph 14 hereof) in accordance with the terms hereof. Payment for the Bonds and the Stock shall be made to the Company or its order by certified or bank cashier's checks in New York Clearing House funds for the respective accounts of the several Purchasers. Such payment shall be made upon delivery of the Bonds and of certificates for the Stock to the Representative for the respective accounts of the several Purchasers against receipt therefor signed by the Representative. Initial delivery of the Bonds shall be made in the denominations of $1,000 each, either (at the option of the Company) in temporary form without coupons or in definitive form with coupons, registerable as to principal only and in form satisfactory to Messrs. Chadbourne, Hunt, Jaeckel & Brown. If delivery of the Bonds shall be made in the form of temporary Bonds without coupons, such Bonds shall be exchangeable without charge to the holders thereof for definitive Bonds with coupons, registerable as to principal only, when prepared, which shall be as soon as reasonably practicable after the delivery of the temporary Bonds; provided, that at the option of the Company and on agreement with the Representative, such temporary Bonds shall also be exchangeable without charge to the holders thereof for the definitive fully registered Bonds without coupons, when prepared, in such denominations permitted by the Supplemental Indenture as may be agreed upon between the Company and the Representative and in form satisfactory to Messrs. Chadbourne, Hunt, Jaeckel & Brown, as soon as reasonably practicable after the delivery of the temporary Bonds. Initial delivery of the certificates for the Stock shall be made either (at the option of the Company) in temporary form or in definitive form registered in such names and in such denominations as the Representative

shall request in writing. If the Representative shall request that any certificate be issued in a name or names other than that of the Purchaser agreeing to purchase the shares of Stock represented thereby, such Purchaser shall pay any transfer taxes resulting from such issuance.

It is understood that the Representative, individually and not as the Representative, may (but shall not be obligated to) make payment to the Company for the Bonds and for the Stock to be purchased by any Pur- [fol. 15288] chaser whose check shall not have been received by the Representative on the Closing Date for the account of such Purchaser. Any such payment by the Representative shall not release such Purchaser from any of its obligations hereunder.

5. Deposit. The Company acknowledges the deposit with it by the several Purchasers of a certified or bank cashier's check or checks for 5% of the principal amount of the Bonds (amounting, in the aggregate, to $500,000) and 5% of the par value of the Stock (amounting, in the aggregate, to $750,000) agreed to be purchased by the respective Purchasers. The amount so deposited by each Purchaser shall be held by the Company as security for the faithful performance by such Purchaser of its obligations hereunder until disposed of as hereinafter in this paragraph 5 provided. Upon receipt by the Company of payment for the Bonds and Stock agreed to be purchased by any Purchaser as provided in paragraph 13 hereof, or if this agreement shall be terminated, otherwise than on account of the default of such Purchaser, either pursuant to the provisions of paragraph 11 hereof or by reason of non-fulfillment of the conditions specified in paragraph 4 hereof, the Company shall forthwith return the amount of such deposit, without interest, to the Representative for account of such Purchaser. In the event that this Purchase Agreement shall be duly terminated in accordance with the provisions of paragraphs 7, 8 or 10 hereof or because of any material misstatement in or breach of the representations or warranties in paragraph 3 hereof or of any default of the Company in the performance of its obligations hereunder, the Company shall forthwith return the amount of all such deposits, without interest, to the

Representative for the account of the respective Purchasers. The Company may return such deposits either by returning the checks deposited with it by the Representative or the several Purchasers or by issuing and delivering to the Representative or the several Purchasers (as the case may be) its own check or checks, certified if requested, in amounts equal to the amount so deposited by the Representative or the several Purchasers (as the case may be). In the event that any Purchaser shall fail or refuse, otherwise than for some reason sufficient to justify in accordance with the terms hereof the cancellation or termination of its obligations hereunder, to purchase and pay for the Bonds and the Stock which such Purchaser has agreed to purchase, as provided in paragraph 13 hereof, the deposit made by such Purchaser shall become the property of the Company free of any claim on the part of such Purchaser or of the Representative, without prejudice, however, to any other rights of the Company under this Purchase Agreement.

6. Covenants of the Company. The Company covenants and agrees that:

(a) The Company will use its best efforts, when and as requested by the Representative, (i) to qualify the Bonds and Stock for sale under the securities or blue sky laws of such states as the Representative may designate (provided, always, that the Company shall not be required to expend for such purpose more than the maximum amount specified in subparagraph (e) (v) of this paragraph 6); and (ii) as soon as practicable after request of the Representative, made not later than fifteen months after the delivery of and payment for the Bonds and Stock, to procure the listing of the Bonds and the Stock on the New York Stock Exchange, and the registration thereof under the Securities Exchange Act of 1934.

(b) The Company will promptly deliver to the Representative two conformed copies of the aforesaid registration statement as originally filed and of all amendments thereto heretofore or hereafter made, including the Post-Effective Amendment (in each case including all exhibits thereto filed therewith), and of any further amended prospectus, and will also deliver to the Representative, for

distribution to the Purchasers, a sufficient number of additional copies of each of the foregoing (but without exhibits) so that one copy of each may be distributed to each Purchaser. The Company will also send to the Purchasers, without expense to them, on the effective date of the Post-Effective Amendment and thereafter from time to time during the period of one year after the effective date of the Post-Effective Amendment, as many copies of the Prospectus as supplemented or amended, if the Company shall have made any supplements or amendments thereto, as the Representative may reasonably request for the purposes contemplated by the Securities Act.

[fol. 15289] (e) The Company will pay all expenses in connection with (i) the preparation and filing by it of the Registration Statement and Prospectus and the printing of this Purchase Agreement, (ii) the issue and delivery of the Bonds and Stock as provided in paragraphs 4 and 14 hereof, (iii) the preparation, execution and recording and/or filing of the Supplemental Indenture and the Certificate of Amendment, (iv) the listing of the Bonds and the Stock on the New York Stock Exchange and the registration thereof under the Securities Exchange Act of 1934 (if there shall be any such listing and registration of the Bonds and Stock), (v) the qualification of the Bonds and Stock under state securities or blue sky laws as aforesaid, but not in excess of $3,000 including filing fees; and (vi) the printing and furnishing to the Purchasers in reasonable quantities of copies of the Registration Statement and the Prospectus and any amendments or supplements thereto; and will pay all Federal taxes (but not including any transfer taxes) on the issue of the Bonds and Stock. The Company shall not, however, be required to pay any amount for any expenses of the Representative or any of the Purchasers, except that if this agreement shall be duly terminated in accordance with the provisions of paragraphs 4, 7, 8, 10 or 11 hereof or because of any material misstatement in or breach of the representations or warranties in paragraph 3 hereof or of any default of the Company in the performance of its obligations hereunder, the Company will reimburse the Representative for the reasonable fees and disbursements of Messrs. Chadbourne, Hunt, Jaeckel & Brown, who are acting on behalf of the several

Purchasers for the purposes of this Purchase Agreement. The Company shall not in any event be liable to any of the several Purchasers for damages on account of loss of anticipated profits.

(d) The Company will advise the Representative, immediately, and confirm the advice in writing, when the Post-Effective Amendment shall have become effective and when appropriate orders have been entered by the Commission and the State Corporation Commission of Kansas permitting the issuance and sale of the Bonds and the Stock.

(e) The Company will promptly notify each Purchaser in the event of the issuance by the Commission of any stop order suspending the effectiveness of the Registration Statement, or in the event of the institution or notice of intended institution of any action or proceeding for that purpose.

(f) In the the event the Commission shall enter a stop order suspending the effectiveness of the Registration Statement after the Bonds and Stock have been delivered to the several Purchasers and paid for as herein provided, the Company will make every reasonable effort to obtain the lifting of such order at the earliest possible moment.

(g) Until the expiration of one year after the Registration Statement becomes effective, the Company will comply so far as it is able, and at its own expense, with all requirements imposed upon it by the Securities Act, as now and hereafter amended, and by the Rules and Regulations of the Commission thereunder, as from time to time in force, so far as necessary to permit the continuance of sales of or dealings in the Bonds and Stock in accordance with the provisions hereof and the Prospectus.

(h) The Company will, so long as any of the Bonds or Stock shall be outstanding, deliver to the Representative upon its request, and to each Purchaser who may so request, as soon as practicable after the close of every fiscal year, a balance sheet of the Company, setting forth its financial condition as of the end of such fiscal year, together with statements of income and surplus for such fiscal year, all in reasonable detail, such balance sheet and statements of income and surplus to be accompanied by a copy of the certificate or report with respect thereto of

independent public or certified public accountants, who may be the regular accountants for the Company. If there be subsidiaries of the Company whose accounts, in the ordinary practice of the Company, are consolidated with the Company's accounts, such financial statements shall be furnished on a consolidated basis.

(i) During a period of one year after the effective date of the Post-Effective Amendment, if any event relating to or affecting the Company or its subsidiaries, or of which the Company shall be advised in writing by the Representative, shall occur as a result of which it is necessary to supplement or amend the Prospectus in order to make the Prospectus not misleading in the light of the circum- [fol. 15290] stances existing at the time it is delivered to a Purchaser, the Company will forthwith at its expense prepare and furnish to the Purchasers a reasonable number of copies of a supplement or supplements or an amendment or amendments to the Prospectus (in form satisfactory to Messrs. Chadbourne, Hunt, Jaeckel & Brown) which will supplement or amend the Prospectus so that as supplemented or amended it will not contain any untrue statement of a material fact or omit to state any material fact necessary in order to make the statements therein, in the light of the circumstances existing at the time the Prospectus is delivered to a purchaser, not misleading. In case any Purchaser is required to deliver a prospectus descriptive of the Bonds and Stock after the expiration of one year after the effective date of the Post-Effective Amendment, the Company, upon the request of the Representative, will furnish to the Representative, at the expense of such Purchaser, a reasonable quantity of supplemented prospectuses or supplements to the Prospectus complying with Section 10 of the Securities Act. For the purposes of this paragraph (i) the Company will furnish such information with respect to itself and its subsidiaries as the Representative may from time to time reasonably request.

(j) The Company will make generally available to its security holders, as soon as practicable, an earning statement (which need not be audited) in the same detail as the statement of income appearing in the Registration Statement, covering a period of at least twelve months

beginning not earlier than the effective date of the Post-Effective Amendment.

(k) The Company will apply the proceeds from the sale of the Bonds and the Stock as set forth in answer to Item 28 of the Registration Statement.

7. Conditions of Purchasers' Obligations. The obligations of the several Purchasers to purchase and pay for the Bonds and Stock shall be subject to the performance by the Company of its obligations to be performed hereunder at and prior to the Closing Date, and upon the following terms and conditions:

(a) The Post-Effective Amendment shall have become effective prior to 7 o'clock P. M. (Eastern Standard Time) on February 4, 1942, or such other time and date, not later than 7 o'clock P. M. (Eastern Standard Time) on the seventh day thereafter, as may be approved by the Representative; the effectiveness of the Registration Statement shall continue; and no stop order shall have been issued under the Securities Act, or proceedings therefor instituted by the Commission, prior to the Closing Date.

(b) Prior to 7 o'clock P. M. (Eastern Standard Time) on February 4, 1942, or such other time and date, not later than 7 o'clock P. M. (Eastern Standard Time) on the seventh day thereafter, as may be approved by the Representative, there shall have been issued, and on the Closing Date there shall be in full force and effect, an order or orders of the Commission and of the State Corporation Commission of Kansas permitting the issuance and sale of the Bonds and the Stock and the transactions related thereto on the terms and conditions herein set forth or contemplated and containing no provision unacceptable to the Representative.

(c) At or prior to the Closing Date the several Purchasers shall have received from Messrs. Chadbourne, Hunt, Jaeckel & Brown, who are acting on behalf of the several Purchasers for the purposes of this Purchase Agreement, a favorable opinion (in rendering which they may rely upon either or both of the Company's counsel named in subparagraph (d) hereof regarding matters pertaining to titles, franchises, the lien of the Indenture, recording and filing of the Indenture and conformity to local

law, with the reservation that they have not passed upon and express no opinion with respect to such matters except that they have independently examined the laws of the various states in which the Company's properties are located as to the jurisdiction of State Commissions over the issuance of the Bonds and Stock and concur in the opinion of Company's counsel with regard to this matter) to the effect that—

(i) the Company is a validly organized and existing corporation under the laws of the State of Delaware;

[fol. 15291] (ii) the Indenture has been duly and validly authorized, executed and delivered and is in due and proper form and constitutes the valid mortgage of the Company;

(iii) the execution, authentication and issuance of the Bonds have been duly and validly authorized by all necessary corporate action and the Bonds are in due and proper form and when duly executed and authenticated and delivered to the Purchasers thereof against payment of the agreed consideration therefor they will be legal, valid and binding obligations of the Company enforceable (subject to bankruptcy and insolvency laws) in accordance with their terms and entitled to the benefits and security of the Indenture;

(iv) the Certificate of Amendment has been duly and validly authorized, executed and filed and constitutes valid amendments to the Certificate of Incorporation of the Company;

(v) the issuance and sale of the Stock have been duly and validly authorized by all necessary corporate action, and the certificates therefor are in due and proper form and when duly executed and delivered to the Purchasers thereof against payment of the agreed consideration therefor, the shares represented thereby will be duly and validly issued and full paid and non-assessable;

(vi) the execution and delivery of this Purchase Agreement have been duly and validly authorized by all necessary corporate action on the part of the Company and constitutes the valid and binding agreement of the Company;

(vii) orders have been entered (in proceedings as to the validity of which they have relied upon opinions of counsel for the Company) by the Commission under the Public Utility Holding Company Act of 1935 and by the State Corporation Commission of Kansas, permitting the issuance and sale of the Bonds and the Stock and the transactions related thereto; and no further approval, authorization, consent, certificate or order of any public board or body is legally required for the issuance and sale by the Company of the Bonds and Stock pursuant to this agreement;

(viii) the Post Effective Amendment has become, and at the closing date the Registration Statement is, effective under the Securities Act, and, to the best of their knowledge, no proceedings for a stop order are pending or threatened under Section 8(d) of the Securities Act;

(ix) the Registration Statement and Prospectus (other than the financial statements included therein as to which no opinion need be rendered) comply as to form in all material respects with the requirements of the Securities Act, and the Trust Indenture Act of 1939 and the Rules and Regulations of the Commission thereunder;

(x) the Indenture is qualified under the Trust Indenture Act of 1939;

(xi) the terms and provisions of the Bonds and the Stock conform to their respective descriptions contained in the Registration Statement and in the Prospectus; and

(xii) the Board of Directors of the Company has adopted resolutions authorizing the redemption or other acquisition for retirement of all its outstanding Class A Preferred Stock at a price equal to the par value of such stock plus accrued and unpaid preferential dividends thereon, and all such stock has been surrendered to the Company upon payment by it of such price.

(d) At or prior to the Closing Date the several Purchasers shall have received the favorable opinions of Edward N. Goodwin, Esq., General Counsel for the Company, and or Glenn W. Clark, Esq., Head of the Legal Department of the Company, in form and substance satisfactory to Messrs. Chadbourne, Hunt, Jaeckel & Brown, to the effect that—

(i) the Company is a corporation duly organized and existing under the laws of the State of Delaware and is duly authorized to carry on the business in which it, according to the statements made in the Registration Statement, is presently engaged;

[fol. 15292] (ii) the Company is duly qualified as a foreign corporation in the States of Texas, Oklahoma, Kansas, Missouri, Illinois and Indiana;

(iii) the Indenture has been duly and validly authorized, executed and delivered and is in due and proper form and constitutes the valid mortgage of the Company;

(iv) the Indenture is a valid and direct first lien on all fixed properties of the Company as defined in the Indenture (excluding any property specifically excepted from the lien of the Indenture by the provisions thereof), subject to a certain leasehold purchase obligation in the principal sum of $14,255.87 and to certain other liens, exceptions and reservations (including permissible encumbrances defined in the Indenture) which do not, in the opinion of such counsel, materially affect the Company's title to or right to use such property and to the prior lien of the Trustees under the Indenture for compensation, expenses and liabilities; and that there have also been validly pledged under the Indenture all the outstanding capital stock of Illinois Natural Gas Company, an Illinois corporation, and all the right, title and interest of the Company in and to certain contracts between the Company and certain third parties, which securities and contracts are specifically listed in the granting clauses of the Original Indenture;

(v) the Bonds are in due and proper form, have been duly and validly authorized by all necessary corporate action and when the same have been duly executed and authenticated and delivered to the Purchasers thereof against payment of the agreed consideration therefor, they will be legal, valid and binding obligations of the Company enforceable (subject to bankruptcy and insolvency laws) in accordance with their terms and entitled to the benefits and security of the Indenture;

(vi) the Certificate of Amendment has been duly and validly authorized, executed and filed and constitutes

valid amendments to the Certificate of Incorporation of the Company;

(vii) the issuance and sale of the Stock have been duly and validly authorized by all necessary corporate action, and the certificates therefor are in due and proper form and when duly executed and delivered to the Purchasers thereof against payment of the agreed consideration therefor, the shares represented thereby will be duly and validly issued and full paid and nonassessable;

(viii) the execution and delivery of this Purchase Agreement have been duly and validly authorized by all necessary corporate action on the part of the Company and constitutes a valid and binding agreement of the Company;

(ix) orders have been entered by the Commission under the Public Utility Holding Company Act of 1935 and by the State Corporation Commission of Kansas, permitting the issuance and sale of the Bonds and the Stock and the transactions related thereto; and no further approval, authorization, consent, certificate or order of any public board or body is legally required for the issuance and sale by the Company of the Bonds and the Stock pursuant to this agreement;

(x) the Post Effective Amendment has become, and at the closing date the Registration Statement is, effective under the Securities Act, and to the best of their knowledge no proceedings for a stop order are pending or threatened under Section 8 (d) of the Securities Act;

(xi) the Registration Statement and Prospectus (other than the financial statements included therein, as to which no opinion need be rendered) comply as to form in all material respects with the requirements of the Securities Act and the Trust Indenture Act of 1939 and the Rules and Regulations of the Commission thereunder;

(xii) the Indenture is qualified under the Trust Indenture Act of 1939;

(xiii) the Board of Directors of the Company has adopted resolutions authorizing the redemption or other acquisition for retirement of all its outstanding Class A Pre- [fol. 15293] ferred Stock at a price equal to the par value

of such stock plus accrued and unpaid preferential dividends thereon, and all such stock has been surrendered to the Company upon payment by it of such price;

(xiv) the portions of the answers to the Items in the Registration Statement and the corresponding information contained in the Prospectus which are stated therein to have been made on their authority have been reviewed by them and, as to matters of law and legal conclusions, are correct;

(xv) the outstanding capital stock of the Company as set forth in Item 10A of the Registration Statement has been duly authorized and is validly issued and outstanding and full paid and non-assessable (except for the Class A Preferred Stock being acquired by the Company as stated in clause (xiii) above);

(xvi) to the best of their knowledge, neither the Company nor its subsidiary is involved in any material litigation nor does the Company or its subsidiary have any material contracts not made in the ordinary course of business required to be set forth in the Registration Statement, except as set forth in the answers to Items 40 and 41 thereof, respectively;

(xvii) the Company and its subsidiary possess all licenses, permits, consents and/or orders of governmental political subdivisions or regulatory authorities required for the maintenance and operation of their respective properties and businesses as now conducted;

(xviii) the existing gas contracts and gas and gas and oil leases to which the Company is a party are valid and enforceable contracts and leases in accordance with their terms;

(xix) Illinois Natural Gas Company is a duly organized and legally existing corporation under the laws of the State of Illinois with power and authority to carry on the business in which it, according to the statements made in the Registration Statement, is presently engaged and has outstanding stock consisting of 28,000 shares of common stock without par value, all of which have been duly authorized and issued and are full paid and non-assessable;

(xx) Michigan Gas Transmission Corporation is a duly organized and legally existing corporation under the laws of the State of Delaware and has outstanding capital stock consisting of 44,800 shares of common stock without par value, all of which have been duly authorized and issued and are full paid and non-assessable;

(xxi) Indiana Gas Distribution Company is a duly and legally existing corporation under the laws of the State of Indiana and has outstanding capital stock consisting of 20 shares of common stock without par value, all of which have been duly authorized and issued and are full paid and non-assessable;

(xxii) as contemplated in Item 29 of the Registration Statement, the Company has acquired (a) from Columbia Gas & Electric Corporation the outstanding securities (including open account indebtedness) of Michigan Gas Transmission Corporation and Indiana Gas Distribution Corporation owned by (or owed to) said Columbia Gas & Electric Corporation and (b) from The Ohio Fuel Gas Company, the pipe lines referred to in said Item 29; and

(xxiii) the terms and provisions of the Bonds and the Stock conform to their respective descriptions contained in the Registration Statement and in the Prospectus.

At or prior to the Closing Date the several Purchasers shall also have received (a) photostatic copies of the opinion dated February 3, 1941 of Glenn W. Clark, Esq., addressed to Messrs. Chadbourne, Hunt, Jaeckel & Brown (having annexed thereto photostatic copies of opinions of various local counsel referred to therein) with respect to the Company's titles to its properties and the lien of the Original Indenture, (b) favorable opinions of the said Glenn W. Clark, Esq. (which may be based upon opinions of local counsel in whom he has confidence), in form and substance satisfactory to Messrs. Chadbourne, Hunt, Jaeckel & Brown as to the Company's title to property of [fol. 15294] the character of "fixed property" defined in the Indenture, acquired by it subsequent to the title examinations made in connection with the rendering of the opinions referred to in (a) above (including the pipe lines to be acquired from The Ohio Fuel Gas Company, referred to above) and as to the titles of Michigan Gas

Transmission Corporation and Indiana Gas Distribution Corporation to their respective properties.

(e) At the Closing Date the Representative shall have received a certificate, dated as of the Closing Date, signed by the President or a Vice-President and the Treasurer or the Secretary of the Company, to the effect that (i) no stop order has been issued under the Securities Act and no proceedings therefor have been instituted by the Commission, (ii) the orders of the Commission and of the State Corporation Commission of the State of Kansas permitting the issuance and sale of the Bonds and the Stock are still in full force and effect, (iii) since the respective dates as of which information is given in the Registration Statement and Prospectus, there has not been any substantial adverse change in the condition, financial or otherwise, of the Company or its subsidiary, except such as shall have occurred by reason of transactions in the ordinary and regular conduct of business, and (iv) since such dates, except as set forth in the Registration Statement, there has not been any material transaction entered into by the Company, other than transactions in the ordinary course of business and the payment of dividends on the stock of the Company.

(f) All legal proceedings to be taken in connection with the issuance and sale of the Bonds and Stock shall be satisfactory in form and substance to Messrs. Chadbourne, Hunt, Jaeckel & Brown, acting on behalf of the several Purchasers for the purposes of this Purchase Agreement.

In case any of the conditions specified above in this paragraph 7 shall not have been fulfilled, this Purchase Agreement may be terminated by the Representative with the consent of Purchasers which have agreed to purchase in the aggregate fifty per cent or more of the aggregate principal amount of the Bonds and par value of the Stock agreed to be purchased hereunder, upon mailing or delivering written notice thereof to the Company. Any such termination shall be without liability of any party to any other party except as otherwise provided in paragraph 5 and in subparagraph (e) of paragraph 6 hereof.

8. Conditions of the Company's Obligations. The obligations of the Company to deliver the Bonds and the

Stock shall be subject to the following conditions:

(a) The Post-Effective Amendment shall have become effective prior to 7 o'clock P. M. (Eastern Standard Time) on February 4, 1942, or such other time and date, not later than 7 o'clock P. M. (Eastern Standard Time) on the seventh day thereafter, as may be approved by the Company, and no stop order shall have been issued under the Securities Act or proceedings therefor instituted by the Commission prior to the Closing Date.

(b) Prior to 7 o'clock P. M. (Eastern Standard Time) on February 4, 1942, or such other time and date, not later than 7 o'clock P. M. (Eastern Standard Time) on the seventh day thereafter, as may be approved by the Company, there shall have been issued, and on the Closing Date there shall be in full force and effect, orders of the Commission and of the State Corporation Commission of Kansas permitting the issuance and sale of the Bonds and the Stock and the transactions related thereto on the terms and conditions herein set forth or contemplated and containing no provision unacceptable to the Company.

(c) The Indenture shall have become and be qualified under the Trust Indenture Act of 1939.

In case any of the conditions specified above in this paragraph 8 shall not have been fulfilled, this Purchase Agreement may be terminated by the Company, upon mailing or delivering written notice thereof to the Representative. Any such termination shall be without liability of any party to any other party except as otherwise provided in paragraph 5 and in subparagraph (c) of paragraph 6 hereof.

9. Indemnification. (a) The Company agrees to indemnify and hold harmless each Purchaser and each person, if any, who controls any Purchaser within the meaning of Section 15 of the Securities Act, from and against [fol. 15295] any and all losses, claims, damages or liabilities, joint or several, to which such Purchaser or such controlling person may become subject under the Securities Act, or the common law, or otherwise (and will reimburse each such Purchaser and controlling person for any reasonable legal or other expenses incurred by it or

them in connection with defending against any such losses, claims, damages or liabilities unless the Company designates counsel, with the approval of such Purchaser or controlling person, which approval shall not be unreasonably withheld, to conduct the defense of such action at its own expense as hereinafter provided) arising out of or based upon (i) any untrue statement or alleged untrue statement of a material fact contained in the Registration Statement or any post-effective amendments thereto, or the omission or alleged omission to state therein a material fact required to be stated therein or necessary to make the statements therein not misleading, or (ii) any untrue statement or alleged untrue statement of a material fact contained in the Prospectus (or the Prospectus as amended or supplemented, if such losses, claims, damages or liabilities arise out of or are based upon the use of the Prospectus or the Prospectus as amended or supplemented after the Company shall have amended or supplemented the Prospectus), or the omission or alleged omission to state therein a material fact necessary in order to make the statements therein, in the light of the circumstances under which they were made, not misleading; provided, however, that in no case shall the Company be liable under the indemnity agreement contained in this paragraph unless such Purchaser or controlling person, within ten days after a summons or other legal process shall have been served upon it, shall notify the Company in writing of such service and shall have afforded the Company an opportunity to appoint counsel to conduct the defense of such suit in association with such other counsel, if any, as such Purchaser or controlling person may choose to select, the fees and expenses of such other counsel, if any, to be paid in such case by such Purchaser or controlling person; and, provided, further, that the indemnity agreement contained in this paragraph shall not apply to any such losses, claims, damages or liabilities arising out of or based upon any such untrue statement or alleged untrue statement, or any such omission or alleged omission, if such statement or omission was made in reliance upon and in conformity with information furnished herein or in writing to the Company by or on behalf of any Purchaser for use in connection with the preparation of the Registration Statement or the Pros-

pectus or any amendment or supplement to either thereof, or arising out of or based upon statements in or omissions from that part of the Registration Statement which shall constitute the Statements of Eligibility and Qualification under the Trust Indenture Act of 1939 (Forms T-1 and T-2) of the Trustees under the Indenture. The failure to notify the Company, as hereinabove provided, of any such action shall not relieve it from any liability which it may have to the person against whom such action is brought by reason of any such statement or omission, otherwise than on account of the indemnify agreement contained in this paragraph. The indemnity agreement of the Company contained in this paragraph and the representations and warranties of the Company contained in paragraph 3 hereof shall remain operative and in full force and effect, regardless of any investigation made by or on behalf of any Purchaser or any such controlling person, and shall survive the delivery of any payment for the Bonds and the Stock. The Company agrees promptly to notify the Representative of the commencement of any litigation or proceedings against the Company or any of its officers or directors in connection with the issuance and sale of the Bonds and the Stock.

(b) Each Purchaser severally agrees to indemnify and hold harmless the Company and each other Purchaser and each person, if any, who controls any such Purchaser within the meaning of Section 15 of the Securities Act, from and against any and all losses, claims, damages or liabilities, joint or several, to which the Company or the other Purchasers and any other persons controlling any of them, or any one or more of them, may become subject under the Securities Act, or the common law, or otherwise (and will reimburse the Company, and the other Purchasers and each person controlling any of them, and each of them, for any reasonable legal or other expenses incurred by it or them, or any of them, in connection with defending against any such losses, claims, damages or liabilities, unless such Purchaser designates counsel, with the approval of the Company, which approval shall not be unreasonably withheld, to conduct the defense of such action at its own expense as hereinafter provided) arising out of or based upon (i) any untrue statement or alleged

untrue statement of a material fact contained in the Registration Statement or any post-effective amendments thereto, or the omission or alleged omission to state [fol. 15296] therein a material fact required to be stated therein or necessary to make the statements therein not misleading, or (ii) any untrue statement or alleged untrue statement of a material fact contained in the Prospectus (or the Prospectus as amended or supplemented, if such losses, claims, damages or liabilities arise out of or are based upon the use of the Prospectus or the Prospectus as amended or supplemented after the Company shall have amended or supplemented the Prospectus), or the omission or alleged omission to state therein a material fact necessary in order to make the statements therein, in the light of the circumstances under which they were made, not misleading, if such statement or omission was made in reliance upon and in conformity with information furnished herein or in writing to the Company by or on behalf of such Purchaser for use in connection with the preparation of the Registration Statement or the Prospectus or any amendment or supplement to either thereof, or resulted from any action or alleged action by such Purchaser contrary to information furnished to the Company by such Purchaser or the Representative as to discounts or concessions allowed to any dealer or any other person or classes of persons; provided, however, that in no case shall any Purchaser be liable under this paragraph to the Company or to any other Purchaser unless the Company or such one or more of the other Purchasers, within ten days after a summons or other legal process shall have been served upon the Company or such one or more of the other Purchasers, shall notify such Purchaser in writing of such service and shall have afforded such Purchaser an opportunity to appoint counsel to conduct the defense of such suit in association with such other counsel, if any, as the Company or such one or more of the other Purchasers may choose to select, the fees and expenses of such other counsel, if any, to be paid in such case by the Company or such one or more of the other Purchasers. The failure to notify any Purchaser, as hereinabove provided, of any such action shall not relieve such Purchaser from any liability which it may have to the Company or to any one or more of the other Purchasers

by reason of any such statement, omission, or action otherwise than on account of the indemnity agreement contained in this paragraph. The indemnity agreement of each Purchaser contained in this paragraph shall remain operative and in full force and effect, regardless of any investigation made by or on behalf of the Company or any other Purchaser or any such controlling person, and shall survive the delivery of and payment for the Bonds and Stock. Each Purchaser agrees promptly to notify the Company of the commencement of any litigation or proceedings against it in connection with the issuance and sale of the Bonds and the Stock.

10. Termination. This Purchase Agreement may be terminated at any time prior to the expiration of twenty-four hours after the Post-Effective Amendment shall become effective (but not after the initial public offering of the Bonds and Stock purchased hereunder, if the Purchasers shall make a public offering thereof), by the Representative with the consent of Purchasers which have agreed to purchase in the aggregate fifty per cent or more of the aggregate principal amount of the Bonds and of the par value of the Stock agreed to be purchased hereunder, if the market value of securities in general or political, financial or economic conditions shall have so materially changed after 12 noon, Eastern Standard Time, on the date of this Purchase Agreement and within the time set forth above as, in the judgment of the Representative, to render it either inadvisable to make a public offering (if contemplated) or inadvisable to proceed with the delivery of the Bonds and Stock agreed to be purchased hereunder. This Purchase Agreement may be terminated by the Representative, with like consent, at any time prior to the Closing Date, if the Company shall have sustained a substantial loss by fire, flood, accident or other calamity, which, in the judgment of the Representative, shall render it inadvisable to proceed with the delivery of the Bonds and Stock agreed to be purchased hereunder, whether or not said loss shall have been insured, and the Company agrees to notify the Representative promptly of any such loss. Any termination of this Purchase Agreement pursuant to this paragraph 10 shall be without liability of any party to any other party except

as otherwise provided in paragraph 5 and in sub-paragraph (c) of paragraph 6 hereof. The time of the "initial public offering", for the purposes of this paragraph 10, shall mean the time of the release by the Representative for publication of the first newspaper advertisement which is subsequently published relating to the Bonds and the Stock, or the time of the release by the Representative for delivery to members of a selling group of copies of the Prospectus and signed copies of an offering letter or an offering telegram to such selling group members relating to the Bonds and the Stock, whichever shall first occur.

[fol. 15297] If the Representative elects to terminate this agreement, as provided in this paragraph 10, the Company and each other Purchaser shall be notified promptly by telephone or telegram, confirmed by letter.

11 Substitution of Purchasers. If for any reason any one or more of the Purchasers shall fail or refuse to purchase and pay for the principal amount of Bonds and number of shares of Stock set forth opposite its or their names in paragraph 13 hereof, upon tender at the Closing Date of such Bonds and Stock (subject to the provisions of paragraph 14 hereof) in accordance with the terms hereof, the Company shall immediately notify the remaining Purchasers, who may within twenty-four hours of receipt of such notice agree to purchase or procure some other responsible party or parties satisfactory to the Company to agree to purchase such Bonds and Stock on the terms herein set forth; and if the remaining Purchasers shall not agree to purchase and shall not procure a satisfactory party or parties to agree to purchase such Bonds and Stock, within twenty four hours after the receipt of such notice, then the Company shall be entitled to an additional period of twenty-four hours within which to procure another party or parties to agree to purchase such Bonds and Stock on the terms herein set forth. In any such case, either the Representative or the Company shall have the right to postpone the Closing Date not more than seven business days from the date determined as provided in paragraph 4 hereof, in order that the necessary changes in the Registration Statement and Prospectus and any other documents and arrangements may be effected. If the remaining Purchasers shall not agree to purchase and shall not procure a satisfactory party or par-

lies to agree to purchase such Bonds and Stock, and if the Company also shall not procure another party or parties to agree to purchase such Bonds and Stock within the aforesaid periods, then this Purchase Agreement shall terminate without any liability on the part of the Company (except as otherwise provided in paragraph 5 and in subparagraph (c) of paragraph 6 hereof) or any Purchaser (other than a Purchaser who shall have failed or refused, otherwise than for some reason sufficient to justify in accordance with the terms hereof the cancellation or termination of its obligations hereunder, to purchase and pay for the Bonds and Stock which such Purchaser has agreed to purchase as provided in paragraph 13 hereof).

12. Miscellaneous. This Purchase Agreement shall inure to the benefit of the Company, the several Purchasers, each controlling person referred to in paragraph 9 hereof, and their respective successors and assigns. Nothing in this Purchase Agreement is intended or shall be construed to give to any other person, firm or corporation any legal or equitable right, remedy or claim under or in respect of this Purchase Agreement or any provision herein contained. The term "successors and assigns" as used in this Purchase Agreement shall not include any purchaser, as such, purchaser, of any of the Bonds or Stock from any of the several Purchasers.

13. Purchase, Sale and Delivery. On the basis of the representations and warranties herein contained, but subject to the terms and conditions in this Purchase Agreement set forth, the Company agrees to sell to each of the several Purchasers named below, and each such Purchaser agrees, severally and not jointly, to purchase from the Company (a) the principal amount of Bonds set forth below after the name of such Purchaser, at 100.02% of the principal amount thereof plus accrued interest thereon from January 1, 1942, to the date of delivery; and (b) the number of shares of Stock set forth below after the name of such Purchaser (subject to the provisions of paragraph 14 hereof), at $100.2789 per share plus accrued dividends thereon from January 1, 1942 to the date of delivery:

Exhibits:		
1, Statement of operating Results of Panhandle Eastern Pipe Line Company and Michigan Gas Transmission Company, 1938-1940	10775	4012
Operating Results	10775	4012
Cost, and Cost Less Reserves, of Plant and Operating Results as of December 31, 1938	10777	4013
Cost, and Cost Less Reserves, of Plant and Operating Results as of December 31, 1939	10778	4014
Cost, and Cost Less Reserves, of Plant and Operating Results as of December 31, 1940	10779	4015
Working Capital Estimate, December 31, 1938-39-40	10780	4016
Working Capital Estimate Approximate Payroll Basis, December 31, 1940	10782	4017
2, Determination of possible Revenue Reduction of Panhandle Eastern Pipe Line Company and Michigan Gas Transmission Company	10783	4018
3, Excerpts from Registration Statement of Panhandle Eastern Pipe Line Company filed with the Securities & Exchange Commission, February 12, 1937, with respect to Gas Reserves	10785	4019

	Original	Print
4, Excerpt from Registration Statement of Panhandle Eastern Pipe Line Company filed with the Securities & Exchange Commission, November 13, 1940, with respect to Gas Reserves	10786	4021
5, Excerpts from Registration Statement of Panhandle Eastern Pipe Line Company filed with the Securities & Exchange Commission, November 13, 1940, with respect to Design, Construction and Maintenance of Property	10789	4025
6, Statement of Operating Expenses and Taxes at 100% Load Factor Operation	10791	4029
7, Statement as to necessary Price per M. C. F. at 100% Load Factor	10793	4030
8, Statement of estimated Effect of 100% Load Factor on earning Power of System	10795	4030
9, Statement of Factor affecting the Nature and Magnitude of reported Net Incomes	10796	4031
10, Statement showing Effect of Variation in accounting Practices on Reported Incomes of an Enterprise	10799	4034
11, Chart showing Relation of Yield of United States Treasury Bonds and Notes	10800	4035
12, Statement showing United States Treasury Bond Yields	10801	4037
13, Chart showing History of Yields of United States Bonds, 1920–1939	10806	4045
14, Average Yield of United States Treasury Bond	10807	4047
14-A, Securities & Exchange Commission Releases Nos. 2778 and 2834 — Findings and Opinion of the Commission in the Matters of Panhandle Eastern Pipe Line Company, et al	10808	4047

Index, Volume IX.

Order of Securities & Exchange Commission Denying Applications in Part and granting Applications in Part	10842	4087
Supplemental Order of Securities & Exchange Commission amending Findings and Opinion	10844	4089
17, Miscellaneous Data concerning Property and Operations of Panhandle Eastern Pipe Line Company	10848	4090
Schedule 1, Panhandle Eastern Pipe Line Company System Compressor Stations	10848	4090
Schedule 2, List of Communities receiving Service directly or indirectly from Panhandle Company including Population and Number of Customers as of June 30, 1941	10849	4091
Schedule 3, List of Industrial Customers receiving Service direct from Panhandle Company System, June 30, 1941	10853	4099
Schedule 11, Panhandle Eastern System Summary — Miles of Pipe by Sizes, June 30, 1941	10926	4101
39, Testimony of Rufus M. Smith	10938	4103
Schedule 2, Estimated Original Gas Content in the Texas Panhandle Field under Acreage constituting Reserves of Panhandle Eastern Pipe Line Company as of July 1, 1941	10986	4125

	Original	Print
Schedule 3, Estimated Remaining Gas Content in the Texas Panhandle Field under Acreage constituting Reserves of Panhandle Eastern Pipe Line Company as of July 1, 1941	10987	4125
Schedule 5, Comparison of Open Flow Potentials in Texas Panhandle Gas Field	10990	4129
Schedule 6, Gas Acreage owned and under Gas Purchase Contracts held by Panhandle Eastern Pipe Line Company as of June 30, 1941	10991	4131
Schedule 7, Hugoton Production to Argus Natural Gas Company, Inc. by Panhandle Eastern Pipe Line Company, et al	10992	4133
Schedule 8, Texas Production to Panhandle Eastern Pipe Line Company	10993	4135
Schedule 9, Hugoton Production to Panhandle Eastern Pipe Line Company	10997	4143
Schedule 10, Hugoton Production to Panhandle Eastern Pipe Line Company	11000	4149
Schedule 11, Analysis of Cumulative Production to Main Line to and including Fiscal Month of June 1941	11003	4155
Schedule 12, Comparative Statement of Production and Purchases from each District for the two Years ended June 22, 1940 and June 22, 1941	11004	4157
36, Testimony of Glenn G. Bartle	11010	4159
Schedule 3, Estimated Original Gas Content in the Hugoton Field, (Kansas, Oklahoma and North Texas Panhandle), under Acreage constituting Reserves of Panhandle Eastern Pipe Line Company as of July 1, 1941	11038	4176
Schedule 4, Estimated unmetered Gas from Panhandle Eastern Pipe Line Company Wells in the Hugoton Field Kansas, connected to Argus Natural Gas Company, Inc. as of July 1, 1941	11041	4181
37, Testimony and Exhibits, Market Value of Leases of Panhandle Eastern Pipe Line Co.	11047	4187
R. J. Wallace	11047	4187
Summary of Market Value of Leases	11064	4199
38, Basic Statistics used in calculating Interest, ad valorem Taxes and operating Expense attributable to unused Capacity	12159	4205
39, Reproduction Cost New of Plant, Property and Business of Panhandle Eastern Pipe Line Company and subsidiary Companies as of June 30, 1941	12162	4206
Letter P. McDonald Biddison, Consulting Engineer, to Panhandle Eastern Pipe Line Company, August 29, 1941	12163	4206
Statement relating to Reproduction Cost—New—June 30, 1941	12164	4207
Summary	12165	4207
39-A, Reproduction Cost New of Plant, Property and Business of Panhandle Eastern Pipe Line Company and subsidiary Companies as of June 30, 1941	13130	4208
Letter P. McDonald Biddison, Consulting Engineer, to Panhandle Eastern Pipe Line Company, August 29, 1941	13130	4208

	Original	Print
Statement relating to Reproduction Cost New—June 30, 1941	13131	4209
Summary:	13133	4209
40, Table showing estimated Main Line Sales, years 1941-1946, inclusive	13149	4211
41, Graph showing Sales and Gas Plant by Years, Panhandle Eastern Pipe Line Company and Subsidiary Companies	13150	4213
42, Testimony of C. H. Hinton relating to Future Capital Expenditures and Operating Expenses in Production and Gathering System West and South of Liberal, Kansas	13151	4215
43, Schedules presented in connection with the written Testimony of C. H. Hinton	13193	4244
Schedule 1, Additional Capital Expenditures required to produce and gather Basic Load, or Present Requirements	13194	4244
Schedule 2, Additional Capital Expenditures required to produce and gather Anticipated Increased Load	13195	4244
Schedule 3, Estimate of Operation and Maintenance Costs west of Liberal Panhandle Field — Basic Load	13196	4245
Schedule 4, Estimate of Operation and Maintenance Costs — west of Liberal Panhandle Field — Estimated Future Load	13199	4251
Schedule 5, Probable Production from Panhandle Eastern's own Wells and Wells under Gas Contracts (Panhandle Field) during the Period July 1, 1940 to December 31, 1956	13202	4257
47, Panhandle Eastern Pipe Line Company and Subsidiary Companies, future Capital Requirements, Gas Transmission Facilities, Liberal Station and Eastward	13206	4257
48, Statement showing Balance Sheets per Books Panhandle Eastern Pipe Line Company and Subsidiary Companies, as at each December 31, 1930 through 1940 and as at June 30, 1941	13207	4259
49, Income Statement per Books — Period from April 1, 1932 to December 31, 1941	13210	4265
50, Statement showing Earned Surplus per Books, Period from Commencement of Operations to June 30, 1941	13212	4269
51, Statement showing Capital Surplus per Books, Period from September 1, 1930 to June 30, 1941	13214	4273
52, Statement showing Investment in Gas Plant as at each December 31, 1930 through 1940 and as at June 30, 1941	13215	4275
53, Statement of Dividends paid on Class A and Class B Preferred Stocks from beginning to September 1, 1941	13217	4279
54, Statement of Dividends paid on Common Stock from beginning to September 1, 1941	13219	4280
55, Statement showing Comparison of Sales and Revenue, Principal Industrial Customers, years 1939, 1940 and 1941	13220	4281
55 A, Statement showing Comparison of Sales and Revenue, Principal Industrial Customers, years 1939, 1940, and 1941	13221	4283
56, Statement of Gas Produced, Period from April 1, 1932 to June 30, 1941	13222	4284
57, Statement of Gas Purchased, Period from April 1, 1932 to June 30, 1941	13223	4285

	Original	Print
58, Statement of Gas Revenue, Period from April 1, 1932 to June 30, 1941 and Schedule showing Detail of Sales to various Types of Customers, 1939 and 1940	13224	4287
Schedule 1, Statement of Gas Revenue, Period from April 1, 1932 to June 30, 1941	13224	4287
Schedule 2, Detail of Sales to Gas Utilities, years 1939 and 1940	13225	4289
Schedule 3, Detail of Sales to Industrial Customers, years 1939 and 1940	13227	4293
59, Statement of Gas Revenue by States, Period from April 1, 1932 to December 31, 1941	13229	4297
60, Statement showing Sales Agreements with other Gas Companies as at June 30, 1941	13230	4299
61, Study of Current and Future Trends in Commodity Prices and Wages, by David Friday	13238	4310
Graph showing Wholesale Prices from 1800 to 1940	13239	4311
Index Numbers of Wholesale Prices of Commodities by Groups	13241	4313
Commodity Price Indexes of Ten Countries	13247	4318
Statement relating to Tax Collections in the United States, from 1913 to 1942	13258	4328
Index Numbers of Wholesale Prices of all Commodities by Months, from 1890 to 1940	13263	4333
Statement relating to Wholesale Prices for Week Ended September 20, 1941	13264	4335
Graph relating to Average Weekly Earnings in Manufacturing Industries of New York State from 1914 to 1941	13266	4339
Graph relating to Average Hourly Earnings and Average Actual Hours per Week per Worker in twenty-five Manufacturing Industries from 1914 to 1941	13267	4341
Graph relating to Average Cost of Living from 1935 to 1939	13268	4343
62, Deduction from Cost of Reproduction New for Depreciation and Present Value of Plant, Property and Business as of June 30, 1941	13270	4345
Letter from P. McDonald Biddison, Consulting Engineer, to Panhandle Eastern Pipe Line Company, September 30, 1941	13271	4345
General Summary	13272	4347
63, Investors' Appraisal of the Risk of Capital in the Natural Gas Industry as compared with other Divisions of the Utility Industry, Summary of Analyses, prepared by Paul B. Coffman, Vice-President of Standard and Poors Corporation	13321	4349
Table of Contents.	13322	4349
Statement of Experience and Qualifications of Paul B. Coffman	13327	4354
Investors' Appraisal of Capital Risks in Various Divisions of the Utility Industry	13348	4371
Statement A, Investors' Appraisal of Risks of Capital for the years 1937, 1938, 1939 and 1940	13351	4373

	Original	Print
Statement A-1, Investors' Appraisal of Risks of Capital for the Interim Periods of 1941, January-August, Both Inclusive	13352	4375
Statement B, Investors' Appraisal of Risks of Capital for the years 1937, 1938, 1939 and 1940	13353	4377
Statement B-1, Investors' Appraisal of Risks of Capital for the Interim Period of 1941, January-August, Both Inclusive	13354	4379
Statement C, Investors' Appraisal of Risks of Capital for the years 1937, 1938, 1939 and 1940	13355	4381
Statement C-1, Investors' Appraisal of Risks of Capital for the Interim Period of 1941, January-August, Both Inclusive	13356	4383
Statement D, Investors' Appraisal of Risks of Capital for the years 1937, 1938, 1939 and 1940	13357	4385
Statement D-1, Investors' Appraisal of Risks of Capital for the Interim Period of 1941 January-August, Both Inclusive	13358	4387
Statement E, Investors' Appraisal of Risks of Capital for the years 1937, 1938, 1939 and 1940	13359	4389
Statement E-1, Investors' Appraisal of Risks of Capital for the Interim Period of 1941, January-August, Both Inclusive	13360	4391
Statement F, General Information Covering each Company as to the Nature and Size of the Business and the Territory served	13361	4393
64, Statistics supporting Data, Exhibit 63, Appendixes A, B, and C	13379	4414
Appendix A, Complete List of Companies studied and Reasons for eliminating those not used to determine Investors' Appraisal of Risks of Capital	13380	4414
Appendix B, Securities of forty-three Natural Gas Companies considered Representative of the Industry, etc.	13387	4426

Index, Volume X.

Appendix C, Working Papers showing the Computation of Investors' Appraisal of the Risks of Capital	13398	4446
Water Companies	13399	4447
Electric Operating Utility Companies	13420	4461
Manufactured and Mixed Gas Companies	13465	4501
Natural Gas Companies	13495	4521
65, Study relative to Rate of Return on Panhandle Eastern Pipe Line Company prepared by Paul B. Coffman, Vice President, Standard and Poors Corporation	13533	4547
Table of Contents	13534	4547
Chart No. 1, Main Transmission System of Panhandle Eastern Pipe Line Co. and Subsidiary	13542	4559
Chart No. 2, Growth of Natural Gas Industry in United States of America from 1906 to 1940	13548	4567
Chart No. 3, Consumption of Natural Gas in United States of America from 1919 to 1940	13550	4571
Chart No. 4, Revenue from Natural Gas Consumed in United States of America from 1919 to 1940	13552	4573

	Original	Print
Chart No. 5, Average Revenue per M. C. F. from 1929 to 1940	13554	4575
Chart No. 6, Panhandle Sales by States, vs. Industry Consumption of Natural Gas from 1934 to 1940	13556	4577
Chart No. 7, Trends of Gross Revenue from 1934 to 1940, Panhandle vs. other Pipe Line Companies and Industry	13558	4579
Chart No. 8, Operating Ratio of Panhandle Compared with other Pipe Line Companies from 1934 to 1940	13560	4581
Chart No. 9, Trend of Revenue and Expenses of Panhandle Eastern Pipe Line Company from 1934 to 1940	13562	4583
Chart No. 10, Percent Earned on Invested Capital of Panhandle Based upon Capital Structure	13564	4585
Chart No. 11, Percent Earned on Invested Capital of Panhandle Based upon Net Property, Intangibles and Working Capital	13566	4587
Chart No. 12, Return to Common Stockholders of Panhandle Eastern Pipe Line Company from 1934 to 1940	13568	4589
Chart No. 13, New Tax Bill will reduce Income sharply Computations based on Operations — Twelve Months ended June 30, 1941	13570	4591
Chart No. 14, Percent Earned on Invested Capital of Panhandle Eastern Pipe Line Company — as of June 30, 1941	13572	4593
Chart No. 15, Percent Earned on Invested Capital of Panhandle Eastern Pipe Line Company — as of June 30, 1941	13574	4595
Chart No. 16, Historical Costs of Debt Capital of Panhandle Eastern Pipe Line Company — from 1930 to 1941	13576	4599
Chart No. 17, Effect of 1941 Refinancing of Panhandle Eastern Pipe Line Company	13578	4603
Chart No. 18, Historical Costs of Preferred Stock Capital of Panhandle Eastern Pipe Line Company from 1937 to 1941	13580	4605
Chart No. 19, Earnings — Price Ratios of Natural Gas Pipe Line Common Stocks from 1937 to 1940	13582	4607
Chart No. 20, Current Earnings — Price Ratios of Natural Gas Pipe Line Common Stocks	13584	4609
Chart No. 21, Cost of Financing Northern Natural Gas Company Common Stock — Offered to Public on September 10, 1941	13586	4613
Chart No. 22, Estimated Current Cost of Financing Common Stock of Panhandle Eastern Pipe Line Company	13588	4615
Chart No. 23, Continuing Growth of Panhandle System Indicates Future Needs for New Capital	13590	4617
Chart No. 24, Panhandle Eastern Pipe Line Company Invested Capital as of June 30, 1941	13592	4621
Chart No. 25, Preferred Stock Unusual in Natural Gas Pipe Line Companies	13594	4623
Chart No. 26, Earnings Necessary to Maintain Credit Position of Panhandle Eastern Pipe Line Company	13596	4625
Chart No. 27, Earnings Necessary to Maintain Credit Position of Panhandle Eastern Pipe Line Company	13598	4627
Chart No. 28, Overall Cost of Capital to Panhandle Eastern Based on Ideal Capital Structure	13600	4629

71, Valuation of Property, Plant and Equipment, September 30, 1938	13712	4719
Letter from P. McDonald Biddison, Consulting Engineer, to Panhandle Eastern Pipe Line Company, October 14, 1938	13713	4719

	Original	Print
Statement relating to Appraisal of Property of Panhandle Eastern Pipe Line Company as of September 30, 1938	13719	4721
72, Statement of Net Additions to Gas Plant per Books from October 1, 1938 to June 30, 1941	14178	4723
74, Working Capital	14198	4724
Table I, Total Additional Necessary Materials and Supplies by Departments	14198	4724
Table II, Additional Necessary Materials and Supplies by Departments, Classified to show the Aggregate Supplies	14199	4724
Table III, Summary of Minimum Reasonable Amounts of Working Capital Currently Needed	14200	4725
Table IV, Total Cash, Prepayments, and Materials and Supplies Actually Maintained by the Company at Certain Dates in the Past	14201	4725
75, Natural Gas Supply, Value of Gas Reserves and Wells, February 1, 1937	14202	4726
Letter Ralph E. Davis, Inc., Engineers, to Panhandle Eastern Pipe Line Company and others, February 10, 1937	14203	4726
Table No. 2, Valuation of Producing and Proven Leases in Producing Area of Amarillo Field	14227	4744
Table No. 3, Valuation of Producing and Proven Leases in Producing Area of Hugoton Field	14228	4745
Table No. 8, Classification of Acreage Under Lease, February 1, 1937	14233	4745
76, Panhandle Eastern Pipe Line Company Natural Gas Supply	14243	4746
Letter, Ralph E. Davis, Inc., Engineers, to Board of Directors of Panhandle Eastern Pipe Line Company, November 12, 1940	14244	4746
Summary of Acreage in Amarillo and Hugoton Fields	14248	4751
77, Description of Physical Property of Michigan Gas Transmission Corporation	14251	4753
Testimony of George S. Young	14252	4753
Schedule 1, Compressor Stations	14272	4770
Schedule 2, List of Communities receiving Service from Public Utilities to whom Michigan Gas Transmission Corporation sells Gas Purchased from Panhandle Eastern Pipe Line Company, Population and Number of Customers as of June 30, 1941	14274	4771
Schedule 3, List of Industrial Consumers receiving Service on an Interruptible Basis indirectly from Michigan Gas Transmission Corporation System, June 30, 1941	14277	4779
Schedule 8, Michigan Gas Transmission Corporation Summary of Miles of Pipe by Sizes, June 30, 1941	14295	4781
79, Comparison of Daily provided Capacity to deliver Firm Gas with Maximum Daily Delivery of Firm Gas from System of Michigan Gas Transmission Corporation	14311	4783
79 A, Comparison of Daily provided Capacity to Deliver Firm Gas with Maximum Daily Delivery of Firm Gas and total delivery of Gas from the Pipe Lines owned or operated by Michigan Gas Transmission Corporation for the Winter Period of 1941-1942 to February 27, 1942	14312	4785

	Original	Print
79-B, Total Delivery of Gas from Pipe Lines owned and operated by Michigan Gas Transmission Corporation on Days on which the Delivery of Firm Gas from System was the Maximum	14313	4787
80, Report of Inspection of Equipment in the Compressor Stations of the Michigan Gas Transmission Corporation, by H. C. Lehn	14314	4789
81, Depreciation Study, Michigan Gas Transmission Corporation by H. S. Riddle	14321	4794
Letter, H. S. Riddle, Gas Engineering Department, to G. S. Young, Vice President, of Michigan Gas Transmission Corporation, November 10, 1941	14322	4794
Summary of Inspection Data	14323	4795
82, Accrued Depreciation on Compressor Station Structure, measuring and regulating Station Structures and Equipment and other Transmission Structures and general Equipment as of June 30, 1941 by Francis S. Haberly	14369	4796
83, Reproduction Cost new of Plant and Property of Michigan Gas Transmission Corporation as of June 30, 1941 by Francis S. Haberly	14375	4801
Letter Francis S. Haberly, Engineer, to G. S. Young, Vice President, Michigan Gas Transmission Corporation, October 27, 1941	14377	4801
Table of Contents	14378	4802
Statement of Francis S. Haberly	14379	4802
Summary	14389	4810
Reconciliation of Original Cost and of Reproduction Cost to reflect Changes due to Reclassification	14390	4811
Compressor Station Structures and Improvements	14391	4813
All Stations	14391	4813
Montezuma Compressor Station	14392	4813
Zionsville Compressor Station	14398	4818
Edgerton Compressor Station	14402	4821
Other Transmission System Structures and Improvements	14405	4824
All Locations	14405	4824
Montezuma Compressor Station	14406	4824
Zionsville Compressor Station	14407	4825
Edgerton Compressor Station	14408	4826
Mains	14409	4826
Compressor Station Equipment	14416	4831
All Stations	14416	4831
Montezuma Compressor Station	14417	4831
Zionsville Compressor Station	14427	4839
Edgerton Compressor Station	14433	4841
Measuring and Regulating Station Equipment	14437	4847
General Equipment	14438	4848
Office Furniture and Fixtures	14439	4848
Transportation Equipment	14440	4849
Stores Equipment	14441	4849
Tools and Work Equipment	14442	4849
84, Reproduction Cost new less Depreciation of Michigan Gas Transmission Corporation as of June 30, 1941 by Francis S. Haberly	14443	4850

	Original	Print
Summary	14444	4850
Compressor Station Structures and Improvements	14445	4851
Measuring and Regulating Station Structures	14446	4852
Other Transmission System Structures	14447	4852

Index, Volume XI.

Mains	14448	4853
Compressor Station Equipment	14449	4853
Measuring and Regulating Station Equipment	14450	4854
General Equipment	14451	4855
87, Materials and Supplies Restatement of Cost of Major Items as of June 30, 1941, Michigan Gas Transmission Corporation by Francis S. Haberly	14466	4856
Materials and Supplies	14467	4856
88, Michigan Gas Transmission Corporation — Comparative Balance Sheets, per Books as at December 31, 1936 to 1940, Inclusive, and June 30, 1941	14475	4863
89, Michigan Gas Transmission Corporation Statement showing earned Surplus per Books for the Ten Months ended December 31, 1936, years 1937 to 1940, inclusive, year and six months ended June 30, 1941	14477	4867
90, Michigan Gas Transmission Corporation — Statement showing Capital Surplus, per books, for the Ten Months ended December 31, 1936, years 1937 to 1940, inclusive, year and six months ended June 30, 1941	14478	4869
91, Michigan Gas Transmission Corporation — Preliminary Report on Original Cost Studies by Central Service Corporation	14479	4871
Statement A, Outline of Origin and Development	14489	4878
Statement A-1, Common Stock issued and Outstanding at January 1, 1940 and June 30, 1941	14492	4881
Statement B, Statement showing Acquisition by Reporting Company or Predecessors of Gas Operating Unit or System, etc.	14493	4883
Statement D, Statement relating to Gas Plant as of January 1, 1940, etc.	14494	4885
Statement E, Statement showing Summary of Adjustment relating to Gas Plant, etc.	14495	4886
Statement F, Statement relating to Gas Plant as of January 1, 1940, etc.	14496	4887
Statement G, Statement relating to Balance Sheet as of January 1, 1940, etc.	14498	4891
Statement H, Statement relating to Suggested Plan for Depreciation, etc.	14499	4893
Statement I, Statistical Information Relative to Gas Plant at June 30, 1941	14500	4893
92, Michigan Gas Transmission Corporation Statement showing Original Cost Depreciated to present Conditions as at June 30, 1941 and observed Depreciation as at June 30, 1941	14507	4903

	Original	Print
93, Michigan Gas Transmission Corporation — Statement of Contributions made to Customers for Business Development for the years 1936, 1937 and five months ended May 31, 1938	14508	4905
94, Michigan Gas Transmission Corporation Statement showing working Capital as of June 30, 1941	14510	4908
95, Michigan Gas Transmission Corporation — Estimated Cost of Completing work in Progress at June 30, 1941 and Estimated Gross Income to be derived from the Completed Projects	14517	4919
97, Michigan Gas Transmission Corporation — Variation in Purchase Power of Dollar as Related to Gas Plant	14519	4921
Graph relating to Variation in Purchasing Power of the Dollar spent for Main Compressor Units	14522	4923
Graph relating to Variation in Purchasing Power of the Dollar spent for Steel Pipe	14523	4925
Graph relating to Variation in Purchasing Power of the Dollar spent for Station Structure Materials	14524	4927
Graph relating to Variation in Purchasing Power of the Dollar spent for Station Structure Labor	14525	4929
Graph relating to Variation in Purchasing Power of the Dollar spent for Station Equipment Labor	14526	4931
Graph relating to Variation in Purchasing Power of the Dollar spent for Mains Installations	14527	4933
Statement relating to Variation in Purchasing Power of the Dollar as related to "Gas Plant"	14528	4935
99, Michigan Gas Transmission Corporation — Statement of Income and Expense per books for years ended December 31, 1936 to 1940, inclusive, twelve Months ended June 30, 1941 and six Months ended June 30, 1941 and December 31, 1940	14530	4937
100, Michigan Gas Transmission Corporation — Statement of Income and Expense per books and after Adjustments and redistributions necessary to reflect the 2-6 months Period per books on an annual basis, for six months ended December 31, 1940 and June 30, 1941 and for twelve months ended June 30, 1941	14533	4943
101, Michigan Gas Transmission Corporation — Comparative Statement of Operating Revenues, for years ended December 31, 1936 to 1940, inclusive, twelve months ended June 30, 1941 and six months ended June 30, 1941 and December 31, 1940	14537	4951
102, Michigan Gas Transmission Corporation — Operation and Maintenance Expense per books for the twelve months ended June 30 1941	14538	4953
103, Michigan Gas Transmission Corporation — Statement showing Gas Sales, Gas Transported, Gas used by Company, Line Losses and Gas Purchased for the years ended December 31, 1936 to 1940, inclusive, twelve months ended June 30, 1941 and December 31, 1940	14540	4957
106, Registration Statement of Panhandle Eastern Pipe Line Company No. 2-4597, filed with the Securities & Exchange Commission November 18, 1940, Excerpts from	14548	4959

Y.2 117

[fol. 15299] Delivery of the Bonds and of the Stock (subject to the provisions of paragraph 14 hereof) shall be made to the Representative for the respective accounts of the above named Purchasers, against payment of the purchase price thereof as provided in paragraph 4 hereof.

14. As stated in the answer to Item 21 of the Registration Statement as to be amended by the Post-Effective amendment, the Company will offer a portion of the Stock (not exceeding a maximum of 14,000 shares) for subscription by certain of its Common Stockholders, all as more fully set forth in said Item. If and to the extent such stockholders subscribe for any of such shares pursuant to such offering, then the number of shares of Stock which the Company is obligated to sell the Purchasers hereunder, and the Purchasers are obligated to purchase, shall be correspondingly decreased, the several obligations of the several Purchasers of such Stock to be decreased proportionately (except that the respective number of shares to be purchased by each such Purchaser may be adjusted as among the Purchasers by the Representative to such extent as may be necessary in order to eliminate fractions of a share). The Company will, not later than 4 P. M., Eastern Standard Time, on the date of expiration of such offering to certain of its Common Stockholders, notify the Representative in writing of the number of shares not subscribed for and which are to be purchased by the Purchasers, and delivery of and payment for such unsubscribed Stock shall be made at the office of the Company, 90 Broad Street, New York, New York, at 11 A. M. Eastern Standard Time on the next succeeding full business day. The provisions of paragraph 4 hereof as to the manner of delivery of and payment for Stock, form of stock certificate and manner of registration of stock certificates shall also be applicable to the delivery of such unsubscribed Stock. Default by any Purchaser to take and pay for its proportion of such unsubscribed Stock shall not relieve the Company from its obligation to deliver to the remaining Purchasers, nor relieve such remaining Purchasers from their several obligations to take and pay for, their respective proportions of such unsubscribed Stock.

15. Notices. All communications hereunder shall be in writing and if to the Purchasers shall be mailed or delivered to the Representative, at 38 Wall Street, New York, N. Y., or, if to the Company, shall be mailed or delivered to it at 90 Broad Street, New York, New York.

Please sign and return to us the enclosed duplicate of this letter, whereupon this letter will become a binding agreement between the Company and the several Purchasers, in accordance with its terms.

Very truly yours,

PANHANDLE EASTERN PIPE LINE COMPANY,
By Louis F. Sperry, Treasurer.

The foregoing Purchase Agreement is hereby confirmed and accepted as of the date first above written.

GLORE FORGAN & CO.
KIDDER PEABODY & CO.

Acting on behalf of the several Purchasers named in paragraph 13 thereof, including itself if so named.

Estimated unit rates used in calculating revenues to be received from sale of gas to the Michigan Consolidated Gas Company for t
assumptions:

(1) Michigan Consolidated Gas Company will continue to purchase all of Detroit's requirements under the present two part rate.
(2) Panhandle Eastern will carry the peak loads and Detroit will therefore earn a unit rate corresponding to a poor load factor.
If Detroit should shave its peaks or avail itself of the new so called "28-40" rate the average rate would be less than that us

Estimated unit rates used in calculating revenues to be received from sale of gas to Consumers Power Company are based upon the
Company will shave its peaks through the use of gas produced in Michigan and will therefore earn a rate corresponding to a good load f
If Consumers Power Company should fail to shave its peaks as contemplated the average rate would be considerably higher than the

(1) J. A. Brown's estimates with slight adjustments. On the "Contribution to Max-Day" we could not use his individual Max-Day estimates.

(2) C.H.M.B. and R.A.R.'s estimate - Checks ok with mine.

(4) C.H.M.B. advises this is present use according to M.P.U. Comm. Dept. of Conservation 1940 Report.
I moved the exhaustion of Michigan Gas back 1 year to be conservative.
This sheet grew out of C.H.M.B.'s report to me (W.S. #3)

ESTIMATED RESIDENTIAL, COMMERCIAL AND COMPANY USE - EAST OF DANA
FOR ALL DISTRIBUTORS IN OHIO AND INDIANA
EXCLUDES ALL MICHIGAN SALES

1937	1 939 800
1938	3 133 118
1939	3 979 999
1940	4 779 428
1940-1st 6 Months	2 363 143
	65 825
	2 428 968

1941-1st 6 Months

	1 867 736
	687 720
	95 018
	2 650 474

	Annual MCF	Contr. To Max. Day M. MCF.
1941	5 200 000	21
1942	5 600 000	28
1943	6 000 000	30
1944	6 400 000	32
1945	6 800 000	34
1946	7 200 000	36
1947	7 600 000	38
1948	8 000 000	40
1949	8 400 000	42
1950	8 800 000	44
1951	9 200 000	46

Approximately 100,000 customers represented. Increase is 4 MCF per customer per year, which would be too high but for the fact that there will be new customers. Above estimate is growth of present customers plus new business.

Year 1943 looks like 55% l. f. If increase in latter years is due ½ to Base Load at 85% L. F. and ½ to h. h. at 25% L. F., then the L. F. of the increase shown would be 55% and this seems reasonable.

		Customer	MCF Per Customer	MCF Annual	Contribution to Max-Day M.MCF
	1941	140 000	50	7 000 000	34.0
114,000 1936	1942	145 000	52	7 500 000	41.0
136,000 1940	1943	150 000	54	8 100 000	44.3
22,000 Gain	1944	155 000	56	8 700 000	47.6
5 to 6 M per year	1945	160 000	58	9 300 000	51.0
	1946	164 000	60	9 850 000	54.0
	1947	167 000	61	10 200 000	56.0
	1948	169 000	62	10 500 000	57.6
	1949	170 000	63	10 700 000	58.6
	1950	171 000	64	10 900 000	59.7
	1951	172 000	65	11 200 000	61.5

Growth about 2 MCF per customer per year.

Max-Day total west of Dana 2/19/41 was 72,414 at that time Direct and Indirect Industrial apparently contributed about 1,048,945 MCF $\div \frac{30.4}{?}$ = 38.4 MCF leaving 34.0 MM as D & C contribution. $\frac{1,000,000}{365}$ MCF $\div$ 34.0 = .565 (temp. ÷ 17)

This same ratio for 1939 was .54
and for 1940 was .43 (temp.)
Used ratio of .5 for future years.

Certificate

Setting Forth the Designation and Certain of the Terms

of the

5.60% Cumulative Preferred Stock

of

Panhandle Eastern Pipe Line Company

Pursuant to Section 13 of Chapter 65 of the Revised Code as Amended, of the State of Delaware

(Filed February 3, 1942)

[fol. 15379]

Certificate

Setting Forth the Designation and Certain of the Terms

of the

5.60% Cumulative Preferred Stock

of

Panhandle Eastern Pipe Line Company

We, the undersigned, J. D. Creveling and Leith V. Watkins, President and Secretary, respectively, of Panhandle Eastern Pipe Line Company (hereinafter called the corporation), hereby certify as follows, pursuant to Section 13 of Chapter 65 of the Revised Code, as amended, of the State of Delaware:

1. The Certificate of Incorporation of the corporation, as amended, authorizes the issuance of 250,000 shares of Cumulative Preferred Stock in series, with variations, as may be determined by the Board of Directors of the corporation prior to the issue thereof, as to (1) the rate of dividend, the dividend payment dates and the manner and medium of payment thereof and the dates from which the dividends shall commence to accrue, (2) the amount payable upon redemption, (3) the amount payable upon any voluntary liquidation, dissolution or winding up of the corporation or any voluntary distribution of assets by way of return of capital, (4) the provisions of the sinking fund,

if any, (5) the terms and rates of conversion and or exchange, if convertible and or exchangeable, (6) the provisions of the rights or options, if any, to purchase any shares of capital stock of any class or classes of the corporation, (7) the provisions, if any, as to payment or refund of taxes and (8) the provisions as to voting rights, if any (in addition to the voting rights given in Subdivisions VI and VII of Section B of Article Fourth the Certificate of Incorporation, as amended, to all Cumulative Preferred Stock); but the stock of each series of Cumulative Preferred Stock shall, in all other respects, be alike; and the shares of each such series shall be alike with all other shares of the same series in all respects except as to the dates from which dividends shall commence to accrue.

II. The Board of Directors of the corporation, at a meeting duly called and held at the offices of the corporation, 20 [fol. 15380] Broad Street, New York, New York, on the 2nd day of February, 1942, at which meeting a majority and quorum of the directors were present and acting throughout, did duly adopt the following resolutions authorizing the creation of a series of Cumulative Preferred Stock to be known as "5.60% Cumulative Preferred Stock", stating that 150,000 shares of the authorized and unissued Cumulative Preferred Stock shall belong to such series and setting forth a statement of the designations, powers, preferences and rights, and the qualifications, limitations and restrictions thereof, of the 5.60% Cumulative Preferred Stock which have not been set forth in the Certificate of Incorporation of the corporation, as amended:

"Resolved that 150,000 shares of authorized but unissued Cumulative Preferred Stock of the corporation be and hereby are determined to be and shall be of a series hereby designated as "5.60% Cumulative Preferred Stock"; and

Resolved that the following is a statement of the powers, preferences and rights, and the qualifications, limitations and restrictions thereof, of such series which have not been set forth in the Certificate of Incorporation, or any amendment thereto:

1. The rate of dividend payable on the shares of 5.60% Cumulative Preferred Stock shall be 5.60% per annum; such dividend shall be payable in cash; and the dividend payment dates for such series shall be the first days of January, April, July and October.

2. The amount payable upon redemption of the 5.60% Cumulative Preferred Stock (other than redemption through operation of the sinking fund, as provided in Subdivision 4 below) shall be $108 per share, plus accrued dividends.

3. The amount to be paid to the 5.60% Cumulative Preferred Stock upon any voluntary liquidation, dissolution or winding up of the corporation, or any voluntary distribution of assets by way of return of capital, shall be $108 per share, plus accrued dividends.

4. The 5.60% Cumulative Preferred Stock shall be entitled to the benefit of sinking funds as set forth in this Subdivision 4. On April 1, 1942, the corporation shall make [fol. 15381] available (by depositing in a segregated account) the sum of $100,000, and on April 1st in each year thereafter (hereinafter in this Subdivision 4 called "sinking fund payment date") so long as any shares of the 5.60% Cumulative Preferred Stock remain outstanding, the corporation shall make available (by depositing in a segregated account)

(1) a sum hereinafter in this Subdivision 4 sometimes called the "fixed sinking fund") sufficient to redeem at the sinking fund redemption price (hereinafter specified) on the 1st day of July next succeeding the sinking fund payment date, 1½% of the largest amount of 5.60% Cumulative Preferred Stock at any time outstanding prior to the sinking fund payment date; and

(2) a sum (hereinafter in this Subdivision 4 sometimes called the "contingent sinking fund") equal to the lesser of (a) a sum sufficient to redeem at the sinking fund redemption price on the 1st day of July next succeeding the sinking fund payment date, 2% of the largest amount of 5.60% Cumulative Preferred Stock at any time outstanding prior to the sinking fund payment date, or (b) a sum equal to the balance of earnings applicable to the contingent sinking fund (computed as hereinafter provided) for the twelve months period ended on the December 31st next preceding the sinking fund payment date.

The term "balance of earnings applicable to the contingent sinking fund", as used in clause (2) of this Subdivision 4, shall mean the consolidated net earnings of the corporation

and its subsidiaries after deductions of all charges of a proper character, including (but without being limited thereto) operating expenses, interest, expenditures for ordinary maintenance, appropriations for reserves for depreciation, depletion and amortization and for amortization of intangible property, taxes (including income and excess profits taxes), dividends accrued and or paid on the Cumulative Preferred Stock and the Preferred Stock in respect of the period of computation, and the sum paid during the period of computation to the fixed sinking fund under clause (3) of this Subdivision 4 (not including, however, [fol. 15382] any sum so paid on account of default in the fixed sinking fund prior to the period of computation) or the sum of $100,000 in the case of any computation of the balance of earnings applicable to the contingent sinking fund for the twelve months' period ended December 31, 1942.

The corporation shall have the right to anticipate at any time or from time to time all or any part of any sinking fund payments (a) by delivering to the sinking funds shares of 5.60% Cumulative Preferred Stock which, after being outstanding, have been purchased or otherwise acquired by the corporation and have not previously been surrendered to the sinking funds, or (b) by redeeming shares of 5.60% Cumulative Preferred Stock at the price set forth in Subdivision 2 hereof, provided no previous sinking fund credit has been taken in respect of the shares so redeemed. To the extent that the corporation shall at any time so anticipate sinking fund payments the corporation shall be entitled to credit on account of the aggregate amount of all sinking fund payments then becoming due and thereafter to become due for an amount equal to the aggregate sinking fund redemption price of all shares so surrendered to the sinking fund or so redeemed, such credits to be applied on such sinking fund payments in such order as the corporation may elect.

Subject to the provisions of Subdivision X of Section B of Article Fourth of the Certificate of Incorporation of the corporation and to the provisions of Subdivision 6 hereof, all moneys in the sinking funds shall be applied by the corporation, from time to time, as soon as reasonably practicable after payment thereof into the sinking funds, to the purchase of 5.60% Cumulative Preferred Stock at

private sale or in the open market, with or without advertising for tenders, at the best prices obtainable by the corporation considering the amount purchased, but at a cost (including accrued dividends and customary brokerage paid) not exceeding the sinking fund redemption price thereof, all as the corporation shall determine. If on or before May 31st next succeeding any sinking fund payment date, the corporation shall not be able to purchase shares of 5.60% Cumulative Preferred Stock in amount [fol. 1538] sufficient to exhaust the moneys in such sinking funds, then the moneys in such sinking funds not applied to the purchase of shares of 5.60% Cumulative Preferred Stock as aforesaid shall be applied by the corporation to redemption on the next succeeding July 1st, of shares of 5.60% Cumulative Preferred Stock, to be selected by lot, at the sinking fund redemption price.

Shares of 5.60% Cumulative Preferred Stock (determined by lot as above provided) may be redeemed, at the option of the Board of Directors of the corporation, at a redemption price (herein sometimes referred to as the "sinking fund redemption price") of $105 per share, plus accrued dividends. The provisions of Subdivision IV of Section B of Article Fourth of the Certificate of Incorporation of the corporation, to the extent not in conflict with the provisions of this Subdivision 4, shall be applicable to any redemption of shares pursuant to this Subdivision 4.

No 5.60% Cumulative Preferred Stock purchased or redeemed for, or surrendered to, the sinking funds shall be reissued or otherwise disposed of, and no Cumulative Preferred Stock shall be issued in lieu thereof, and the corporation may from time to time cause all such shares to be retired in the manner provided by law. Whenever no shares of 5.60% Cumulative Preferred Stock shall remain outstanding, any balance remaining in the sinking funds shall become a part of the general funds of the corporation.

If, while any of the 5.60% Cumulative Preferred Stock shall be outstanding, there shall be created any other series of Cumulative Preferred Stock having a sinking fund (fixed or contingent, or both) which provides for the retirement of shares of such other series at a more rapid rate than the retirement of shares of 5.60% Cumulative Preferred Stock is provided for under the provisions of the sinking funds hereinbefore created in this Subdivision

4, then the sinking fund requirements for the 5.60% Cumulative Preferred Stock hereinbefore set forth in this Subdivision 4 shall be forthwith increased so as to provide thenceforth for the retirement of shares of 5.60% Cumula- [fol. 15384] tive Preferred Stock at a rate as rapid as that provided for in the sinking fund for such new series.

5. So long as any shares of 5.60% Cumulative Preferred Stock are outstanding, the corporation shall not, without the affirmative vote at a meeting (the notice of which shall state the general character of the matters to be submitted thereat), or the written consent with or without a meeting, of the holders of at least two-thirds of the then outstanding shares of 5.60% Cumulative Preferred Stock,

(A) issue or sell any Cumulative Preferred Stock or any class of stock ranking prior to or on a parity with the Cumulative Preferred Stock in respect of dividends or assets or any class of stock or obligations convertible into or evidencing a right to purchase any stock of any class ranking prior to or on a parity with the Cumulative Preferred Stock in respect of dividends or assets, if the consolidated net earnings of the corporation and of all the subsidiaries available for interest and dividends, for a period of twelve (12) consecutive calendar months ending within ninety (90) days immediately preceding such issue or sale, shall amount to less than one and one-half times the sum of (a) the aggregate consolidated annual interest requirements on all indebtedness of the corporation and its subsidiaries, to be outstanding after giving effect to the proposed issue or sale of such additional securities, and (b) the aggregate annual dividend requirements on all shares of Cumulative Preferred Stock and on all other classes of stock of the corporation ranking prior to or on a parity with the Cumulative Preferred Stock in respect of dividends or assets and on stock of all classes of subsidiaries not owned by the corporation ranking prior to the common stock of such subsidiaries in respect of dividends or assets, to be outstanding after giving effect to such proposed issue or sale of such additional securities, or

(B) issue or sell any Cumulative Preferred Stock or any class of stock ranking prior to or on a parity with the Cumulative Preferred Stock in respect of dividends or assets;

[fol. 15385] (1) if the consolidated net earnings of the corporation and of all the subsidiaries available for dividends, for a period of twelve (12) consecutive calendar months ending within ninety (90) days immediately preceding such issue or sale, shall amount to less than two times the annual dividend requirements on all shares of Cumulative Preferred Stock and on all other classes of stock of the corporation ranking prior to or on a parity with the Cumulative Preferred Stock in respect of dividends or assets and on stock of all classes of subsidiaries not owned by the corporation ranking prior to the common stock of such subsidiaries in respect of dividends or assets, to be outstanding after giving effect to such proposed issue or sale of such additional stock; or

(2) if as a result of the issuance or sale of such shares the aggregate par value, or if such stock has no par value the preference on involuntary liquidation, of all shares of Cumulative Preferred Stock, and of all stock ranking prior to or on a parity with the Cumulative Preferred Stock in respect of dividends or assets, to be outstanding after giving effect to such proposed issue or sale of such additional stock would exceed the sum of (a) the total capital of the corporation represented by then outstanding shares of Common Stock and any other stock ranking junior to the Cumulative Preferred Stock in respect of dividends and assets and (b) the surplus of the corporation as then stated on its books of account.

The foregoing provisions of this Subdivision 5 shall not apply to the initial issuance and sale of the first 150,000 shares of Cumulative Preferred Stock issued and sold.

For the purpose of the foregoing provisions of this Subdivision 5, the "consolidated net earnings of the corporation and of all the subsidiaries available for interest and dividends" shall be ascertained, with intercompany items eliminated, as follows: From the total of the operating revenues (including rentals) of the corporation and of all [fol. 15386] the subsidiaries plus the net non-operating earnings of the corporation and of all the subsidiaries (excluding profits derived from the appreciation in value or from the sale or other disposition of real estate, plants, equipment or other capital assets), there shall be deducted all operating expenses of the corporation and the

subsidiaries (excluding from operating expenses (a) all charges for interest and (b) amortization of debt discount and expenses, but including all rentals, insurance, expenditures for current maintenance and taxes) and also deducted appropriations for reserves for depreciation, depletion and amortization and for amortization of intangible property, and the balance shall constitute the consolidated net earnings of the corporation and of all the subsidiaries available for interest and dividends; provided, however, that for the purposes of this paragraph the net non-operating earnings of the corporation and of all the subsidiaries shall not be included in such consolidated net earnings of the corporation and of all the subsidiaries available for interest and dividends except in an aggregate amount not in excess of twenty per cent. (20%) of said consolidated net earnings of the corporation and of all the subsidiaries available for interest and dividends.

For the purpose of the foregoing provisions of this Subdivision 5, the "consolidated net earnings of the corporation and of all the subsidiaries available for dividends" shall be computed in the same manner as the computation is made pursuant to the provisions of the next preceding paragraph hereof of the consolidated net earnings of the corporation and of all the subsidiaries available for interest and dividends, except that there shall be deducted from total revenues, in addition to the other deductions provided for in said preceding paragraph, an amount equal to all interest paid or accrued in respect of the period of computation and amortization of debt discount and expense for such period.

In case, within or after the period for which the calculation of consolidated net earnings is made pursuant to the provisions of this Subdivision, the corporation or a subsidiary shall have acquired any properties or shall have been consolidated or merged with any corporation, and such state of facts still exists at the date of the calculation, then in computing such consolidated net earnings [fol. 15387] there shall be included, to the extent the same may not have been otherwise included, the net earnings derived from the operation of the properties acquired or the properties of such other corporation, as the case may be, for the whole of such period. Such consoli-

dated net earnings shall be ascertained and computed, as in this Subdivision provided, as if such properties had been owned and operated by the corporation or a subsidiary during the whole of such period.

6. So long as any shares of the 5.60% Cumulative Preferred Stock are outstanding, the Company shall not, without written consent of the holders of a majority of the then outstanding shares of 5.60% Cumulative Preferred Stock or, in the alternative and subject to the proviso hereinafter set forth in this Subdivision 6, the affirmative vote, at a meeting (the notice of which shall state the general character of the matters to be submitted thereat) at which there is a quorum as defined below in this Subdivision 6, of the holders of a majority of the then outstanding shares of 5.60% Cumulative Preferred Stock which are represented at such meeting by the attendance of the holders thereof in person or by proxy, purchase or redeem any shares of Cumulative Preferred Stock or of any other stock ranking on a parity with or prior to the Cumulative Preferred Stock in respect of dividends or assets, during the continuance of any default in the payment of dividends on the 5.60% Cumulative Preferred Stock; provided, however, that if, at any such meeting, at least one-third of all shares of such 5.60% Cumulative Preferred Stock then outstanding shall be voted against the action, then proposed of the character aforesaid, such action may be taken only with the affirmative vote of the holders of a majority of the then outstanding shares of 5.60% Cumulative Preferred Stock.

At any meeting of such 5.60% Cumulative Preferred Stock for the purpose of taking action on matters set forth in this Subdivision 6, the presence in person or by proxy of the holders of a majority of the shares of such stock then outstanding shall constitute a quorum except that if the presence of such a majority shall not have been obtained [fol. 15388] and shall not be obtained for a period of thirty days from the date of such meeting, the presence in person or by proxy of the holders of one-third of the shares of such stock then outstanding shall be sufficient to constitute a quorum.

7. So long as any shares of 5.60% Cumulative Preferred Stock are outstanding, the corporation shall not, without

the affirmative vote at a meeting (the notice of which shall state the general character of the matters to be submitted thereat), or the written consent with or without a meeting, of the holders of at least two-thirds of the then outstanding shares of 5.60% Cumulative Preferred Stock,

(a) issue, assume or guarantee any unsecured notes, debentures or other securities representing unsecured indebtedness (hereinafter in this Subdivision 7 collectively referred to as "unsecured securities") for any purpose other than the redemption or other retirement of all the then outstanding shares of 5.60% Cumulative Preferred Stock and/or all the then outstanding shares of Class B Preferred Stock, if, immediately after such issue, assumption or guarantee, the total principal amount of all unsecured securities issued, assumed or guaranteed by the corporation and then outstanding (including unsecured securities then to be issued, assumed or guaranteed) will exceed $15,000,000; provided, however, that if and so long as the sum of (1) the total principal amount of all bonds and other securities representing secured indebtedness issued or assumed by the corporation and then outstanding and (2) the capital and surplus of the corporation as then stated on the books of account of the corporation, shall exceed $150,000,000, then the above limitation of $15,000,000 upon the aggregate principal amount of unsecured securities shall be increased by an amount equal to 10% of such excess; or

(b) issue, assume or guarantee any unsecured securities which shall mature by their terms more than ten years from the date upon which they are issued, assumed or guaranteed by the corporation; or

[fol. 15389] (c) issue, assume or guarantee any unsecured securities maturing by their terms two years or less from the date upon which they are issued, assumed or guaranteed by the corporation in a principal amount which, when added to the principal amount of all other unsecured securities at the time outstanding (not including, however, any Serial Notes of the corporation issued under its Indenture dated as of November 1, 1940 to Chemical Bank & Trust Company, as Trustee) maturing by their terms two years or less from the date upon which they were issued,

assumed or guaranteed by the corporation, would exceed 10% of the sum of (1) the total principal amount of all bonds and other securities representing secured indebtedness issued or assumed by the corporation and then outstanding and (2) the capital and surplus of the corporation as then stated on the books of account of the corporation.

8. So long as any shares of 5.60% Cumulative Preferred Stock are outstanding, the corporation shall not, without the affirmative vote at a meeting (the notice of which shall state the general character of the matters to be submitted thereat), or the written consent with or without a meeting, of the holders of at least two-thirds of the then outstanding shares of 5.60% Cumulative Preferred Stock, declare or pay any dividends (other than dividends payable in shares of its capital stock ranking junior to the Cumulative Preferred Stock in respect of dividends and assets), or make any other distribution on, or purchase or redeem, any shares, at any time outstanding, of its Common Stock or any other class of stock ranking junior to the Cumulative Preferred Stock in respect of dividends or assets,

(A) if the cumulative aggregate amount of such dividends, distributions, purchases and redemptions (at cost) declared or effected subsequent to January 1, 1940, exceeds the amount of earned surplus (computed before deducting any amount in respect of such dividends, distributions, purchases and redemptions declared or effected subsequent to January 1, 1940, but after deducting an [fol. 5390] amount equal to all dividends paid or accrued and unpaid subsequent to January 1, 1940 upon the Cumulative Preferred Stock and all other stock of the corporation ranking prior to or on a parity with the Cumulative Preferred Stock in respect of dividends or assets) arising subsequent to January 1, 1940, determined in accordance with sound accounting practice, plus the sum of $1,500,000; provided, however, that, for the purposes of this Subdivision 8, in determining at any time or from time to time the amount of earned surplus arising subsequent to January 1, 1940, no deduction or addition shall be made for any or all of the following direct charges or credits to earned surplus:

(1) surplus adjustments applicable to a period or periods prior to January 1, 1940;

(2) charges to earned surplus for the write-off at any time of unamortized discount and expense, applicable to the funded debt of the corporation existing at any time prior to January 1, 1940, or of any unamortized premium paid in connection with the redemption of any such funded debt;

(3) charges to earned surplus for the write-down or write-off of the excess of the cost to the corporation of properties acquired as entireties or otherwise over the original cost of such properties when first devoted to public use, which may be required by any rule, regulation or order of any public body or authority exercising supervisory authority over the accounts of the corporation;

(4) charges to earned surplus for dividends aggregating $1,211,050.50 declared on the shares of the capital stock of the corporation during the year 1940, in respect of earnings for the year 1939, and paid during the year 1940; or

(B) if immediately following such dividend, distribution, purchase or redemption, the aggregate par value, or if such stock has no par value the preference on in- [fol. 15391] voluntary liquidation, of all outstanding shares of Cumulative Preferred Stock, and of all stock ranking prior to or on a parity with the Cumulative Preferred Stock in respect of dividends or assets, would exceed an amount equal to the sum of (a) the total capital of the corporation represented by then outstanding shares of Common Stock and any other stock ranking junior to the Cumulative Preferred Stock in respect of dividends or assets and (b) the surplus of the corporation as then stated on its books of account.

The foregoing provisions of this Subdivision 8 shall not apply to the purchase or redemption of any shares of the capital stock of the corporation of any class effected through the exchange of other shares of stock of the corporation ranking junior to the Cumulative Preferred Stock in respect of dividends and assets or from the net proceeds (received after January 1, 1942) of shares of

stock ranking junior to the Cumulative Preferred Stock in respect of dividends and assets.

9. Any term hereinabove used, which is defined in the Certificate of Incorporation of the corporation, has the meaning therein assigned to it in such definition."

In Witness Whereof, this certificate has been made under the seal of said Panhandle Eastern Pipe Line Company and has been signed by the undersigned, said J. D. Creveling, its President, and said Leith V. Watkins, its Secretary, respectively, this 2nd day of February, 1942.

Certificate

of

Purchase and Retirement of Class A Preferred Stock

of

Panhandle Eastern Pipe Line Company

Pursuant to Section 27 of the General Corporation Law

of the State of Delaware

(Filed February 14, 1942)

[fol. 15394] Certificate

of

Purchase and Retirement of Class A Preferred Stock

of

Panhandle Eastern Pipe Line Company

Pursuant to Section 27 of the

General Corporation Law

of the State of Delaware

Panhandle Eastern Pipe Line Company (hereinafter called the Corporation), under the seal of the Corporation and the hands of its President and Secretary, does hereby Certify:

That the Corporation has purchased One Hundred Thousand (100,000) shares of its Class A Preferred Stock of the

par value of $100 each, at par, being a price not exceeding the price at which such shares might be redeemed, and has retired such shares pursuant to resolution of its Board of Directors duly adopted.

That the amount of capital of the Corporation applied to the purchase of said shares was Ten Million Dollars ($10,000,000).

That the capital of the Corporation is hereby reduced by the amount of capital which was applied to such purchase to wit: Ten Million Dollars ($10,000,000), which amount is the same as the amount of capital represented by the shares so purchased.

That the Certificate of Incorporation, as amended, prohibits the reissue of such shares so purchased and retired, and in as much as the shares so purchased and retired constitute all of the outstanding shares of Class A Preferred Stock, the filing and recording of this Certificate shall constitute an amendment to the Certificate of Incorporation effecting a reduction in the authorized capital stock of the Corporation by the elimination therefrom of all reference to Class A Preferred Stock.

That the assets of the Corporation remaining after such purchase and retirement are sufficient to pay any debts of the Corporation, the payment of which has not been otherwise provided for.

[fol. 15395] In Witness Whereof, this Certificate has been made under the Seal of said Panhandle Eastern Pipe Line Company and has been signed by the undersigned, said J. D. Creveling, its President, and said Leith V. Watkins, its Secretary, respectively, this 12th day of February, 1942.

J. D. CREVELING,
President.

[fol. 15458] Exhibit 188.

Annual Report for 1940.

Panhandle Eastern Pipe Line Company.

To The Stockholders:

This is the Annual Report of operations of your Company for the year 1940. Included in this report is the consolidated balance sheet of the Company and its subsidiaries as of December 31, 1940, together with consolidated income statement, surplus account and operating statistics (main line system only) for the year 1940, with certain explanatory notes attached thereto. For comparison the income statement and operating statistics for the year 1939 are also given.

Operations.

Gross revenues for the year 1940 were again the largest in the history of the Company and amounted to $13,535,452.79, as compared with $11,996,769.23 in 1939, an increase of $1,538,683.56 or about 13%.

Notwithstanding the very large increase ($1,177,000) in Federal Taxes during the year 1940, referred to elsewhere in this report, net income for the year, after all charges but before dividends on any class of stock, was $4,548,323.98, as compared with $4,363,399.34 in 1939.

Provision for Depreciation, Depletion and Amortization.

The provision for depreciation, depletion and amortization (including amortization of gas sales and purchase con-[fol. 15459] tracts) for the year 1940 was $2,210,000, substantially the same as for the previous year. Your manage-

ment's judgment that this amount is a reasonable provision for this purpose has been confirmed by an independent consulting engineer.

Taxes.

The total amount which had to be set aside from the operations of your Company for the payment of taxes for the year 1940 was $2,610,469.95. Out of every dollar of Gross Revenue, approximately 20 cents had to be put aside for taxes.

Federal taxes increased approximately $1,177,000, of which approximately $929,000 resulted from new Federal taxes, principally excess profit taxes and an increase in rates during the year 1940.

Construction.

Continuing the Company's policy of expanding its facilities to serve its market requirements, your Company, during the year 1940, authorized a $2,900,000 construction program in addition to the $3,500,000 program authorized near the end of 1939. These programs included the addition of approximately 245 miles of 24 inch, 22 inch, 20 inch and 18 inch main pipe line continuing the looping program of our original line, the construction of a new 3,900 horsepower Compressor Station at Hanford, Texas, the installation of an additional 1,500 horsepower unit at the Sneed, Texas Compressor Station, the installation of an additional 1,000 horsepower unit at the Glenarm, Illinois Compressor Station, and the enlargement of the combination gasoline and dehydration plant near Liberal, Kansas. The completion of these construction programs substantially increased the transmission capacity. In addition the Company expended approximately $500,000 for normal routine items.

Capital Changes.

The 1,285 unsubscribed shares of the Company's Common Stock referred to in the 1939 Annual Report are still in litigation.

Since the end of the year 1940 your Company consummated the refinancing of its First Mortgage and First Lien Bonds, Series A, 4%, due March 1, 1952, through the sale

of $5,000,000 principal amount of Serial Notes, due serially [fol. 15460] November 1, 1942 to November 1, 1945, inclusive, $6,250,000 principal amount of First Mortgage and First Lien Bonds, Series A, due serially November 1, 1946 to November 1, 1950, inclusive, and $12,000,000 principal amount of First Mortgage and First Lien 3% Bonds, Series B, due November 1, 1960, and on February 3, 1941 your Company authorized the redemption of its 4% Bonds prior to or after redemption date of March 5, 1941.

The general effect of these transactions was to lower the interest rate on your Company's outstanding long-term debt (the cost of the new money averaging approximately 2.71%). Also, among other things, it effected a change in the sinking fund provisions so as to make available added amounts of cash during the next few years, extended the final maturity of the funded debt to twenty years, and in the judgment of your management provided an improved medium for possible future senior financing.

Dividends

During the year 1940 the Company paid dividends on its Preferred and Common Stock amounting to $3,485,784.51, of which $660,000 represented regular dividends at the rate of $6.00 per share on the Class A and Class B Preferred Stock, $493,683.51 represented Participating Dividends on the Class A Preferred Stock, and $2,422,101 on the Common Stock which amounted to $3.00 per share on the 807,367 shares of such stock outstanding.

On January 25, 1941 a dividend of one share of the Capital Stock of Central Distributing Company, at a valuation of forty-two cents (42¢) per share, to and for each share of Common Stock of your Company, was declared and paid. The aggregate valuation of such dividend was $339,094.14.

General.

By virtue of the declaration of its shares as a dividend on the Common Stock of your Company, as above referred to, Central Distributing Company ceased to be a subsidiary of your Company on January 25, 1941. This is another step in corporate simplification.

The maximum obligation of your Company for deliveries under its contract dated August 31, 1935, with Michigan [fol. 15461] Consolidated Gas Company (formerly Detroit City Gas Company), was changed on June 29, 1940, through a supplemental contract, from one hundred million (100,000,000) to one hundred twenty-five million (125,000,000) cubic feet of gas per day.

The year end finds the Company in a comfortable financial position.

By Order of the Board of Directors

J. D. CREVELING,
President.

Dover, Delaware, February 28, 1941.

* * * * * * * *

[fol. 15472] Exhibit 189

Annual Report for 1941.

Panhandle Eastern Pipe Line Company.

To the Stockholders:

This is the Annual Report of operations of your Company for the year 1941. Included in this report is the consolidated balance sheet of the Company and its subsidiary as of December 31, 1941, together with consolidated income statement, surplus account and operating statistics (main line system only) for the year 1941, with certain explanatory notes attached thereto. For comparison the income statement and operating statistics for the year 1940 are also given.

Operations.

Gross revenues for the year 1941 amounted to $15,434,856.73, as compared with $13,535,452.79 in 1940, and were again the largest in the history of the Company. The increase amounted to $1,899,403.94, or 14%. Had not the Company had the benefit for tax purposes of special deductions amounting to $823,881.49, referred to elsewhere in this report, there would have been an increase of slightly more than $1,535,000 in Federal taxes during the year 1941.

Net income was $4,804,492.74, as compared with $4,548,323.98 in 1940.

Provision for Depreciation, Depletion and Amortization.

The amount set aside during the year 1941 as provision for depreciation, depletion and amortization (including amortization of gas sales and purchase contracts) was $2,435,000. This compared with $2,210,000 for the previous year. The basis was unchanged, the increase resulting from a greater amount of depreciable properties. The judgment of your management that this amount is a rea- [fol. 15473] sonable provision for this purpose has been confirmed by an independent consulting engineer.

Taxes.

Through an unbroken sequence of years your Company's tax bill has grown steadily until for the year 1941 the total amount set aside from its operations for the payment of taxes for that year amounted to $3,323,622.93 and had not it had the benefit for tax purposes of deductions for discount, premium and expense resulting from the refinancing of long-term debt (the tax equivalent of which is shown in the comparative consolidated income statement on Page 13 as "Charges in lieu of Federal income and excess profits taxes) the total tax cost for the year 1941 would have been $4,147,504.42, an increase of $1,537,034.47 over the year 1940 and would have represented 27 cents out of every dollar of Gross Revenue and would have lacked only $656,988.32 of being as much as the total net income for the year 1941.

Market Development.

During the year your management has pursued a conservative yet constructive course in its efforts to achieve a part of its goal with respect to ultimate economic market development which it reasonably could hope and expect to reach and as a consequence entered into a contract with Consumers Power Company whereby, among other things, it has agreed to supply a major part of the natural gas requirements of the Power Company for distribution in its Flint, Pontiac, Jackson, Kalamazoo, Owosso and Battle Creek Divisions. In addition, it consummated a contract

with Citizens Gas Fuel Company and Battle Creek Gas Company pursuant to which the natural gas requirements of Adrian and Battle Creek, Michigan will be supplied to these Companies. The construction of facilities necessary to connect these markets is expected to be completed by the middle of the year 1942.

Deliveries began during the year 1941 to Richmond Gas Corporation and Greenfield Gas Company, Inc. for distribution in Richmond and Greenfield, Indiana, respectively.

Illinois Natural Gas Company, your Company's wholly owned subsidiary, is constructing lateral lines in the State of Illinois for the purpose of supplying the natural gas requirements of Galesburg, Abingdon and Knoxville, Illinois and hopes to be able to commence the construction of a lateral line to Bloomington, Illinois as soon as material is available.

[fol. 15474] Construction.

In order to extend natural gas service to a number of communities in the States of Illinois, Indiana and Michigan and to continue your Company's policy of expanding its facilities to adequately serve presently connected markets, it authorized certain construction work during the year 1941 involving expenditures in excess of $9,000,000, a large part of which is now in progress. This program included the construction of approximately 256 miles of 20", 18", 16" and 12¾" transmission lines in the State of Michigan for the purpose of fulfilling contractual obligations mentioned elsewhere herein and the construction of 146 miles of 26" 24" and 20" transmission lines as a continuation of the looping program of the Company's original line, as well as the installation of additional gas driven compressors in the Company's Pleasant Hill, Glenarm and Tuscola Compressor Stations. This was in addition to expenditures of approximately $700,000 for normal routine items. Your management expects that all of this construction work will be completed during the summer of 1942.

Property Acquisitions.

With the approval of the Securities and Exchange Commission, your Company, on February 6, 1942, sold and

issued, after competitive bidding, $10,000,000 principal amount of its First Mortgage and First Lien 3% Bonds, Series C, and $15,000,000 aggregate par value of its 5.60% Cumulative Preferred Stock and with the proceeds has now redeemed its $10,000,000 aggregate par value of Class A Preferred Stock and has acquired all of the stock and indebtedness of Michigan Gas Transmission Corporation and of Indiana Gas Distribution Corporation, and certain pipe lines previously belonging to The Ohio Fuel Gas Company, the amount paid by your Company for such properties being approximately $11,207,000. The Bonds were sold at 100.02% of principal amount and accrued interest, and the new Preferred Stock was sold at $100.2789 per share and accrued dividends. The balance of the net proceeds of the financing amounting to approximately $3,600,000, will be applied to the payment of a part of the cost of construction work now in progress.

Michigan Gas Transmission Corporation owns a system of natural gas transmission lines, compressor stations and equipment located in the States of Indiana, Ohio and Michigan. Its principal lines and stations consist of two lines (1—20" line and 1—24" line) extending from the former eastern terminus of your Company's system (a point in Vermillion County, Indiana near Dana, In-
[fol. 15475] diana) to a point near Zionsville, Indiana, a distance of approximately 70 miles, an 18" line extending therefrom to a point near Muncie, Indiana, a distance of approximately 52 miles, a 22" line extending from near Zionsville, Indiana, to a point at or near Detroit, Michigan, a distance of approximately 230 miles, and three compressor stations in Indiana-Montezuma (7800 horsepower), Zionsville (6500 horsepower), and Edgerton (6500 horsepower).

Indiana Gas Distribution Corporation distributes natural gas at retail to approximately 1800 residential and commercial customers located in various small towns in Indiana.

The principal transmission lines acquired from The Ohio Fuel Gas Company consist of approximately 33 miles of 16" line extending generally eastward from a point near Muncie, Indiana, to a point approximately 2½ miles east

of the Indiana-Ohio boundary, together with certain laterals branching therefrom. The principal branch lines are a 10" line approximately 13 miles in length extending to a point near Richmond, Indiana, and a 6" and 6⅝" line approximately 7 miles in length extending to Winchester, Indiana.

The effect of the acquisition of these properties by your Company will be to increase earnings, remove operating problems and enable your management to deal directly with the distributing organizations in the States of Indiana, Ohio and Michigan.

Capital Changes:

The 1,285 unsubscribed shares of the Company's Common Stock referred to in the Annual Reports of 1939 and 1940 are still in litigation.

A report of the refinancing consummated by your Company on February 3, 1941 was included in the Annual Report for the year 1940 and there is included elsewhere in this report a brief description of the new securities (3% Bonds and 5.60% Cumulative Preferred Stock) issued and sold as of February 6, 1942, together with the fact of the redemption of the Class A Preferred Stock.

Regulatory Matters:

Public Utility Holding Company Act of 1935:

Following hearings before the Securities and Exchange Commission under the Public Utility Holding Company [fol. 15476] Act of 1935, your Company was held to be, for the purposes of such Act, a subsidiary of Columbia Gas & Electric Corporation (a registered holding company) and of Columbia Oil & Gasoline Corporation.

Federal Power Commission:

In May, 1941, the Federal Power Commission instituted a proceeding with respect to the reasonableness of the rates charged by your Company and Michigan Gas Transmission Corporation. A similar proceeding was instituted by the City of Detroit and the County of Wayne, and these two proceedings have been consolidated by the Commis-

sion and testimony is being taken therein. Also, Michigan Consolidated Gas Company has instituted a proceeding with respect to your Company's rates, and hearings have been concluded but the Commission has not yet issued its order thereon. Your Company is unable now to determine the extent to which its rates, business or earnings will be affected by the Natural Gas Act or as a result of these proceedings.

Unamortized Debt Discount and Expense.

During the year your Board of Directors authorized the charging to earned surplus of the unamortized debt discount and expense and call premiums applicable to refunded issues and the discount and expense applicable to outstanding issues amounting to $1,960,748.37. Amortization of these amounts out of earnings had been at the rate of approximately $300,000 per year.

Dividends.

During the year 1941 the Company paid dividends on its Preferred and Common Stock amounting to $3,353,914.56, of which $660,000 represented regular dividends at the rate of $6.00 per share on the Class A and Class B Preferred Stock, $336,402.92 represented Participating Dividends on the Class A Preferred Stock, and $2,357,511.64 representing dividends on the Common Stock which amounted to $2.50 per share in cash and forty-two cents (42c) per share in property (Capital Stock of Central Distributing Company) on the 807,367 shares of such stock outstanding.

General.

In cooperation with law enforcement authorities and to more fully insure an uninterrupted supply of gas for defense production and for essential purposes your Company took special precautions during the year for the protection of its properties. We will undoubtedly face many serious problems as a result of the entrance of the United States into World War II, the exact effect of such conditions upon the business and operations of your Company cannot now be foretold, but as in the past we shall strive to properly meet these problems as they arise and at the same time maintain the same safe continuity of service to the Company's customers as heretofore.

fol. 15477

While this has been a trying year because of special problems presented, such problems have not been permitted to interfere with operations -work perhaps of a less spectacular nature but of no less importance to the stockholders. The year has been a productive period for which each individual member of your organization is entitled to credit, and it is pleasing for your management to have this opportunity to acknowledge with thanks their unflagging interest, contribution of time, thought and energy.

The year end finds the Company in a comfortable financial position.

By Order of the Board of Directors

J. D. CREVELING,
President.

Panhandle Eastern Pipe Line Company and Subsidiary Companies, Note A to the Pro Forma Consolidated Income Account for the Year Ended December 31, 1941.

The condensed pro forma statement of consolidated income of the company and its subsidiary, and Michigan Gas Transmission Corporation and Indiana Gas Distribution Corporation has been prepared from the books of the companies (1) on the basis that the financing of the cost of the acquisition of the outstanding stock and indebtedness of Michigan Gas Transmission Corporation and Indiana Gas Distribution Corporation, which resulted in annual interest costs of $300,000, and which was consummated on February 6, 1942, had been effected January 1, 1941, that the interest expense shown as applicable to obligations of Michigan Gas Transmission Corporation and Indiana Gas Distribution Corporation to Columbia Gas and Electric Corporation, their then parent, would have aggregated the same amount had the Panhandle Eastern Pipe Line Company been the parent company and that dividends had been paid by Michigan Gas Transmission Corporation and Indiana Gas Distribution Corporation to the extent of their net income for the year and (2) after giving effect to estimated increases in Federal income taxes, which would have resulted had such interest and dividends been paid by Michigan Gas Transmission Corporation and Indiana Gas Distribution Corporation, to Panhandle Eastern Pipe Line Company to the full extent of their net income.

Panhandle Eastern Pipe Line Company and Subsidiary Companies, Note A to the Pro Forma Consolidated Income Account for the 12 Months Ended February 28, 1942.

The condensed pro forma statement of consolidated income of the company, Illinois Natural Gas Company, Michigan Gas Transmission Corporation and Indiana Gas Distribution Corporation has been prepared from the books of the companies (1) on the basis that the financing of the cost of the acquisition of the outstanding stock and indebtedness of Michigan Gas Transmission Corporation and Indiana Gas Distribution Corporation, which resulted in annual interest costs of $300,000, and which was consummated on February 6, 1942, had been effected March 1, 1941; that the interest expense shown as applicable to obligations of Michigan Gas Transmission Corporation and Indiana Gas Distribution Corporation to Columbia Gas and Electric Corporation, their parent company until February 6, 1942, would have aggregated the same amount had the Panhandle Eastern Pipe Line Company been the parent company and that dividends had been paid by Michigan Gas Transmission Corporation and Indiana Gas Distribution Corporation to the extent of their net income for the 12 months ended February 28, 1942 and (2) after giving effect to estimated increases in Federal income taxes, which would have resulted had such interest and dividends been paid by Michigan Gas Transmission Corporation and Indiana Gas Distribution Corporation, to Panhandle Eastern Pipe Line Company to the full extent of their net income.

*Charges in lieu of Federal Income and Excess Profits Taxes represent an amount equivalent to income taxes which would have been payable on current earnings if Panhandle Eastern Pipe Line Company had not had the benefit for tax purpose, of deductions for discount, premium and expense resulting from the refinancing of long term debt. Such amounts have been credited to Unamortized Debt Discount and Expense as a partial offset to the items included therein applicable to the bonds which were retired.

Schedule 3, Estimate of Operation and Maintenance Costs -west of Liberal Panhandle Field — Basic Load	13196	4245
Schedule 4, Estimate of Operation and Maintenance Costs — west of Liberal Panhandle Field — Estimated Future Load	13199	4251
Schedule 5, Probable Production from Panhandle Eastern's own Wells and Wells under Gas Contracts (Panhandle Field) during the Period July 1, 1940 to December 31, 1956	13202	4257
47, Panhandle Eastern Pipe Line Company and Subsidiary Companies, future Capital Requirements, Gas Transmission Facilities, Liberal Station and Eastward	13206	4257
48, Statement showing Balance Sheets per Books Panhandle Eastern Pipe Line Company and Subsidiary Companies, as at each December 31, 1930 through 1940 and as at June 30, 1941	13207	4259
49, Income Statement per Books — Period from April 1, 1932 to December 31, 1941	13210	4265
50, Statement showing Earned Surplus per Books, Period from Commencement of Operations to June 30, 1941	13212	4269
51, Statement showing Capital Surplus per Books, Period from September 1, 1930 to June 30, 1941	13214	4273
52, Statement showing Investment in Gas Plant as at each December 31, 1930 through 1940 and as at June 30, 1941	13215	4275
53, Statement of Dividends paid on Class A and Class B Preferred Stocks from beginning to September 1, 1941	13217	4279
54, Statement of Dividends paid on Common Stock from beginning to September 1, 1941	13219	4280
55, Statement showing Comparison of Sales and Revenue, Principal Industrial Customers, years 1939, 1940 and 1941	13220	4281
55-A, Statement showing Comparison of Sales and Revenue, Principal Industrial Customers, years 1939, 1940, and 1941	13221	4283
56, Statement of Gas Produced, Period from April 1, 1932 to June 30, 1941	13222	4284
57, Statement of Gas Purchased, Period from April 1, 1932 to June 30, 1941	13223	4285

	Original	Print
58, Statement of Gas Revenue, Period from April 1, 1932 to June 30, 1941 and Schedule showing Detail of Sales to various Types of Customers, 1939 and 1940	13224	4287
Schedule 1, Statement of Gas Revenue, Period from April 1, 1932 to June 30, 1941	13224	4287
Schedule 2, Detail of Sales to Gas Utilities, years 1939 and 1940	13225	4289
Schedule 3, Detail of Sales to Industrial Customers, years 1939 and 1940	13227	4293
59, Statement of Gas Revenue by States, Period from April 1, 1932 to December 31, 1941	13229	4297
60, Statement showing Sales Agreements with other Gas Companies as at June 30, 1941	13230	4299
61, Study of Current and Future Trends in Commodity Prices and Wages, by David Friday	13238	4310
Graph showing Wholesale Prices from 1800 to 1940	13239	4311
Index Numbers of Wholesale Prices of Commodities by Groups	13241	4313
Commodity Price Indexes of Ten Countries	13247	4318
Statement relating to Tax Collections in the United States, from 1913 to 1942	13258	4328
Index Numbers of Wholesale Prices of all Commodities by Months, from 1890 to 1940	13263	4333
Statement relating to Wholesale Prices for Week Ended September 20, 1941	13264	4335
Graph relating to Average Weekly Earnings in Manufacturing Industries of New York State from 1914 to 1941	13266	4339
Graph relating to Average Hourly Earnings and Average Actual Hours per Week per Worker in twenty-five Manufacturing Industries from 1914 to 1941	13267	4341
Graph relating to Average Cost of Living from 1935 to 1939	13268	4343
62, Deduction from Cost of Reproduction New for Depreciation and Present Value of Plant, Property and Business as of June 30, 1941	13270	4345
Letter from P. McDonald Biddison, Consulting Engineer, to Panhandle Eastern Pipe Line Company, September 30, 1941	13271	4345
General Summary	13272	4347
63, Investors' Appraisal of the Risk of Capital in the Natural Gas Industry as compared with other Divisions of the Utility Industry, Summary of Analyses, prepared by Paul B. Coffman, Vice-President of Standard and Poors Corporation	13321	4349
Table of Contents	13322	4349
Statement of Experience and Qualifications of Paul B. Coffman	13327	4354
Investors' Appraisal of Capital Risks in Various Divisions of the Utility Industry	13348	4371
Statement A, Investors' Appraisal of Risks of Capital for the years 1937, 1938, 1939 and 1940	13351	4373

	Original	Print
Statement A-1, Investors' Appraisal of Risks of Capital for the Interim Period of 1941, January-August, Both Inclusive	13352	4375
Statement B, Investors' Appraisal of Risks of Capital for the years 1937, 1938, 1939 and 1940	13353	4377
Statement B-1, Investors' Appraisal of Risks of Capital for the Interim Period of 1941, January-August, Both Inclusive	13354	4379
Statement C, Investors' Appraisal of Risks of Capital for the years 1937, 1938, 1939 and 1940	13355	4381
Statement C-1, Investors' Appraisal of Risks of Capital for the Interim Period of 1941, January-August, Both Inclusive	13356	4383
Statement D, Investors' Appraisal of Risks of Capital for the years 1937, 1938, 1939 and 1940	13357	4385
Statement D-1, Investors' Appraisal of Risks of Capital for the Interim Period of 1941 January-August, Both Inclusive	13358	4387
Statement E, Investors' Appraisal of Risks of Capital for the years 1937, 1938, 1939 and 1940	13359	4389
Statement E-1, Investors' Appraisal of Risks of Capital for the Interim Period of 1941, January-August, Both Inclusive	13360	4391
Statement F, General Information Covering each Company as to the Nature and Size of the Business and the Territory served	13361	4393
64, Statistics supporting Data, Exhibit 63, Appendixes A, B, and C	18379	4414
Appendix A, Complete List of Companies studied and Reasons for eliminating those not used to determine Investors' Appraisal of Risks of Capital	13380	4414
Appendix B, Securities of forty-three Natural Gas Companies considered Representative of the Industry, etc.	13387	4426

Index, Volume X.

Appendix C, Working Papers showing the Computation of Investors' Appraisal of the Risks of Capital	13398	4446
Water Companies	13399	4447
Electric Operating Utility Companies	13420	4461
Manufactured and Mixed Gas Companies	13465	4501
Natural Gas Companies	13495	4521
65, Study relative to Rate of Return on Panhandle Eastern Pipe Line Company prepared by Paul B. Coffman, Vice President, Standard and Poors Corporation	13533	4547
Table of Contents	13534	4547
Chart No. 1, Main Transmission System of Panhandle Eastern Pipe Line Co. and Subsidiary	13542	4559
Chart No. 2, Growth of Natural Gas Industry in United States of America from 1906 to 1940	13548	4567
Chart No. 3, Consumption of Natural Gas in United States of America from 1919 to 1940	13550	4571
Chart No. 4, Revenue from Natural Gas Consumed in United States of America from 1919 to 1940	13552	4573

	Original	Print
Chart No. 5, Average Revenue per M. C. F. from 1929 to 1940	13554	4575
Chart No. 6, Panhandle Sales by States, vs. Industry Consumption of Natural Gas from 1934 to 1940	13556	4577
Chart No. 7, Trends of Gross Revenue from 1934 to 1940, Panhandle vs. other Pipe Line Companies and Industry	13558	4579
Chart No. 8, Operating Ratio of Panhandle Compared with other Pipe Line Companies from 1934 to 1940	13560	4581
Chart No. 9, Trend of Revenue and Expenses of Panhandle Eastern Pipe Line Company from 1934 to 1940	13562	4583
Chart No. 10, Percent Earned on Invested Capital of Panhandle Based upon Capital Structure	13564	4585
Chart No. 11, Percent Earned on Invested Capital of Panhandle Based upon Net Property, Intangibles and Working Capital	13566	4587
Chart No. 12, Return to Common Stockholders of Panhandle Eastern Pipe Line Company from 1934 to 1940	13568	4589
Chart No. 13, New Tax Bill will reduce Income sharply Computations based on Operations — Twelve Months ended June 30, 1941	13570	4591
Chart No. 14, Percent Earned on Invested Capital of Panhandle Eastern Pipe Line Company — as of June 30, 1941	13572	4593
Chart No. 15, Percent Earned on Invested Capital of Panhandle Eastern Pipe Line Company — as of June 30, 1941	13574	4595
Chart No. 16, Historical Costs of Debt Capital of Panhandle Eastern Pipe Line Company—from 1930 to 1941	13576	4599
Chart No. 17, Effect of 1941 Refinancing of Panhandle Eastern Pipe Line Company	13578	4603
Chart No. 18, Historical Costs of Preferred Stock Capital of Panhandle Eastern Pipe Line Company from 1937 to 1941	13580	4605
Chart No. 19, Earnings — Price Ratios of Natural Gas Pipe Line Common Stocks from 1937 to 1940	13582	4607
Chart No. 20, Current Earnings — Price Ratios of Natural Gas Pipe Line Common Stocks	13584	4609
Chart No. 21, Cost of Financing Northern Natural Gas Company Common Stock — Offered to Public on September 10, 1941	13586	4613
Chart No. 22, Estimated Current Cost of Financing Common Stock of Panhandle Eastern Pipe Line Company	13588	4615
Chart No. 23, Continuing Growth of Panhandle System Indicates Future Needs for New Capital	13590	4617
Chart No. 24, Panhandle Eastern Pipe Line Company Invested Capital as of June 30, 1941	13592	4621
Chart No. 25, Preferred Stock Unusual in Natural Gas Pipe Line Companies	13594	4623
Chart No. 26, Earnings Necessary to Maintain Credit Position of Panhandle Eastern Pipe Line Company	13596	4625
Chart No. 27, Earnings Necessary to Maintain Credit Position of Panhandle Eastern Pipe Line Company	13598	4627
Chart No. 28, Overall Cost of Capital to Panhandle Eastern Based on Ideal Capital Structure	13600	4629

	Original	Print
Chart No. 29, Dollars needed Annually by Panhandle for Operations and Maintenance	13602	4633
Chart No. 30, Dollars needed Annually by Panhandle for Taxes	13604	4637
Chart No. 31, Dollars needed Annually by Panhandle to return Capital to Investors when Gas Reserves are Exhausted	13606	4639
Chart No. 32, Dollars needed Annually by Panhandle for current Capital Requirements — Bonds	13608	4641
Chart No. 33, Dollars needed Annually by Panhandle for current Capital Requirements — Preferred Stock	13610	4643
Chart No. 34, Dollars needed Annually by Panhandle for current Capital Requirements — Common Stock	13612	4645
Chart No. 35, Dollars needed Annually by Panhandle for total current Capital Requirements — Total Invested Capital	13614	4647
Chart No. 36, Dollars needed Annually by Panhandle to provide Service to Customers, a Fair Return to Investors and restore Invested Capital when Gas Reserves are Exhausted	13616	4649
Chart No. 37, Dollars needed Annually by Panhandle to Provide Service to Customers, a Fair Return to Investors and restore Invested Capital when Gas Reserves are Exhausted	13618	4651

*Charges in lieu of Federal income and excess profits taxes represent an amount equivalent to income taxes which would have been payable on current earnings if the company had not had the benefit for tax purposes of deductions for discount, premium and expense resulting from the refinancing of long term debt. Such amounts have been credited to unamortized debt discount and expense as a partial offset to the items included therein applicable to the bonds which were retired. 39 40 41 42 43

Panhandle Eastern Pipe Line Company

For Period Ended December 1941 33

[fol. 15899] (Exhibit 209.)

Panhandle Eastern Pipe Line Company

Sixty-One Broadway

New York

March 30, 1936

Detroit City Gas Company,
415 Clifford Street,
Detroit, Michigan.

Dear Sirs:

In order to carry out the Gas Contract between us dated August 31, 1935, we have made arrangements whereby Michigan Gas Transmission Corporation, a subsidiary of Columbia Gas & Electric Corporation, has agreed to construct, own and operate a pipe line extending from the eastern terminus of our existing pipe line adjacent to the Illinois-Indiana state line, to the Place of Delivery specified in said Gas Contract.

There is enclosed for your information a copy of a Gas Contract dated March 17, 1936 between the undersigned and Michigan Gas Transmission Corporation, pursuant to which Michigan Gas Transmission Corporation is to receive from us at the southern end of its pipe line and to deliver to you at the northern end thereof the natural gas which we have agreed to sell to you pursuant to our Gas Contract dated August 31, 1935.

In order to facilitate operations under said Contracts Michigan Gas Transmission Corporation will give to you on our behalf all notices, statements and other communications which we are required or permitted to give to you under said Gas Contract dated August 31, 1935, and you are hereby authorized and requested to give to Michigan Gas Transmission Corporation all notices, statements and other communications which you are required or permitted to give to us thereunder.

You are also authorized and requested to make directly to Michigan Gas Transmission Corporation the payments for monthly deliveries of gas pursuant to Section 1 of Ar-

ticle IX of said Gas Contract, subject to the reservation of our right to revoke the authority of Michigan Gas Transmission Corporation to receive payments directly from you, as provided in Section 2 of Article IX of our Gas Contract with Michigan Gas Transmission Corporation dated March 17, 1936.

Will you kindly acknowledge receipt of this notification and advise us that the foregoing provisions relative to [fol. 15900] your dealing directly with Michigan Gas Transmission Corporation are agreeable to you, by signing the confirmation at the foot of the enclosed copy of this letter and returning said copy to the undersigned.

Yours very truly,

PANHANDLE EASTERN PIPE LINE COMPANY,

By Leith V. Watkins, Secretary.

We hereby acknowledge receipt of the foregoing notification and it is agreeable to us to deal directly with Michigan Gas Transmission Corporation as requested, subject to the reservation of our right to revoke this acceptance at any time.

DETROIT CITY GAS COMPANY,

By Wm. G. Woolfolk, President.

U. S. Department of Labor
Bureau of Labor Statistics
Washington

For Immediate Release
March 26, 1942
(LS 42-844)

Wholesale Prices for Week Ended March 21, 1942

Prices for commodities in primary markets edged fractionally higher during the week ended March 21, largely because of advances in quotations for grains and livestock. The Bureau of Labor Statistics' comprehensive index of nearly 900 price series rose 0.1 percent to the highest point since the Autumn of 1928. At 97.2 percent of the 1926 level the index shows a gain of 0.7 percent over the corresponding week of February and is 19 percent above a year ago.

The index for the farm products group advanced 0.8 percent; miscellaneous commodities, 0.3 percent; and hides and leather products and building materials, 0.2 per cent. With lower quotations for fruits and vegetables and for pork, food prices declined 0.3 percent on the average during the week.

Marked increases in prices for livestock, except hogs, together with higher quotations for most grains and for cotton and tobacco brought average prices for farm products in primary markets to the highest level since October 1929. Quotations were lower for barley, rye, and hogs. In the past month, farm product prices have risen 1.2 percent and are nearly 43 percent higher than at this time last year.

A sharp decline for bananas together with lower prices for oranges, eggs, flour and for potatoes, cheese and pork in the Chicago market accounted for the slight decrease in average prices for foods. Higher prices were reported for butter, corn cereals, rice, apples, lemons sweet potatoes, onions, canned corn and beans, for cured beef, mutton and for peanut butter. Notwithstanding the decline, food prices in primary markets are 0.7 percent higher than

for the corresponding week of February. Average prices for cattle feed advanced 4.8 percent during the week.

Minor increases were reported in prices for shoes, luggage and for goatskins. Gasoline quotations in the Mid-continent area continued to drop.

The increase in building materials resulted from higher prices for brick, linseed oil and for maple flooring, red cedar shingles, yellow pine boards and certain types of spruce and white pine lumber. Prices were lower for most types of yellow pine lumber and for turpentine and rosin.

The following tables show (1) index numbers for the principal groups of commodities for the past 3 weeks, for February 21, 1942 and March 22, 1941 and the percentage changes from a week ago, a month ago, and a year ago (2) percentage changes in subgroup indexes from March 14 to March 21, 1942.

[fol. 15917] (Exhibit 218.)

Testimony of Mr. Joe D. Creveling Before the Securities and Exchange Commission on November 29, 1941, In the Matter of Columbia Gas & Electric Corporation, et al., File No. 59-33, etc.

[fol. 15917-a) Before the Securities and Exchange Commission.

In the Matter of
Columbia Gas & Electric Corporation, et al.
File No. 59-33 etc.

Hearing Room 1102
Securities and Exchange Commission Building,
Washington, D. C.
Saturday, November 29, 1941.

Met, pursuant to adjournment, at 10 o'clock a. m.

Before:
James G. Ewell, Examiner.

Appearances:

Ambrose Selig, William R. Nowlin and Sidney Willner, Appearing for the Securities and Exchange Commission.

William H. Button, James B. Alley and Charles R. Lowther, Appearing for Columbia Oil & Gasoline Corporation.

Wayne Johnson, Jr., Edward S. Pinney, William Wemple, and Frederick S. Beebe, of Cravath, DeGersdorff, Swaine, & Wood, Appearing for Columbia Gas & Electric Corp., Michigan Gas Transmission Corporation, and Indiana Gas Distribution Corporation.

Robert J. Bulkley, Arthur Logan, and Russell Hardy, and Richard B. Hand, 111 Broadway, New York, Appearing for Missouri-Kansas Pipe Line Company.

Edwin N. Goodwin and William L. Glenn, appearing for Panhandle Eastern Pipe Line Company.

[fol. 15918] The Examiner: It may be so marked.

(Commission's Exhibit A-8 was marked for identification.)

Mr. Laylin: May I have the same opportunity Mr. Alley has?

The Examiner: Yes.

Mr. Selig: May I call Mr. Creveling to the stand for the purpose of cross-examination.

Mr. Goodwin: Mr. Examiner, it was agreed on the record, I believe yesterday, that these proceedings were closed except for cross-examination of the witnesses that had testified in connection with the Panhandle Eastern financial program.

Mr. Creveling was not one of those witnesses, but he was produced here today, and I would just like to have it made clear that Mr. Creveling's testimony is to relate only to Panhandle Eastern's financial program.

Mr. Selig: That is the only testimony I hope to elicit from Mr. Creveling.

Whereupon, JOE D. CREVELING, a witness previously called on behalf of Applicant, and duly sworn, resumed the stand and testified further as follows:

Cross-Examination.

By Mr. Selig:

Q. Mr. Creveling, what is the estimated gas reserves [fol. 15919] of the Amarillo and Hugoton fields from which Panhandle Eastern derives its gas?

A. I do not know.

Q. Isn't it a fact that it is stated in this application that the gas reserves are estimated, as an estimated life of 25 years?

A. That, Mr. Selig—I may have misunderstood your former question. If you mean the estimate of the reserves under the acreage owned or controlled by Panhandle Eastern, that I do know.

Q. Yes. What is that?

A. That is the Amarillo field, in round figures, 700,000,000,000 cubic feet and in the Hugoton field, 1,700,000,000,000-one trillion, seven hundred billion cubic feet, or a total of about two and one-half trillion cubic feet of recoverable reserves.

Q. Is that known and unknown portions of the field?

A. That is under our acreage which we consider that we definitely can estimate reserves as existing.

Q. And what is the estimated life of that field?

A. That I do not know because that depends entirely on the rate of withdrawals.

Q. What would you estimate the life of that reserve under present rates of withdrawal?

A. The present rate of withdrawal of the Panhandle [fol. 15920] Eastern Pipe Line Company from that area, meaning the two fields, is approximately 62 billion; that is for 1941. For 1942 it will be higher than that, and might easily be assumed over a reasonable period of time to be 80 billion cubic feet. If you will divide two and one-half trillion—we are getting into big figures here, but, of course, seeing the national debt, we are getting more or less used to it—if you divide two and one-half trillion by an estimated requirement of 80 billion for the market's present and prospective of Panhandle Eastern, you would get a life of something around thirty years, maybe a little over.

Q. Now, in the application filed here in Panhandle Eastern financing, it is stated that the estimated life is 25 years.

A. That is correct. I believe that statement, made by independent geologists, as well as by our own, is that it is at least 25 years.

Q. At least 25 years?

A. Yes.

Q. Now, in arriving at that estimate, did you consider the factor of competition as sucking out the gas from the common reserve?

A. We did.

Q. In considering that factor there is a competitive condition there as between the company drawing from [fol. 15921] that common reserve, isn't that so?

A. That is theoretically correct, but is more practically correct in the Amarillo today than in the Hugoton areas.

Q. That factor is so variable, depending upon how much each company which draws from that common reserve draws out of it, isn't that correct?

A. Our acreage and our wells are so located that all we are estimating in taking from under that acreage, is the gas in place there at the present time. We believe that acreage is so blocked and located that if any drainage were to happen the flow would be towards our acreage rather than away from it.

Q. Outside of the Amarillo field and the Hugoton field, have you any other reserve?

A. That depends on your definition of the Hugoton field, Mr. Selig.

Q. Well, what is your definition of the Hugoton field?

A. We are now using as a definition of the Hugoton field, not only that part of the producing area in Kansas, but also in the Oklahoma Panhandle, and extending over into Hansford County, Texas, but to date not joined with the Amarillo field, which is entirely in Texas.

Q. And that adjoining is unproven today?

[fol. 15922] A. No, it is proven. We believe that that is all a part of a common reservoir, therefore we are now calling it the Hugoton area, while probably it should have been named something else in order to keep from confusion as to the original Hugoton field, which was in southwestern Kansas. The answer to your question is except in those two areas we have no other sizeable reserve at this time.

Q. Are you acquiring any new acreage?

A. We are.

Q. And will you tell us approximately where you are acquiring that acreage?

A. We are acquiring that acreage entirely in the Hugoton area.

Q. What effect will that have upon reserve?

A. That will increase the reserves.

Q. Is it estimated approximately how much that will tend to increase?

A. No, that has not been done because that policy was really only started in the past few months.

Q. Now, considering the factors—

A. I do not want to be misunderstood on that. We have been rearranging and reblocking our acreage for many

years. As a matter of fact, when I went with the company in 1936, we had under lease about 195,000 acres and under purchase contract for the life of commercial production [fol. 15923] about 23,000 acres. As of June 30, of this year, we had under lease about 250,000 acres and something over 72,000 acres under purchase contracts.

We had until we began to interpret it in terms of reserve requirements the effect of the present defense program, considered that we were in very good shape for all times to come. We still think we are in good shape, but when we saw what that was doing to our market requirements we started gradually building up this acreage and we are carrying on that program at this time.

Q. Are you contemplating a new line into Michigan?

A. I presume you are referring to some construction work now in progress to serve distribution systems owned largely by the Consumers Power Company. If you are, that is in process of construction now.

Q. And in the sale of gas to those two customers how will that affect the reserves?

A. The volume required to serve that market is included in the figures I have given you.

Q. Mr. Creveling, you said that you are purchasing contracts or other portions of property for the purpose of strengthening your reserve?

A. That is right.

Q. Could you tell us to what extent, or what limitations there are in purchasing those properties to increase [fol. 15924] your reserve?

A. That is rather a difficult question to answer, Mr. Selig.

We are strengthening our reserves in more than one way. Not only are we acquiring some additional acreage which has not yet obtained the position of being subject to any great drilling programs, and we are also blocking acreage by trading as well as by acquisition, in order to have satisfactory drillings in the Hugoton field.

We have a program, I think, in our budget, as I recall the figure as $40,000, and probably will have some such an

item in our 1942 budget, although of course that has not been before the Board for approval, and we will keep acquiring acreage and blocking acreage as our business judgment indicates we should.

Q. And that is in the same Hugoton area?

A. That is correct, but it is getting away from that part of it in which the production, major part of the production is now coming.

Q. And could you tell us what limitations there would be in acquiring this extra acreage?

A. I could give you my thought on that matter. My thought is that we should acquire property, as much as 25 or 30 thousand acres of additional reserve within the next couple of years.

[fol. 15925] Q. Well, is there any limitation upon your opportunity to acquire that amount of acreage?

A. That is the reason, one of the reasons why we are doing it at this time, one, because the acreage is available now to the greatest extent anyone could figure we would need additional reserve, and, second, it is not in demand today by other existing or potential projects, and therefore it can be acquired on a more favorable basis.

Q. Mr. Creveling, if it would be your program to get a reserve to last for that 25 years, say for 35 years, would you be able to get it in that field?

A. I have no hesitancy at all in stating that it is my best judgment that we could, if you will accept my definition of the Hugoton area.

Q. Well, will you describe the limitations, boundaries of the Hugoton area?

A. If I had a map I could show you. Roughly it includes all southwestern Kansas, the Oklahoma Panhandle, particularly Texas County, and Sherman and Hansford Counties, Texas.

Mr. Selig: Off the record, for the time being.

(Short discussion off the record.)

Mr. Selig: On the record.

The Witness: A. The general Hugoton area includes the counties of southwestern Kansas, and in addition [fol. 15926] Texas County, Oklahoma, and parts of Sher-

man and Hansford Counties of Texas; and with that definition of the Hugoton area it is my judgment that if I were assigned the problem of obtaining additional gas reserves to meet the present indicated requirements of this company for 30 or 35 years, it could be done on a favorable and economical basis.

By Mr. Selig:

Q. It is my understanding, Mr. Creveling, that you have a construction program in the next five years that will require an expenditure of approximately $40,000,000 and in that construction program you would draw upon your gas reserves?

A. That is correct.

Q. Will you please state on the record just what effect that will have upon gas reserves?

A. First, I would like to say, Mr. Selig, that such construction program is only one that the management continues to develop looking forward to its future requirements and its ability to meet its public obligation.

In the figures I have already given you as to probable market requirements of the future, in addition to what they have been and are now, that construction program has been given full weight.

To be more specific I indicated our present market requirements were about 62 billion cubic feet per year. That [fol. 15927] will go to seventy, will then go to eighty, and possibly a little above eighty billion cubic feet per year, and the ultimate amount of that probable requirement is determined by this construction program.

Q. In other words, the construction program is taken into consideration in estimating the life of gas reserve?

A. That is correct.

Q. And in estimating that gas reserve, you are increasing it by virtue of the fact that you are going to have a big construction program?

A. That is exactly correct.

Q. Now, when there is an estimate made on the life of gas reserve, there are many variable factors, such as the competition sucking out gas from a common reservoir. Under such circumstances, isn't it a fact that it is impos-

sible to make a scientific estimate of the life of the gas reserve?

A. I do not know how exact science is. All things are approximations. Probably the best they can be is scientific guesses.

Q. Because of these probabilities that come into the estimate, is that correct?

A. Yes.

Now, we have to do some crystal gazing, if you please, as to what is going to happen along lines over which we do [fol. 15928] not have complete control, such as the probable takes of others out of the common pool, as you term it, and we have given what we think is proper weight to the effect of takes from this common pool on the reserve under our acreage, and that controlled through purchase contracts in arriving at this judgment figure.

Q. Do you know how many other companies are drawing from this common pool?

A. I probably could name all the large ones, if you would like to have them in the record.

Q. Approximately, you do not have to name them.

A. Well, there are four or five major pipe line companies out of the Amarillo area, and only one other large one at the present time that I recall out of the Hugoton area.

Q. And how about the Amarillo field?

A. There are four or five out of the Amarillo area.

Q. Are these companies comparable in size to Panhandle Eastern?

A. I should say that Panhandle Eastern is as large on requirements as any of them, and larger than some of them.

Q. Now Mr. Creveling, in the event that the source of supply is depleted in the known areas in the Hugoton field, and you would have to seek another source of supply, that [fol. 15929] is, another known source of supply, which probably would be somewhere in Louisiana, or in a place remote from the present Panhandle line, what effect would that have upon the transmission lines from the Texas Panhandle to your important areas?

A. That would all depend on the approximate location of this other source of supply.

Q. I realize that that question has that factor in it, but I want to ask you, taking into consideration the remoteness of the new source of supply and the location of that source of supply.

A. A partial answer to your question, Mr. Selig, I think is this: In case pending before the Federal Power Commission known as Docket G-207, I have the misfortune of being a witness.

Q. I think you are fortunate in being a witness here.

A. In that case we did not consider this theoratical, or this possible failure of the supply in the areas from which we are now taking our reserve of sufficient importance to claim it as a hazard in asking for a more than a fair rate of return on our investment.

Q. And you were not called upon in that case to give an answer to that question?

A. That is correct.

Q. You are more fortunate in this case?

[fol. 15930] A. That, of course, would be a serious proposition from the standpoint of any pipe line company as long as this pipe line company is. We might have to go —well, we would have to go where the supply is or fold up. We might go to the, farther down in Texas, or we might go into the Louisiana area, and get a part or all of our requirements, but I hope that does not happen while I am still president of Panhandle Eastern.

Q. In order to ease your mind on that question, I am going to ask you this: On the present state of facts as known by you, that is a very, very remote contingency?

A. It most definitely is, Mr. Selig. I would say if there were any chance of it being a contingency, I would have claimed it a hazard in the case I just mentioned.

[fol. 15930-a] Mr. Selig: I have no further question. Thank you, Mr. Creveling.

The Examiner: Does anyone else wish to ask the witness any questions?

Mr. Logan: I have one or two questions.

By Mr. Logan:

Q. Mr. Creveling, you were here this morning when Mr. Watkins was on the stand, were you not?

A. Yes, sir.

Q. You heard the questions and answers when he was on the stand?

A. Yes, sir.

Q. You are familiar with the resolution [e] were discussing at that time which was read into the record?

A. Yes, sir.

Q. As President of the Company do you know of any objections which the Company as such could have to a vote being given on the Preferred Stock on a share for share basis equal to the vote on the Common?

A. You mean from the Corporation's standpoint?

Q. Yes?

A. No, sir; I know of none.

Q. In your judgment could the Company, Panhandle Eastern, be hurt in any way by having a vote placed on this new proposed preferred stock?

[fol. 15930-b] A. I know of no way in which the corporation could be hurt.

Q. When you say a vote, you mean a share for share vote, a full vote?

A. That would not be an unreasonable allocation.

Q. If the Securities and Exchange Commission should determine that such a vote should be placed upon this Preferred Stock, and they should make that a term or condition for these securities to secure the exemption you request under 6-B, would you be willing as President and a Director, to recommend that that be done?

A. If I understand your question, it is that the SEC would make that a condition to approval of the financial plan.

Q. Yes?

A. If that were a condition necessary to carry out the project, I would unqualifiedly recommend that it be done.

Mr. Morgan: That is all.

Mr. Selig: That is all.

Mr. Laylin: I have one or two questions.

By Mr. Laylin:

Q. Now, none of your answers, I take it, are to be construed to mean that if the condition is not imposed that you would recommend it?

A. That is correct.

Mr. Laylin: That is all.

[fol. 15930-c] The Examiner: Any other questions?

Mr. Button: May I ask one or two questions?

The Examiner: Yes.

By Mr. Button:

Q. You say that the corporation could not be hurt by this stock having a vote. Couldn't it be hurt if that stock fell into the wrong hands, from a business standpoint?

A. Mr. Button, I answered that question purely from the position I occupy as President of the Corporation, and I trust you will take the answer to only go to that extent.

Q. That is, theoretically you are correct?

A. That is correct.

Q. But practically you might be wrong?

A. That might possibly happen.

Mr. Button: That is all.

The Examiner: Mr. Creveling is excused.

(Witness excused.)

[fol. 15931] (Exhibit 219.)

Panhandle Eastern Pipe Line Company

Gas Sales and Purchase Contracts

Copy of Report by Bureau of Internal Revenue and Related Correspondence

[fol. 15932] #607444

Treasury Department
Internal Revenue Service

St. Louis, Missouri
December 9, 1941

Office of
Internal Revenue Agent in Charge
St. Louis Division

Panhandle Eastern Pipe Line Co.,
1100 Midland Building,
Kansas City, Missouri.

Supplemental Report

In re:
Date of Report:
Year (s) Examined:

Income Tax
November 25, 1941
1936, 1937, 1938, 1939

Gentlemen:

There is enclosed for your information and files a copy of a report covering the examination of your income tax return(s) for the year(s) indicated, recently made by a representative of this office. You have indicated your agreement to the adjustment of tax liability shown in the report.

The item checked below explains briefly how settlement of the agreed tax liability will be accomplished through the office of Collector of Internal Revenue for your district.

Respectfully,

EARL E. WATERS,
Acting Internal Revenue Agent in Charge.

Enclosure:

Form of Acknowledgment.

Report of Examination.

Deficiency: The Collector will present to you at an early date a bill for payment of the tax, together with interest, at which time remittance should be made to that official, provided you have not already paid the full amount due.

(XX) Net Deficiency: After the overassessment(s) have been certified to the Collector by the Commissioner of Internal Revenue, you will be presented with a bill for the amount due, at which time remittance should be made to the Collector.

Net Overassessment: After the overassessment(s) have been certified to the Collector by the Commissioner of Internal Revenue, you will be advised as to how the overassessments have been applied, and will receive a check for the amount due you.

Overassessment: After the overassessment(s) have been certified to the Collector by the Commissioner of Internal Revenue, you will receive a check in payment of the overassessment and interest, provided there are no outstanding taxes against which the amount should be credited.

HCW:MLF

Statement of Total Tax Liability

Year	Tax Previously Assessed	Deficiency	Overassessment	Correct Tax Liability
Income Tax				
*1936	$ 153,419 40	$	$ 3,629 37	$ 149,790 03
1937	-0-	-0-	-0-	-0-
1938	504,991 69	30,014 56		535,006 25
1939	785,116 82	19,481 23		804,598 05
Totals	$1,443,527 91	$ 49,495 79	$ 3,629 37	$1,489,394 33

*In lieu of overassessment of $23,233.91 recommended in Revenue Agent's report dated June 9, 1939.

Year — 1938

Original tax	$468,639 69
Deficiency assessed, 1939	36,352 00
Tax previously assessed	$504,991 69

Preliminary Statement

The principal causes of the change in tax liability are the disallowance of amortization of gas sales and purchase contracts acquired from predecessor company without recoverable basis, adjustment of percentage depletion and disallowance of excess accrual for Texas franchise taxes as allowed in original reports referred to in attached schedules.

The changes were discussed with Leith V. Watkins, Secretary, N. F. Paxton, Assistant Secretary, and Arthur Anderson & Co., Accountants. Form 874 has been executed.

The statements made in the taxpayer's claim for refund for 1936 in the amount of $39,057.17 filed May 7, 1938, have been considered in connection with this redetermination of the tax liability for that year. Its partial allowance in the amount of $3,629.37 in lieu of the $23,233.91 recommended in the original Revenue Agent's report dated June 9, 1939, is now allowable. Accordingly,

the difference, $35,427.80, is recommended for disallowance.

[fol. 15935] In re: Panhandle Eastern Pipe Line Co.

Schedule 1
1936
Adjustments to Net Income

Net income as disclosed by Revenue Agent's report dated 6-9-1939		$ 875,636.61
As corrected		1,006,333.57
Net adjustment as computed below		130,696.96
Unallowable deductions and additional income:		
(a) Amortization of gas sales and purchase contracts disallowed	$119,920.11	
(b) Depletion allowance decreased	10,776.85	
Total		$ 130,696.96
Nontaxable income and additional deductions:		-0-
Net adjustment as above		$ 130,696.96

Schedule 1-A
1936
Explanation of Items

(a) In original Revenue Agent's reports for 1936, 1937, 1938 and 1939, an amortization of the book value of gas purchase and sales contracts computed on a composite life of 20 years was allowed in computing the taxable income subject to approval and verification by the Valuation Section of the Internal Revenue Bureau in Washington. It has since been disclosed that this book value exceeded the taxable basis recoverable by $2,398,402.19, which is the value at which a portion of the contracts were received from the Missouri-Kansas Pipe Line Co. in October, 1930. The latter company at that time owned all the stock of Panhandle Eastern Pipe Line Company, and as provided in Section 113 (a) (8) of the Revenue Act of 1928 the taxpayer has a taxable basis to be recovered the same as in the hands of the transferor. Further investigation discloses that these contracts were acquired for stock from a partnership, Shippey, Maddin and Parish Gas Company, which at that time in 1928 owned all the stock of Missouri-Kansas Pipe Line. It has been also disclosed that the partnership had no cost in acquiring the contracts and reported no taxable profit on the transfer of the contracts to the corporation for stock. See Exhibits B and B (1).

[fol. 15936]

Under the circumstance described the amortization allowed on the book value set up on the contracts received from the Missouri-Kansas Pipe Line Co. in the original report is being eliminated.

Book value of contracts received from Missouri-Kansas Pipe Line Company on October 23, 1930		$2,398,402 19
Amortization allowed at 5% on above amount in original report eliminated	$ 119,920 11	

(b) In the original report percentage depletion was computed and allowed in computing taxable income at 27½% of the gross income limited to 50% of the net income from the properties. The properties were grouped in respect to the three fields in which the gas was produced for this computation.

However, in computing the 50% of the net income from the properties, productive well drilling costs and interest expense applicable to the properties was not deducted. It is now held that these are proper deductions in computing this limitation and this has been done in Exhibit C and results in reducing the allowable depletion by the amount indicated. In this connection see Helvering vs. Wilshire Oil Company, 1939-2 C.B. 213.

In computing interest deductible in arriving at the net income from the property the total interest paid has been allocated to the gas production property on the ration of the book value of such property to the book value of the total assets of the company. On this basis the interest is considered as applying to all property and assets ratably.

[fol. 15937]

Exhibit "A"

Comparison of Values of Assets Transferred to Panhandle Eastern Pipe Line Co. On October 23, 1930, By Missouri-Kansas Pipe Line Co., As Reported by Latter Company As Basis In Computing Loss on Sale In Return For Fiscal Year Ended May 31, 1931, With Values Taken Up On Books of Panhandle Eastern.

	Cost Reported By Missouri-Kansas Pipe Line Co.		Taken Up By Panhandle Eastern		Increase or (Decrease)

(a) As per agreement of May 28, 1928, referred to in resolution of Board of Directors, copy attached.

[fol. 15939] Exhibit "B-1"

Resolution of Board of Directors of Missouri-Kansas Pipe Line Company in re acquisition of pipe line construction and gas purchase and sales contracts from Shippey, Maddin & Parish Gas Company, a co-partnership.

Whereas, C. S. Shippey, S. J. Maddin, and Frank P. Parish, co-partners doing business under the firm name of Shippey, Maddin and Parish Gas Company, have made a written offer to this company dated May 28, 1938, offering to assign transfer and set over to this company as of the close of business on April 30, 1928, all of the pipe lines, gas purchase and gas sales contracts and other property mentioned in said written offer upon the terms and for the consideration therein stated, and,

Whereas, the Board of Directors is of the opinion based upon the engineers report of Brokaw, Garner, Dixon and McKee and from other investigations and study that said properties and contracts and rights and privileges mentioned in said written offer have a fair market value of more than $1,800,000, and that the acceptance of said written offer is advisable and in the best interests of the company, now therefore be it,

Resolved that said written offer of C. S. Shippey, S. J. Maddin and Frank P. Parish, Co-partners doing business under the firm name of Shippey, Maddin and Parish Gas Co., be and the same hereby accepted and the president or vice-president and the secretary be and they are hereby authorized, empowered and directed to do all such things as they deem necessary or desirable for the purpose of carrying out the terms of said written offer into full force and effect and upon the delivery to the company of good and sufficient instruments of conveyance, assignment and transfer setting over to the company the pipe lines and other properties and the gas purchase and gas sales, contracts and other rights and privileges mentioned in said written offer and also upon said C. S. Shippey, S. J. Maddin and Frank P. Parish performing the other terms set forth in said written offer the company shall and hereby does assume the obligations not exceeding $630,000.00 in amount mentioned in said written offer and said officers are authorized and directed to execute and deliver

to said C. S. Shippey, S. J. Maddin and Frank P. Parish or their nominees certificates evidencing 185,000 shares of the fully paid and non-assessable common stock of the company of the par value of $5.00 each, and be it further,

Resolved that the assignment and transfer to the company of said gas purchase and gas sales contracts and other property mentioned in said written offer, and the performance by said C. S. Shippey, S. J. Maddin and Frank P. Parish of the other terms set forth therein be accepted by the company in full payment and satisfaction of the original subscriptions of said persons to 200 shares of the common stock of the company and that said 200 shares of common stock so subscribed be included in the shares of stock issued pursuant to the terms of said written offer.

The president announced that said resolutions had been adopted by the unanimous vote of all of the directors of the company.

[fol. 15940] Panhandle Eastern Pipe Line Company
Ninety Broad Street
New York

November 7, 1941

Mr. N. F. Paxton, Assistant Secretary,
Panhandle Eastern Pipe Line Company,
1221 Baltimore Avenue,
Kansas City, Missouri.

Dear Mr. Paxton:

Federal Income Taxes
Years 1936, 1938 and 1939

It is my understanding that having made the adjustments in taxable net income, suggested in both reports by and conferences with the Internal Revenue Department's examiners, for the items we have satisfied ourselves are proper additions or deductions to the reported net taxable income, as well as for the items with respect to the propriety of which there has been some doubt in our minds, there is involved additional taxes amounting to

$45,866.42, represented by additional assessments of $30,014.56 and $19,481.23 for the years 1938 and 1939, respectively, less an overassessment for the year 1936 to $3,629.37—1937 was a loss year.

As you know, much consideration has been given to the procedural and technical aspects of attempting to prove a depreciable basis of certain assets; that the surrounding direct and indirect circumstances which might possibly be involved in contesting the Government's position have been explored; and that thought has been directed to estimating the net effect on the income taxes for the past and for the income and excess profits taxes for the future by ourselves, the tax representatives of Messrs. Arthur Andersen & Co., and Mr. B. H. Bartholow of the firm of Dunnington, Bartholow & Miller. You are likewise familiar with the fact that all of these matters and questions have been discussed with Messrs. Creveling and Nenner several times.

At the meeting of the Board of Directors held October 30, 1941, I gave a resume of the situation as to the open years during which it was stated that in the light of the circumstances there was an unanimity of opinion by the Company's officers that the Company should forego any further effort of sustaining as proper deductions any item now in dispute, and that in the absence of a contrary view by the Board or of further favorable developments [fol. 15941] the officers would execute whatever forms were required by the Revenue Department agreeing to the imposition of the additional taxes.

There was no contrary view expressed and as further favorable developments now seem most remote, it is requested that you arrange with the Internal Revenue Department's Kansas City office for the presentation for execution of the required forms to accomplish this disposition.

Yours very truly,

LEITH V. WATKINS,
Secretary-Controller.

Form 874
Treasury Department
Internal Revenue Service
(Revised August 1937)

(Date Received

Waiver Of Restrictions On Assessment
And Collection Of Deficiency In Tax
And Acceptance Of Overassessment

Pursuant to the provisions of Section 272 (d) of the Revenue Act of 1938 and/or the corresponding provisions of prior Revenue Acts, the restrictions provided in Section 272 (a) of the Revenue Act of 1936, and/or the corresponding provisions of prior Revenue Acts, as amended, are hereby waived and consent is given to the assessment and collection of the following deficiency or deficiencies in tax:

taxable year ended December 31, 1938	income tax in the sum of	$ 30,014.5
taxable year ended December 31, 1939	income tax in the sum of	$ 19,481.2
taxable year ended	excess-profits tax in the sum of	$
taxable year ended	in the sum of	$
amounting to the total sum of		$ 49,495.7

together with interest thereon as provided by law, and the following overassessment or overassessments of tax are accepted as correct:

taxable year ended December 31, 1936	income tax in the sum of	$ 3,629.3
taxable year ended	income tax in the sum of	$
taxable year ended	excess-profits tax in the sum of	$
taxable year ended	in the sum of	$
amounting to the total sum of		$ 3,629.3

Panhandle Eastern Pipe Line Company
(Taxpayer)

Leith V. Watkins

(Corporate Seal)

(Address)

Date November 19, 1941 By Secretary-Controller

Note.—The execution and filing of this waiver at the address shown in the accompanying letter will expedite the adjustment of your tax liability as indicated above. It is not, however, a final closing agreement under Section 606 of the Revenue Act of 1928 and does not, therefore, preclude the assertion of a further deficiency in the manner provided by law should it subsequently

be determined that additional tax is due, nor does it extend the statutory period of limitation for refund, assessment, or collection of the tax.

[fol. 15943]

If this waiver is executed with respect to a year for which a Joint Return Of A Husband And Wife was filed, it must be signed by both spouses, except that one spouse may sign as the agent for the other.

Where the taxpayer is a corporation, the waiver shall be signed with the corporate name, followed by the signature and title of such officer or officers of the corporation as are empowered to sign for the corporation, in addition to which the seal of the corporation must be affixed.

Office of
Chief Counsel,
Bureau of
Internal Revenue
GC:R:MFK
C1-336576

Panhandle Eastern Pipe Line Company,
300 Fairfax Building,
Kansas City, Mo.

Dear Sirs:

This office has before it for consideration a proposed certificate of overassessment in your favor for the calendar year 1936. A preliminary review of the certificate discloses that the cause of the overassessment is the allowance of additional depreciation. Inasmuch as the information available is inadequate to enable this office to approve the overassessment it is requested that you submit the following data at your earliest possible convenience in order that the matter may be disposed of expeditiously:

1. List of gas purchase contracts and leases acquired at any time up to December 31, 1938, showing for each contract separately.

(a) Date of lease or contract

(b) Name of lessor

(c) Description of property, including acreage and location in township and state

(d) Terms of lease or contract

(e) Duration of contract

(f) Date acquired by your Company

(g) From whom acquired

(h) Consideration paid for lease or contract and to whom. If the consideration paid was not in cash complete description of consideration and manner of arriving at the value thereof should be furnished.

2. List of gas sale contracts acquired at any time up to December 31, 1938, showing for each contract separately

(a) Date of contract

(b) Names and titles of all contracting parties

(c) Duration of contract

(d) Commodity to be sold and territory covered

(e) Terms of contract

(f) Date acquired by your Company

(g) From whom acquired

[fol. 15945] (h) Consideration paid for contract and to whom. If the consideration paid was not in cash complete description of consideration and manner of arriving at the value thereof should be furnished. The information submitted under paragraphs "1" and "2" should cover the entire amount of $3,053,391.53, claimed as the cost of "Gas Sales and Purchase Contracts" as of January 1, 1936 and additional costs in the years 1936, 1937 and 1938.

3. Map showing rights-of-way held as of January 1, 1936 and pipe lines as of the same date, with additions for each of the years 1936, 1937 and 1938. An accompanying schedule should set forth the term of any of these rights-of-way that are for periods of less than 40 years.

4. With regard to each of the following depreciable asset accounts, Nos. 203, 211, 237, 238, 239, 240, 241, 242, 243, 282 and "Gas Sales and Purchase Contracts", statement of the evidence supporting the respective depreciation rates which were claimed in the amended 1936 return.

5. In the cases of depreciable assets sold, scrapped or otherwise disposed of up to December 31, 1936, record by accounts, by years, in dollars, showing:

(a) Total book cost (undepreciated) of assets disposed of

(b) Amounts charged to depreciation reserves as representing losses sustained on basis of difference between depreciated cost and salvage value of assets disposed of, if any.

(c) Amounts charged to depreciation reserves as representing the accumulated depreciation on the particular assets

(d) Amounts charged to profit and loss, if any

The "Registration Statement, under Securities Act of 1933" submitted by you to the Securities and Exchange Commission on February 12, 1937, in connection with the proposed issuance of $24,000,000 Principal amount, First Mortgage and First Lien Bonds, Series A, 4%, due March 1, 1952, contains the following comparison between deductions for depreciation accrued on your books and depreciation deducted in income tax returns:

[fol. 15946]

Period	Depreciation per* Federal Income Tax Returns	Provisions for Retirements and Renewals Charged to Income and Clearing Accounts
Year ended —		
March 31, 1931	$ 77,430 13	$ 65,686 42
March 31, 1932	646,297 16	220,240 26
Nine months ended —		
December 31, 1932	887,779 34	230,166 78
Year ended —		
December 31, 1933	1,185,674 89	446,049 06
December 31, 1934	927,286 30	436,576 84
December 31, 1935	923,829 05	432,964 22

*Exclusive of Depreciation "Gas Sales and Purchase Contracts"

It is requested that you submit a detailed statement by accounts, by years, of the amounts making up the totals of "Provisions for Retirements and Renewals Charged to Income and Clearing Accounts" with detailed explanations as to the reasons for the differences between the amounts thus listed and the amounts deducted in income tax returns. This statement should also include the year 1936.

Very truly yours,

J. P. WENCHEL,
Chief Counsel.

Dear Sir:

Overassessment of Federal Income Tax

For the Year 1936

GC:R:MFK

CL-336576

The additional information you recently requested to enable you to approve the overassessment of Federal Income Tax against this Company for the year 1936, is enclosed.

The lists, tables, maps and explanations requested are all indicated by item numbers to conform to your letter dated April 11, 1940.

This matter has been pending for some time now and we sincerely trust this rather voluminous additional data

will be sufficient to enable you promptly to execute the certificate of overassessment.

Yours very truly,

LEITH V. WATKINS,
Secretary-Controller.

Kansas City, Missouri.

Dear Sirs:

Further reference is made to the consideration of a proposed certificate of overassessment for the calendar year 1936. Review of the schedules submitted with your letter of August 21, 1940 discloses that additional information will be necessary in order to pass on the merits of your claim. It is accordingly requested that you submit the following data at your earliest possible convenience in order that the matter may be disposed of expeditiously:

1. Complete details of the valuations by the Board of Directors of Panhandle Eastern Pipe Line Company of:

(a) The individual gas purchase contracts, and

(b) The individual gas sale contracts acquired from Missouri-Kansas Pipe Line Company on September 1, 1930, accompanied by record of comparable sales and other evidence serving as the basis for such valuations.

2. The statements accompanying the lists of gas purchase contracts and gas sale contracts acquired subsequent to September 20, 1930 and prior to December 31, 1938,

Item 1, List B, and Item 2, Sheets 3 and 4, attached to your letter of August 21, 1940, set forth that "The cost of acquisition of these contracts was not capitalized." It is requested that you submit a detailed statement for each of the years 1930 to 1938, inclusive, of all costs incurred in obtaining these contracts, setting out the manner in which such costs were charged to expense.

[fol. 15955] 3. The list of gas sale contracts (Item 2), attached to your letter of August 21, 1940, does not show under "Terms of Contract" the agreed selling price or prices of the gas engaged to be sold. It is requested that this information be furnished.

Very truly yours,

J. P. WENCHEL,
Chief Counsel.

Dear Mr. Wenchel:

Overassessment of Federal Income Tax

For the Year 1936

GC:R:MFK

CL-336576

The additional information requested in your letter dated October 3, 1940, to enable you to approve the overassessment of Federal Income Tax against this Company for year 1936, is enclosed.

The tables, explanations and comments are indicated by item numbers to conform to your request.

Yours very truly,

LEITH V. WATKINS,
Secretary-Controller.

[fol. 15957] Item No. 1 of Letter Dated October 3, 1940
(GC. R: MFK CL-336576)
The Details of the Valuations of
(a) The Individual Gas Purchase Contracts
and (b) the Individual Gas Sale Contracts
Acquired by Taxpayer from
Missouri-Kansas Pipe Line Company
on September 1, 1930

The aggregate value of the gas sale and purchase contracts acquired from Missouri-Kansas Pipe Line Company on September 1, 1930, together with other assets acquired as at the same date, was determined by the sale by Missouri-Kansas Pipe Line Company, through which these contracts were acquired by the Taxpayer. A recital of further particulars follows:

In 1930, the Taxpayer (a wholly-owned subsidiary of Missouri-Kansas Pipe Line Company) was engaged in the construction of a natural gas pipe line from Texas to Illinois which construction was being financed by Missouri-Kansas Pipe Line Company. In connection with the financing, as of September 30, 1930, a three party contract was entered into by Missouri-Kansas Pipe Line Company, the National City Company and Columbia Oil & Gasoline Corporation which provided, among other things, for the following:

Missouri-Kansas Pipe Line Company would (a) transfer to Taxpayer certain of its properties and assets as of September 1, 1930; (b) cancel any obligation or debt to it owing by Taxpayer or its subsidiary companies at that date; and (c) pay all other debts and obligations of Taxpayer and its subsidiaries existing at that date.

Columbia Oil & Gasoline Corporation would purchase from Missouri-Kansas Pipe Line Company 5,000 shares (50% of the total outstanding stock) of the common stock of the Taxpayer. The consideration for such stock was to be one-half of the aggregate of (a) the cash investment of Missouri-Kansas in Taxpayer and its subsidiaries; (b) the amount of obligations and debts of Taxpayer and its subsidiaries to be liquidated by Missouri-Kansas; (c) the agreed value, $7,333,000, of the property and other assets to be transferred by Missouri-Kansas to Taxpayer; and (d) interest on certain of these items.

By supplemental agreement dated October 23, 1930 it was agreed that the purchase price per share was to be computed exactly as set forth above except that the figure of $7,333,000 was to be reduced to $6,453,000 and the computation of interest was to be correspondingly adjusted.

[fol. 15958] The property and assets of Missouri-Kansas Pipe Line Company which were to be transferred to the Taxpayer and which were valued at $6,453,000 for the purpose of computing the price to be paid by Columbia Oil & Gasoline Corporation for 50% of the stock of Taxpayer, were carried on the books of Missouri-Kansas Pipe Line Company as follows:

Property, plant and equipment (including construction work in progress)	$2,417,948.52
Gas purchase and sale contracts	1,106,250.00
Investment in affiliated companies	913,831.42
Materials and supplies	46,140.41
Inter-company accounts receivable	476,513.89
Prepaid accounts	3,565.19
Total	$4,964,249.43

In determining the values to be placed on the respective items on the books of Taxpayer, it was recognized that the property had been but recently acquired or constructed and market value would therefore closely approximate the costs expended; that the investment in affiliated companies should be stated according to the companies' net worth at that date and that materials and supplies and inter-company accounts were equivalent in value to their

face amount. Therefore, in determining such values, the distribution of the cost established by the contract was as follows:

Total agreed consideration as per contract of September 17, 1930 as amended October 23, 1930	$6,453,000.00
Deduct—Current liabilities of the four subsidiary companies acquired	170,178.75
Total	$6,282,821.25

Values assigned to assets acquired—Property, plant and equipment, as above	$2,417,948.52
Investment in affiliated companies, at net worth of companies at that date	940,251.05
Materials and supplies, as above	46,140.41
Inter-company accounts receivable, as above	476,513.89
Prepaid accounts, as above	3,565.19
Gas sales and purchase contracts	2,398,402.19
Total, as above	$6,282,821.25

[fol. 15959] This valuation of assets was adopted by the Board of Directors on February 3, 1931 as follows:

"The Chairman stated that on October 23, 1930, the Company had acquired from Missouri-Kansas Pipe Line Company without cost to the Company, certain physical property, gas purchase and sale contracts, stocks of subsidiary companies, supplies, accounts receivable from subsidiary companies and prepaid accounts, subject to the assumption of accrued taxes and deferred liabilities on the Jacksonville property. He stated that it was desirable for the Board to place a valuation on the property so acquired to guide the Treasurer in setting up the acquisition on the books. He submitted a proposed valuation prepared by the Treasury Department and explained in detail how the valuation was arrived at. Said proposed valuation was as follows:

Property, Plant and Equipment		$2,197,475 40
Purchase and Sales Contracts		2,398,402 19
Total Property, Plant and Equipment		4,595,877 59
Construction Work in Progress		220,473 12
Total Fixed Capital		4,816,350 71
Investments in Affiliated Companies:		
Missouri-Kansas Gas Company	$627,661 22	
Central States Gas Utilities Co.	112,420 74	
J. D. Judd and Company (51%)	35,266 72	
Shale Gas Corporation (51%)	164,902 37	940,251 05
General Supplies		46,140 41
Inter-Company Accounts:		
Notes Receivable:		
J. D. Judd and Company	57,500 00	
Accounts Receivable:		
Central States Gas Utilities Co.	16,094 21	
Missouri-Kansas Gas Company	387,564 75	
J. D. Judd and Company	10,354 93	
Missouri-Kansas Gas Company	5,000 00	476,513 89
Prepaid Accounts		3,565 19
Total Assets		$6,282,821 25
Less Liabilities Assumed:		
Accrued Taxes	$ 14,066 06	
Deferred Liabilities, Jacksonville Property	18,569 56	32,635 62
Net Value Of Property Received		$6,250,185 63

"After discussion on motion duly made and seconded, and unanimously carried, the Treasurer was authorized to enter the acquisition on the books of the Company accordingly."

[fol. 15960] It will be noted from the foregoing that the value of the gas sale and purchase contracts, together with the value of other assets acquired, was determined by the sale agreement dated September 30, 1930, as amended, and that the valuations affirmed by the Board of Directors of Taxpayer were in agreement therewith. Taxpayer has no record of valuations assigned to individual gas sale and purchase contracts.

[fol. 15961] Item No. 2 of Letter Dated October 3, 1940
(GC: R: MFK CL-336576)

Statement Pertaining to Cost of Acquisition of Gas Purchase and Sale Contracts, Subsequent to September 1, 1930, and Prior to December 31, 1938

Taxpayer regrets that the wording, "The costs of acquisition of these contracts was not capitalized" in its letter dated August 21, 1940, was not clearly understandable and was such as to imply that consideration for gas purchase and sale contracts was charged to expense for certain periods and capitalized in other periods.

The contracts herein in question were acquired directly by the Taxpayer through the services of its regular employees in the Land, Industrial Sale and Business Promotion Departments. No consideration was paid for the acquisition of such contracts and the only costs which might be considered incident thereto would be automobile expense, traveling expense, telephone and telegraph expense, etc., and the portion of the salaries of employees which might be allocated in relation to the actual time spent in securing such contracts.

Such costs, in any event, could be considered only as overheads applicable to such contracts and not a party of consideration given therefor. The accounting procedures of Taxpayer did not provide for capitalization of such overheads subsequent to completion of construction of its original pipe line.

It is submitted by the Taxpayer that this policy of not making an attempt to capitalize and subsequently amortize such overheads has worked to the disadvantage of Taxpayer for tax purposes as most of the costs were incurred in loss years and the amortization would be available in subsequent profitable years. If it is the desire of the Treasury Department that costs of such nature should be capitalized and amortized over a reasonable number of subsequent years Taxpayer would be pleased to attempt to prepare an estimate of such costs, either on its own initiative or in collaboration with representatives of the Treasury Department.

[fol. 15962] (Exhibit 220.)

Panhandle Eastern Pipe Line Company

Excerpts from Minutes of Meetings of Board of Directors, Relating to Provisions for Depreciation, Depletion and Amortization

Excerpt from Minutes of Meeting of Board of Directors

[fol. 15963] February 24, 1942

Panhandle Eastern Pipe Line Company

Provision for Depreciation, Depletion and Amortization (other than Amortization of Gas Sales and Purchase Contracts) for the Year 1942

The Chairman stated that it was in order for this Board to consider and act upon the Annual Provision for Depreciation, Depletion and Amortization (other than Amortization of Gas Sales and Purchase Contracts) for the year 1942. After discussion, on motion duly made and seconded, the proper officers of the Company were unanimously authorized and directed to cause an Annual Provision for Depreciation, Depletion and Amortization (other than Amortization of Gas Sales and Purchase Contracts) of Panhandle Eastern Pipe Line Company and Illinois Natural Gas Company for the year 1942 to be made out of earnings on the basis of the present estimated volume of sales in an amount of approximately $2,200,000, which amount is not to be confused with the amount claimed for this purpose for Federal Income Tax purposes.

[fol. 15964] Excerpt from Minutes of Board of Directors Meeting, January 25, 1941

Panhandle Eastern Pipe Line Company

Provision for Depreciation, Depletion and Amortization (other than Amortization of Gas Sales and Purchase Contracts) for the Year 1941

The Chairman stated that it was in order for this Board to consider and act upon the Annual Provision for Depreciation, Depletion and Amortization (other than

Amortization of Gas Sales and Purchase Contracts) for the year 1941. After discussion, on motion duly made and seconded, Messrs. Robert J. Bulkley, A. Feison Dixon and William G. Maguire not voting, the proper officers of the Company were authorized and directed to cause an Annual Provision for Depreciation, Depletion and Amortization (other than Amortization of Gas Sales and Purchase Contracts) of Panhandle Eastern Pipe Line Company and Subsidiary Companies for the year 1941 to be made out of earnings on the basis of the present estimated volume of sales in an amount of approximately $2,100,000, which amount is not to be confused with the amount claimed for this purpose for Federal Income Tax purpose.

[fol. 15963] Excerpt from Minutes of Board of Directors Meeting, December 14, 1939

Panhandle Eastern Pipe Line Company

Provision for Renewals, Retirements, Depletion and Amortization (other than Amortization of Gas Sales and Purchase Contracts) for the Year 1940

The Chairman stated that it was in order for this Board to consider and act upon the Annual Provision for Renewals, Retirements, Depletion and Amortization (other than Amortization of Gas Sales and Purchase Contracts) for the year 1940. After discussion, on motion duly made and seconded, the proper officers of the Company were unanimously authorized and directed to cause an Annual Provision for Renewals, Retirements, Depletion and Amortization (other than Amortization of Gas Sales and Purchase Contracts) of Panhandle Eastern Pipe Line Company and Subsidiary Companies for the year 1940 to be made out of earnings on the basis of the present estimated volume of sales in an amount of approximately $1,900,000, which amount is not to be confused with the amount claimed for this purpose for Federal Income Tax purposes.

[fol. 15966] Excerpt From Minutes of Board of Directors Meeting December 22, 1937

Panhandle Eastern Pipe Line Company

After full discussion during which Mr. Creveling described the items in further detail, on motion duly made and seconded, the 1938 Annual Ordinary Construction and Retirement Budgets of this Company, as above set forth were unanimously approved, and the 1938 Annual Ordinary Construction and Retirement Budgets for the respective Subsidiary Companies were unanimously recommended to their respective Boards for approval.

Provision for Renewals, Retirements, Depletion and Amortization (other than Amortization of Gas Sales and Purchase Contracts) for the Year 1938

The Chairman stated that it was in order for this Board to consider and act upon the Annual Provision for Renewals, Retirements, Depletion and Amortization (other than Amortization of Gas Sales and Purchase Contracts) for the year 1938. After discussion, on motion duly made and seconded, the proper officers of the Company were unanimously authorized and directed to cause an Annual Provision for Renewals, Retirements, Depletion and Amortization (other than Amortization of Gas Sales and Purchase Contracts) of Panhandle Eastern Pipe Line Company and Subsidiary Companies for the year 1938 to be made out of earnings on the basis of the present estimated volume of sales in an amount of approximately $1,700,000, which amount is not to be confused with the amount claimed for this purpose for Federal Income Tax purposes.

[fol. 15967] Excerpt From Minutes of Board of Directors Meeting February 13, 1936

Panhandle Eastern Pipe Line Company

Minutes of a Special Meeting of the Board of Directors of Panhandle Eastern Pipe Line Company, held at No. 61

Broadway, New York, N. Y., at 11:00 o'clock A. M. on Thursday, February 13, 1936, pursuant to due notice.

Present:

Messrs. Gano Dunn,
James L. Harrop,
Dean Mathey,
William P. Philips and
Harold F. Reindel,

being a majority of the Directors and constituting a quorum.

The President, Mr. William P. Philips, presided, and Mr. Leith Y. Watkins, Secretary of the Company, acted as secretary of the meeting.

The Secretary stated that notice of the meeting had been mailed to each Director at least 5 days before the time fixed for the meeting.

Minutes of Last Preceding Meetings

On motion duly made and seconded, the reading of the minutes of the last preceding meetings of the Board, held February 4, 1936 and January 31, 1936, was dispensed with.

Report of Action Since Previous Meetings

The Secretary then reported the status of matters authorized and considered at previous meetings of the Board, as follows:

Revised Plan of Readjustment of Funded Debt and Capitalization, dated June 19, 1935: On February 6, 1936, steps and action required to carry out this Company's Revised Plan of Readjustment of Funded Debt and Capitalization, dated June 19, 1935, were taken pursuant to resolutions adopted by this Board at its meeting held January 31, 1936.

Provision for Renewals, Retirements and Depletion (including amortization of unoperated leaseholds)

The Chairman stated that, as one of the matters precedent to the semi-annual payment to be made February 18, 1936, as and for the Sinking Fund, it was now in order for this Board to consider and act upon the amount actually appropriated for provision of renewals, retirements and depletion (including amortization of unoperated leaseholds), for the preceding calendar year, and submitted a report prepared by the Treasurer, which is as follows:

[Vol. 15968]

Panhandle System

Panhandle Eastern Pipe Line Company And Subsidiary Companies

Suggested Provision For Renewals, Retirements And Depletion (Including Amortization Of Unoperated Leaseholds) For The Calendar Years 1935 And 1936

	Proposed Annual Rate 1935-1936	Approximate Average Base for Year 1935	Actual or Estimated Charge to Operations: Actual for Calendar Year 1935	Actual or Estimated Charge to Operations: Estimated for Calendar Year 1936

Note:

(A) No reserve provision recommended at this time.

Leith V. Watkins
Treasurer

[fol. 5969] After discussion, on motion duly made and seconded, it was unanimously

Resolved that the provision for renewals, retirements and depletion (including amortization of unoperated leaseholds) for the preceding calendar year as previously recorded on the books of Panhandle Eastern Pipe Line Company and each of its Subsidiary Companies, amounting to, in all, an aggregate of $768,197.40, be and hereby is determined to be, in all respects, approved, ratified and confirmed; and that the provision for the renewals, retirements and depletion (including amortization of unoperated leaseholds) for the calendar year 1936 be made on the basis adopted at this meeting for the calendar year 1935.

Statement under Section 17 of Mortgage Trust Indenture

The Chairman stated that as one of the matters precedent to the semi-annual payment to be made as and for a compulsory Sinking Fund for the purchase or redemption of Bonds of Series A, on February 18, 1936, it was necessary for the Company to file a summarized statement with the Trustee under this Company's Mortgage Trust Indenture, dated as of October 1, 1930, as supplemented and amended, showing:

(a) The amount actually appropriated by the Board of Directors of the Company for provision for renewals, retirements and depletion (including amortization of unoperated leaseholds for the preceding calendar year or the amount of earnings available, therefor, which ever shall be less;

(b) The consolidated net earnings (as such term is generally understood in standard accounting practice) from all sources (excluding profits derived from and losses incurred by the sale of Fixed Assets properly carried in capital account) of the Company and all its Subsidiary Companies (after eliminating all inter-company items) for said preceding calendar year, after deducting all charges including income taxes and including provision for renewals, retirements and depletion (including amortization of unoperated leaseholds) at such rates as shall have been actual-

ly determined by the Board of Directors of the Company; and

(c) An amount equal to one-half of the amount specified in the foregoing subdivision (a) plus the amount specified in the foregoing subdivision (b).

After discussion, on motion duly made and seconded, it was unanimously

Resolved that the proper Officers of this Company be and they hereby are authorized and directed to file with the City Bank Farmers Trust Company, Trustee under this Company's Mortgage Trust Indenture, dated as of October 1, 1930, as supplemented and amended, on or before February 18, 1936, a summarized statement showing:

[fol. 15970] January 17, 1933.

Excerpt From Minutes Of Board Of Directors Meeting

February 15, 1933

Panhandle Eastern Pipe Line Company
And Subsidiaries

To The Directors Of Panhandle Eastern Pipe Line Company And Subsidiaries:

Pursuant to instructions of the Board of Directors, I have reviewed the property reserves of the Panhandle System Companies and recommend that provision for depreciation, amortization of leaseholds and depletion, be provided for the Panhandle Eastern Pipe Line Company and Subsidiary Companies for the nine months ended December 31, 1932 in accordance with the rates shown in the following schedule.

	Proposed Annual Rate—1932	Estimated Charge to Operations: Base, November 30, 1932 Book Values	Estimated Charge to Operations: Estimated Accrual 9 Months to Dec. 31, 1932
Cental States Gas Utilities Company:			
Total Property Account	2 1/2%	$ 375,000	$ 7,000
Macon Gas And Electric Light Company:			
Property Abandoned	—	$ 11,000	(See Note A)
Other Property	2 1/2%	92,000	$ 1,700
Total Property Account		$ 103,000	$ 1,700
Missouri-Kansas Gas Company:			
Total Property Account	—	$ 279,000	(See Note B)
Panhandle Eastern Pipe Line Company:			
Gas Sales and Purchase Contracts:			
(1) Operated Contracts of a 20 Year Life	5%	$ 642,000	$ 24,100
(2) Other Contracts (From Records of Predecessor Company)	—	2,411,000	(See Note A)
Intangible Items (Organization, Engineering, Legal Expenses, and Taxes during Construction, etc.)	—	2,186,000	(See Note A)
Fixed Property	1%	28,498,000	$ 213,800
Total Property Account		$33,737,000	$ 327,900
Panhandle Illinois Pipe Line Company:			
Intangible Items	—	$ 453,000	(See Note A)
Fixed Property	1%	7,626,000	$ 57,200
Total Property Account		$ 8,079,000	$ 57,200
Texas-Interstate Pipe Line Company:			
Leaseholds, Etc.:	.003¢ Per MCF Produced		
Operated		$ 256,000	$ 7,000
Unoperated	6%	1,513,000	68,100
Intangible Items	—	393,000	(See Note A)
Other Property (Wells, Camps, etc.)	6%	1,238,000	55,700
Total Property Account	Y	$ 3,400,000	$ 130,800
Total — Panhandle Eastern System		$45,973,000	$ 434,600

Notes:

(A) No reserve provision recommended at this time.

(B) Missouri-Kansas Gas Company: This Company's properties are being exhausted somewhat more rapidly than provision for retirement and depletion can be made out of present earnings, and recapitalization or revaluation of its no-par stock will be required to meet this situation. Pending such recapitalization, it is recommended that any "net income" before depreciation be credited to reserves.

F. B. Flahive.

[fol. 15972] Excerpt From Minutes of Board of Directors Meeting May 5, 1932

Panhandle Eastern Pipe Line Company and Subsidiaries
Rates for Establishing Depreciation and Other Reserves

It is recommended, now that the construction work of main line system has been completed, that reserves be provided out of income to cover depreciation of equipment and structures and for the amortization of gas rights and leaseholds, and also of the book value of gas purchase and sales contracts, at the following rates per annum:

(1) 1% of the approximate book value of the main transmission and lateral lines, compressing stations and related properties, exclusive of undistributed items such as interest, taxes, legal expenses during construction, etc.

(2) 6% on the approximate value of wells and structures.

(3) 4% on the approximate value of unoperated leaseholds.

(4) $.003 per M. C. F. of gas produced for amortization of the gas rights in operated acreage.

(5) Gas purchase and sales contracts valued on books @ $3,053,391.53, as follows:

(a) 5% of the value of gas sales contracts now carried as an asset in amount of $642,286.30 as it applies largely to specific contracts of 20 year life.

(b) No action on the value of other gas purchase and sales contracts, ($2,411,105.23) pending further review of the basis and reason for establishing this asset, (a part of which first appeared on the records of a predecessor company) when a more definite recommendation will be made as to the disposition of this item.

(6) 2½% of the approximate value of gas distribution property.

(7) A flat rate of $60,000 per annum for the Missouri-Kansas Gas Company, pending completion of the inventory of physical property now in progress, at which time further recommendations will be submitted.

[fol. 15973] (8) A flat rate of $12,000. per annum for J. D. Judd & Company. This is at the rate of approximately 12% of book value of this Company's property account. Included in this Company's plant account is value of dry wells, which with lessened drilling and greater drain on the present production facilities, requires a relatively greater accrual for this reserve.

(9) A flat amount of $6,900. per annum for the Shale Gas Corporation, pending further review of the necessity of recapitalizing this Company, some two-thirds of the stock of which was issued a few years ago for certain gas acreage, all of which acreage so purchased, has since been surrendered, or the leases have expired.

The foregoing rates for creating reserves for depreciation, amortization of leaseholds and gas rights, and the amortization of the value of gas purchase and sales contracts, are recommended for the period ended December 31, 1932, at which time the subject should be reviewed and new recommendations submitted for future periods. If approved, these recommendations will be made effective as of April 1, 1932. The foregoing rates of accrual will produce a credit to reserves and corresponding charge against income of approximately $625,000. per annum, which based on the book value of consolidated Property Account of $45,700,000., represents a rate of about 1.4% per annum.

F. B. FLAHIVE.

5/5/32. Held over for further consideration at next meeting.

[fol. 15974] Panhandle Eastern Pipe Line Company and Subsidiaries

Value of Gas Sales Contracts—$642,286.30

There appears on the books of account of Panhandle Eastern Pipe Line Company an item of $642,286.30*, representing payment for services in connection with obtaining contracts for the sale of natural gas, including contracts with Illinois Power and Light Company and Missouri Power and Light Corporation.

As the major portion of this sum represents the value of contracts for the sale of natural gas to customers now on the lines, under 20 year agreements, it is recommended that this sum be amortized out of income at the rate of 5% per annum for the remainder of the year 1932, at which time the subject shall be reviewed and further recommendation submitted.

F. B. FLAHIVE.

*This is the balance of the $11,000,000 of value of contracts as determined by Brokaw, Dixon, Garner & McKee and entered on the books by order of the Directors at their meeting held September 3, 1930, less $10,357,713.70 written off, as instructed by the Directors at their meeting held March 29, 1932.

5/5/32 Held over for further consideration at next meeting.

Capacity Study—April 7, 1942

Continuous Daily Delivery Capacity—307,000 MCF

Scope

A summary of additional facilities required and the investment necessary to increase the continuous daily delivery capacity of Panhandle Eastern and Michigan Gas Transmission Systems to 307,000 MCF.

Design Data

Maximum operating pressure, 500# Gauge, West of Zionsville, Indiana, 600# Gauge East of Zionsville.

Construction Procedure

All facilities required are in addition to certain projects now under construction.

Gas Delivered, Used and Unaccounted For — Peak Day (Firm Basis)

Sales:	MCF	MCF	MCF
Detroit Area	133 000		
Indiana, Ohio and Michigan	90 000		
Illinois, Missouri and Kansas	84 000

Capacity Study—April 7, 1942, Revised

Competely Looped and Economically Powered Main Line System with Less Economic Production-Transmission Expenditures.

Scope

A summary of additional facilities required and investment necessary to increase the continuous daily delivery capacity of Panhandle Eastern and Michigan Gas Transmission Systems to 338,000 MCF involving a minimum quantity of steel for pipe lines and no trunk telephone lines.

Design Data

Maximum operating pressure, 500# Gauge, West of Zionsville, Indiana, 600# Gauge East of Zionsville.

Construction Procedure

All facilities required are in addition to certain projects now under construction.

SUPPLEMENTAL INFORMATION

To Be Read in Connection with Prospectus, Dated Febru ry 3, 1942

PANHANDLE EASTERN PIPE LINE COMPANY

$10,000,000
First Mortgage and First Lien 3% Bonds, Series C
Due January 1, 1962
and
150,000 shares 5.60% Cumulative Preferred Stock
(par value $100 per share)

On and after April 2, 1942, the public offering price of the Preferred Stock will be $100 per share flat.

Certain of the Purchasers named in the Prospectus are making available for sale to approved Dealers shares of such Preferred Stock at such public offering price less a concession of $1.50 per share payable to such Dealers, provided that any Preferred Stock purchased by such Dealers shall not be repurchased by the Representatives for the account of the several Purchasers at or below such public offering price prior to May 15, 1942 or such earlier date as the Representatives may determine. Each of such approved Dealers will agree that it will not offer any shares of the Preferred Stock at any price below such public offering price.

The agreement with the Selected Stock Dealers referred to on page 8[illegible] of the above mentioned Prospectus was terminated on April 1, 1942.

Prospectus relates will be first offered to certain of the Company's Common Stockholders. As to any of such shares purchased by such stockholders, upon such offering, the Company will receive $104 per share plus accrued dividends and will pay no underwriting discounts or commissions.

Glore, Forgan & Co. **Kidder, Peabody & Co.**

No person has been authorized to give any information or to make any representations, other than those contained in this Prospectus, in connection with the offers contained in this Prospectus, and if given or made, such information or representation must not be relied upon as having been authorized by the Company or by any of the Underwriters. This Prospectus does not constitute an offer by any Underwriter to sell any of the securities in any State to any person to whom it is unlawful for such Underwriter to make such offer in such State.

The date of this Prospectus is February 3, 1942.

APPLICATION OF PROCEEDS

The net proceeds to be received by the Company from the issue and sale of the Series C Bonds and the Cumulative Preferred Stock (First Series), estimated to amount to $25,043,835, exclusive of accrued interest and dividends, which net proceeds, after deducting expenses in connection with the issue and sale of said Bonds and Preferred Stock, will amount to approximately $24,893,835, are to be applied approximately as follows:

1. To the purchase from Columbia Gas & Electric Corporation of all the outstanding securities (stock and indebtedness) of Michigan Gas Transmission Corporation, as more fully explained herein unde caption "Certain Proposed Acquisitions"	$10,676,000*
2. To the purchase from Columbia Gas & Electric Corporation of all the outstanding securities (stock and indebtedness) of Indiana Gas Distribution Corporation, as more fully explained herein under caption "Certain Proposed Acquisitions"	$ 154,000*
3. To the purchase from The Ohio Fuel Gas Company of certain natural gas pipe lines in Indiana and Ohio, as more fully explained herein under caption "Certain Proposed Acquisitions"	$ 439,000
4. To the redemption of all of the Company's outstanding Class A Preferred Stock (now owned beneficially by Columbia Oil & Gasoline Corporation), exclusive of accrued dividends which will be paid out of the Company's general funds	$10,000,000
5. To the payment of part of the cost of construction work now authorized as more fully described under the caption "Property"	$ 3,624,835**
	$24,893,835

* This figure will be adjusted upward or downward in an amount equal to the increase or decrease, as the case may be, of the surplus of this corporation during the period between September 30, 1941 and the date of purchase.

** The balance (estimated at $4,946,000 as of September 30, 1941) of the payments of the cost of construction work now authorized is to be made from the general funds of the Company.

The consideration to be received for the shares of Cumulative Preferred Stock (First Series) (other than accrued dividends) is, to the extent of the par value of such shares, to be credited to capital and, to the extent of any excess of such consideration over such par value, is to be credited to premium on capital stock as provided in the Uniform System of Accounts prescribed by the Federal Power Commission for Natural Gas Companies.

CAPITALIZATION AND FUNDED DEBT

Upon the issue and sale of the Series C Bonds and the Cumulative Preferred Stock (First Series), and upon the redemption for retirement of the Class A Preferred Stock, the outstanding funded debt and capitalization of the Company, tabulated as of September 30, 1941, will be as follows:

	Amount Authorized	To Be Outstanding as Above
First Mortgage and First Lien Bonds, Series A, due serially November 1, 1946-1950(1)	$ 6,250,000(2)	$ 6,250,000
First Mortgage and First Lien 3% Bonds, Series B, due November 1, 1960	12,000,000(2)	12,000,000
First Mortgage and First Lien 3% Bonds, Series C, due January 1, 1962	10,000,000(2)	10,000,000
Serial Notes, due serially November 1, 1942-1945(3)	5,000,000	5,000,000
Leasehold Purchase Obligation(4)	62,000	14,256
Capital Stock:		
5.60% Cumulative Preferred Stock (par value $100 per share)	(5)	150,000 shs.
Class B Preferred Stock (6% cumulative, par value $100 per share)	10,000 shs.(6)	10,000 shs.
Common Stock, without par or stated value	810,000 shs.(7)	807,367 shs.

(1) The Series A Bonds mature and bear interest as follows: $1,250,000, due November 1, 1946, bear interest at 1.65%; $1,250,000, due November 1, 1947, bear interest at 1.85%; $1,250,000, due November 1, 1948, bear interest at 2.00%; $1,250,000, due November 1, 1949, bear interest at 2.15%; and $1,250,000, due November 1, 1950, bear interest at 2.30%.

(2) Under the Indenture, the issuance of Series A Bonds, Series B Bonds and Series C Bonds is limited to $6,250,000, $12,000,000 and $10,000,000, principal amount, respectively. Bonds of other series may be issued without limit as to amount, subject to the restrictions in the Indenture under which the Bonds are issued. See caption "Description of Series C Bonds", sub-caption "Additional Issuance of Bonds".

(3) The Serial Notes mature and bear interest as follows: $1,250,000, due November 1, 1942, bear interest at 0.75%; $1,250,000, due November 1, 1943, bear interest at 1.00%; $1,250,000, due November 1, 1944, bear interest at 1.25%; and $1,250,000, due November 1, 1945, bear interest at 1.50%.

(4) Payable monthly from gas produced, unpaid balance payable August 31, 1946.

(5) The 5.60% Cumulative Preferred Stock offered hereby is part of an authorized issue of 250,000 shares of Cumulative Preferred Stock. The remaining authorized shares are issuable from time to time in one or more series varying with respect to rate of dividend, redemption price, preference on voluntary liquidation and in other respects, all as determined from time to time by the Board of Directors of the Company prior to the issuance of shares of a particular series.

(6) The three members of the Company's Board of Directors representing thereon Missouri-Kansas Pipe Line Company have voted against the payment of dividends on the Company's Class B Preferred Stock on the ground that such stock is not validly outstanding. In the opinion of Edward N. Goodwin, Esq., General Counsel for the Company, such stock is validly outstanding. A copy of such opinion is filed as an exhibit to the Registration Statement, to which opinion reference is hereby made.

(7) Reference is hereby made to the caption "Certain Other Phases of Corporate History", for a description of certain litigation concerning an obligation of Columbia Oil & Gasoline Corporation to purchase 1,285 shares of Common Stock of the Company.

On December 19, 1941, the Board of Directors of the Company declared dividends in the aggregate amount of $299,561.17 on the outstanding Preferred Stock, and in the aggregate amount of $406,683.50 on the outstanding Common Stock, payable in January, 1942.

EARNINGS

The following condensed statement of consolidated earnings has been prepared by the Company from the Statement of Consolidated Income of the Company and its subsidiaries certified by Messrs. Arthur Andersen & Co. for the three years and nine months ended September 30, 1941, and has been reviewed by Messrs. Arthur Andersen & Co. The summary is subject to, and should be read in conjunction with, the notes relating to the Statement of Consolidated Income and the certificate of Messrs. Arthur Andersen & Co., all of which are set forth hereinafter on pages 61, 68, 69 and 70.

Particulars	Year Ended December 31, 1938	1939	1940	Nine Months Ended September 30, 1941
Operating revenues:

Net income	$3,059,223.74	$ 4,363,399.34	$ 4,548,323.98	$ 3,158,551.90

* Denotes red figure.

** Pursuant to a resolution adopted by the Board of Directors on December 19, 1941, the unamortized balance of debt discount and expense has been charged to earned surplus.

The maximum aggregate annual interest requirements on the First Mortgage and First Lien Bonds, Series A, on the First Mortgage and First Lien 3% Bonds, Series B, on the First Mortgage and First Lien 3% Bonds, Series C, and on the Serial Notes, will be $840,625.

The maximum annual dividend requirement on the Cumulative Preferred Stock (First Series) will amount to $840,000, and on the Class B Preferred Stock amounts to $60,000.

TENTATIVE PRO FORMA EARNINGS

The following condensed pro forma statement of consolidated income of the Company and its subsidiaries and Michigan Gas Transmission Corporation and Indiana Gas Distribution Corporation has been prepared by the Company as to the three years ended December 31, 1940 from the respective statements of income hereinafter set forth on pages 68, 75 and 78 and, from the books of the companies as to the twelve months ended September 30, 1941, (1) on the basis that the financing of the cost of the acquisition of the outstanding stock and indebtedness of Michigan Gas Transmission Corporation and Indiana Gas Distribution Corporation had been accomplished by the issuance of securities which would have resulted in an increase of $300,000 per annum in the aggregate amount of interest and amortization cost to the Company; that the interest expense shown as applicable to obligations of Michigan Gas Transmission Corporation and Indiana Gas Distribution Corporation to Columbia Gas & Electric Corporation, their parent, would have aggregated the same amount had the Company been the parent company; and that dividends had been paid by Michigan Gas Transmission Corporation and Indiana Gas Distribution Corporation in each year to the extent of the net income for that year; and (2) after giving effect to estimated increases in Federal income taxes, which would have resulted had such interest and dividends been paid by Michigan Gas Transmission Corporation and Indiana Gas Distribution Corporation to the Company in each year to the full extent of their net income. Such statement is subject to the notes appended to the statements of income of the Company and its subsidiaries and of Michigan Gas Transmission Corporation and Indiana Gas Distribution Corporation, respectively.

	Year Ended December 31,			Twelve Months Ended September 30, 1941
	1938	1939	1940	
Operating revenues:				
Gas sales	$10,980,859.00	$13,258,845.62	$15,250,648.43	$16,475,707.15
Gasoline sales	353,128.71	513,940.99	355,722.01	566,775.88

SINKING FUND AND REDEMPTION PROVISIONS OF THE SERIES C BONDS

Sinking Fund Provision

In the Supplemental Indenture mentioned under the caption "Description of Series C Bonds" the Company will covenant to deliver to the Corporate Trustee or to redeem, for the sinking fund, (a) on July 1, 1942, $250,000 aggregate principal amount of Bonds of Series C, (b) on July 1, 1943 and on each July 1 thereafter to and including July 1, 1960, $500,000 aggregate principal amount of Series

C Bonds, and (c) on July 1, 1961, $250,000 aggregate principal amount of Bonds of Series C. The amount of Series C Bonds required so to be retired on any such July 1 may be partly so delivered to the Corporate Trustee and partly called for redemption, and each such sinking fund instalment may be anticipated in whole or in part as stated below. The Series C Bonds will be redeemable for the sinking fund on each such July 1, on at least 30 days published notice, at their principal amount and accrued interest thereon to the date of redemption, together with the following premium on such principal amount:

if redeemed on or before July 1, 1945, 1¼%;
if redeemed thereafter and on or before July 1, 1949, 1%;
if redeemed thereafter and on or before July 1, 1953, ¾%;
if redeemed thereafter and on or before July 1, 1957, ½%;
if redeemed thereafter and on or before July 1, 1961, ¼%.

Series C Bonds so to be redeemed are to be selected by lot by the Corporate Trustee.

The Company is to have the right to anticipate at any time or from time to time all or any part of such sinking fund requirements by delivering Series C Bonds to the Corporate Trustee or by redeeming and paying Series C Bonds upon the notice and at the respective redemption prices hereinafter under the subcaption "Redemption Provisions" set forth with respect to the redemption of Series C Bonds at the election of the Company. To the extent that the Company shall at any time so anticipate such sinking fund requirements, it shall be entitled to credit on account of such sinking fund requirements for the principal amount of Series C Bonds so delivered to the Corporate Trustee or so redeemed and paid.

All Series C Bonds delivered to the Corporate Trustee or redeemed for the sinking fund are to be cancelled and no Bonds may be issued under the Indenture in lieu thereof or in exchange therefor.

(See Article III of the Supplemental Indenture.)

Redemption Provisions

The Series C Bonds will also be subject to redemption at the election of the Company in whole or in part (selected by lot by the Corporate Trustee) at any time in amounts of not less than $500,000, on at least 30 days published notice, at their principal amount and accrued interest thereon to the date of redemption, together with the following premiums on such principal amount:

if redeemed on or before December 31, 1944, 3¼%;
if redeemed thereafter and on or before December 31, 1947, 3⅛%;
if redeemed thereafter and on or before December 31, 1950, 2½%;
if redeemed thereafter and on or before December 31, 1953, 1⅞%;
if redeemed thereafter and on or before December 31, 1956, 1¼%;
if redeemed thereafter and on or before December 31, 1959, ⅝%;
if redeemed thereafter and on or before December 31, 1960, ⅜%;
if redeemed on or after January 1, 1961, no premium.

(See Article II of the Supplemental Indenture.)

See the foregoing sub-caption "Sinking Fund Provision" for information concerning redemption of Series C Bonds through the sinking fund therefor, and the redemption prices applicable in such instances.

DIVIDEND RATE AND REDEMPTION PRICES FOR CUMULATIVE PREFERRED STOCK (FIRST SERIES)

The holders of the 5.60% Cumulative Preferred Stock (hereinafter called the Cumulative Preferred Stock, (First Series)) shall be entitled to receive out of the net profits or the net assets of the Company applicable to dividends, when and as declared by the Board of Directors, dividends in cash at the rate of 5.60% of the par value thereof per annum, and no more, payable on the first days of January, April, July and October. For further information with respect to the dividend rights of the holders of such stock, reference is made to the caption "Description of Cumulative Preferred Stock (First Series)".

The redemption price of the Cumulative Preferred Stock (First Series) applicable to shares of said stock called for redemption through operation of the sinking fund therefor is $105 per share plus accrued dividends.

The redemption price of Cumulative Preferred Stock (First Series) applicable to shares of said stock called for redemption other than through operation of the sinking fund is $108 per share plus accrued dividends.

HISTORY AND BUSINESS

The Company is engaged in the production, purchase, transmission and sale of natural gas, the major part of which is sold to gas transmission companies and to gas distribution companies for resale. The Company's principal natural gas transmission system, which was placed in practical operation in the early part of 1932, extends from the Amarillo gas field in the Texas Panhandle and from the Hugoton gas field in Southwestern Kansas through the States of Oklahoma, Kansas, Missouri and Illinois, to a point near Dana, Indiana, adjacent to the Illinois-Indiana boundary. The Company also operates, as a separate unit, a minor transmission system located in the general vicinity of Kansas City, Missouri.

The Company intends to use a part of the proceeds of the sale of securities being offered hereby to acquire all of the outstanding securities of Michigan Gas Transmission Corporation (a wholly-owned subsidiary of Columbia Gas & Electric Corporation). The natural gas pipe line system of Michigan Gas Transmission Corporation is located in the States of Indiana, Ohio and Michigan, and consists principally of pipe lines extending from the present eastern terminus of the Company's system at Dana, Indiana, to points near Detroit, Michigan, and Muncie, Indiana.

The Company produces approximately one-half of its gas requirements and purchases the remainder from others.

The Company's largest customer is Michigan Consolidated Gas Company (formerly Detroit City Gas Company), which company purchases from the Company the natural gas it resells through its distribution systems in Detroit and Ann Arbor, Michigan, and environs. Natural gas sold to Michigan Consolidated Gas Company is delivered by the Company to Michigan Gas Transmission Corporation at the latter's western terminus near Dana, Indiana, for transmission and redelivery to Michigan Consolidated Gas Company. During the 12 months ended September 30, 1941, such sales in M.C.F. to Michigan Consolidated Gas Company amounted to approximately 39% of the Company's total sales.

The Company has entered into a contract with Consumers Power Company in which it has, among other things, agreed to construct certain pipe lines in Michigan and to supply a major part of the natural gas requirements of Consumers Power Company for distribution in its Flint, Pontiac, Jackson, Kalamazoo, Owosso and Battle Creek Divisions. Natural gas to be sold through the Company's proposed Michigan pipe lines will be transported by Michigan Gas Transmission Corporation from a point near Dana, Indiana, to the point of connection of that company's system with the Company's proposed Michigan lines.

The Company supplies natural gas to a number of communities in central Indiana and in northwestern Ohio, the more important customers being Central Indiana Gas Company and Richmond Gas Corporation. Deliveries of natural gas to the Company's customers located in Indiana and in Ohio are also made through Michigan Gas Transmission Corporation.

The Company also sells gas to Michigan Gas Transmission Corporation for resale by that company to certain distributing companies and municipalities in Indiana. The more important of such distributing companies include Northern Indiana Public Service Company, Kokomo Gas and Fuel Company and Public Service Company of Indiana.

The Company sells Kentucky Natural Gas Corporation (a minority of the voting stock of which is owned by Missouri-Kansas Pipe Line Company) certain of its gas requirements, delivery being made at the Company's Dana, Indiana, measuring station.

Illinois Natural Gas Company (a wholly owned subsidiary of the Company) sells natural gas to certain distributing companies and industrial customers in Illinois. The principal customers so served are Central Illinois Light Company, Illinois Iowa Power Company and Central Illinois Public Service Company. All gas sold by Illinois Natural Gas Company is purchased from the Company.

The more important distributing companies in Missouri obtaining natural gas from the Company are Missouri Power & Light Company, Citizens Gas Company of Hannibal and Missouri Utilities Company.

Delivery of gas by the Company and its wholly owned subsidiary, Illinois Natural Gas Company, directly to industries and to other gas companies for resale to industrial customers is, in most instances, subject to curtailment, interruption or discontinuance in the event of an insufficiency in the supply of gas.

It is estimated that approximately 705,000 gas consumers are supplied directly and indirectly with gas from the Company's system, of which approximately 450,000 are customers of Michigan Consolidated Gas Company.

The following tabulation shows for the Company and its wholly-owned subsidiary companies the sales of gas in M.C.F. (thousands of cubic feet) and the revenues from the sale of gas for the 12 months ended September 30, 1941:

Classification	Sales Volume in M.C.F.	Revenue from Sales
Residential	85,610	$ 57,409.16
Commercial	46,801	20,888.36
Industrial	4,925,435	831,124.98
Other Gas Companies	56,763,102	13,333,776.91
Total	61,820,948	$14,243,199.41

Substantially all the gas included in the foregoing table under the classifications "Residential" and "Commercial" was sold by the Company to its former subsidiary, Central Distributing Company, and resold at retail by such subsidiary. On January 25, 1941, the Company disposed of such subsidiary, but has continued to supply gas to it for resale.

The Company's contracts for the supply of natural gas to distributing companies for resale in Liberty, Smithville, Avondale, Excelsior Springs and Harrisonville, Missouri, and Paola, Louisburg and Osawatomie, Kansas, are for only a part of the natural gas requirements thereof. The Company's combined revenues from sales to such distributing companies for resale in the above named communities during the 12 months ended September 30, 1941 amounted to approximately $125,000.

The Company is engaged as an incident to its natural gas business, in the extraction, processing and sale of natural gasoline.

The Company is not contemplating any change in the general character of its business or of the business of its subsidiary.

In order to supply additional markets and to meet increased demands of markets already connected, the Company increased the capacity of its transmission system during the years 1936, 1937 and 1940 by the construction of additional pipe lines and compressor stations and the enlarging of existing compressor stations. This expansion of facilities also included, among other things, the acquisition of additional gas reserves, the drilling of additional wells, and the construction of a gasoline extraction and gas dehydration plant. During this period approximately $21,000,000 was expended by the Company and its subsidiary for such expansion of facilities. During the year 1941 the Company authorized certain construction work of a similar nature, a large part of which is now in progress, involving expenditures then estimated at approximately $9,000,000. It is anticipated that the ultimate cost of such work may exceed such estimate by approximately 10%. At the present time the Company has priority ratings for material involved in such construction work considered by it to be generally satisfactory.

The following tabulation shows for the past 5 calendar years, and for the 12 months ended September 30, 1941, for the Company and its wholly owned subsidiary companies the sales of gas in M.C.F. (thousands of cubic feet) to customers by states and groups of states:

Year	Texas, Oklahoma and Kansas	Missouri	Illinois	Indiana and Ohio*	Michigan	Total
1936	2,500,332	6,803,511	7,257,283	6,229,747	3,957,058	26,747,931
1937	2,366,788	7,276,270	7,554,821	7,639,485	15,969,598	40,806,962
1938	2,955,385	6,857,223	6,601,142	8,739,715	16,032,297	41,185,762
1939	2,479,149	8,009,919	7,398,929	12,953,121	18,391,954	49,233,072
1940	2,120,646	8,860,840	8,557,633	14,574,370	22,281,273	56,394,762
12 months ended September 30, 1941	2,180,719	9,887,598	8,959,441	17,034,842	23,758,348	61,820,948

*Sales of gas in Ohio commenced in the year 1939 and amounted to 55,015 M.C.F. for that year and amounted to 150,693 M.C.F. in the year 1940. For the 12 months ended September 30, 1941, sales of gas in Ohio amounted to 182,924 M.C.F.

A considerable part of the increase in sales of gas indicated by the above table has been due to the commencement of natural gas service to communities not theretofore served with natural gas from the Company's system. Since January 1, 1936 such new natural gas service (directly and indirectly from the Company's system) has been extended to 64 communities having an aggregate population of approximately 2,323,000.

EXHIBIT 233.

5889

CERTAIN PROPOSED ACQUISITIONS

Michigan Gas Transmission Corporation

The Company proposes, contemporaneously with the issuance and sale of the securities being offered hereby, to acquire from Columbia Gas & Electric Corporation, 61 Broadway, New York, N. Y. all of the outstanding stock and indebtedness of Michigan Gas Transmission Corporation (herein sometimes called "Michigan Gas"). Said stock and indebtedness, as of September 30, 1941, amounted to:

	Amount
Notes and Loans payable to Columbia Gas & Electric Corporation—	
Demand Notes—6%	$5,900,500.00
Demand Loans—6%	2,420,000.00
Common Stock, without par value	44,800 shares*

*Stated on the books of Michigan Gas at $2,240,000.00.

The Company understands that Michigan Gas owns a system of natural gas pipe lines, compressor stations and equipment located in the States of Indiana, Ohio and Michigan; that the principal lines and stations consist of two pipe lines (1—20" line and 1—24" line) extending from the present eastern terminus of the Company's system (a point in Vermillion County, Indiana near Dana, Indiana) to a point near Zionsville, Indiana, a distance of approximately 70 miles; an 18" pipe line extending from said point near Zionsville, Indiana, to a point near Muncie, Indiana, a distance of approximately 52 miles; a 22" pipe line extending from said point near Zionsville, Indiana, to a point at or near Detroit, Michigan, a distance of approximately 230 miles and that said system includes three compressor stations in Indiana; namely, Montezuma (7800 horsepower), Zionsville (6500 horsepower), and Edgerton (6500 horsepower).

Substantially all of the natural gas sold or transported by Michigan Gas is obtained from the Company as more fully set forth above under the caption "History and Business".

Reference is hereby made to the financial statements of Michigan Gas contained herein for further information.

Indiana Gas Distribution Corporation

The Company proposes, contemporaneously with the issuance and sale of the securities being offered hereby, to acquire from Columbia Gas & Electric Corporation all of the outstanding stock and indebtedness of Indiana Gas Distribution Corporation (herein sometimes called "Indiana Gas"). Said stock and indebtedness, as of September 30, 1941, amounted to:

	Amount
Notes and Loans payable to Columbia Gas & Electric Corporation:	
Demand Notes—6%	$120,000.00
Demand Loans—6%	15,000.00
Common Stock, without par value	20 shares*

*Stated on the books of Indiana Gas at $1,000.00.

Indiana Gas distributes natural gas at retail to residential and commercial customers located in Brownsburg, Carmel, Dana, Danville, North Salem, Rockville and Zionsville, all in the State of Indiana, and to one industrial customer located at or near Winchester, Indiana. Indiana Gas supplies approximately 1,800 customers with natural gas which it purchases from either Michigan Gas or the Company. The Company understands that the principal properties owned by Indiana Gas consist of gas distribution systems in the aforementioned communities and certain short pipe lines connecting said distribution systems with the pipe line system of Michigan Gas.

The Ohio Fuel Gas Company Lines

The Company proposes, contemporaneously with the issuance and sale of the securities being offered hereby, to acquire certain natural gas pipe lines from The Ohio Fuel Gas Company, 99 North Front Street, Columbus, Ohio. The principal lines to be acquired consist of approximately 33 miles of 16" pipe line extending generally eastward from a point near Muncie, Indiana, to a point approximately 2½ miles east of the Indiana-Ohio boundary together with certain pipe lines branching therefrom. The principal branch lines are a 10" line approximately 13 miles in length extending to a point near Richmond, Indiana, and a 6" and 6⅝" line approximately 7 miles in length extending to Winchester, Indiana.

The Ohio Fuel Gas Company is a subsidiary of Columbia Gas & Electric Corporation. Reference is hereby made to the caption "Management and Control" hereof for a statement of the relationship of the Company to Columbia Gas & Electric Corporation.

The Company considers that all of the consideration to be paid in connection with the acquisition of the properties described above will be for tangible property (such acquisition being indirect in the case of Michigan Gas and Indiana Gas) except that the accounts of Michigan Gas and of Indiana Gas, as of September 30, 1941, include intangibles (organization expense and miscellaneous intangibles) in the amounts of $83,999.92 and $11,413.98 respectively.

The Company understands that the cost to Columbia Gas & Electric Corporation of the above mentioned stock and indebtedness of Michigan Gas Transmission Corporation and of Indiana Gas Distribution Corporation amounts to $10,842,000.00.

The Company has been informed that the book value of the natural gas pipe lines to be acquired from The Ohio Fuel Gas Company is shown on the books of said company as $670,330.46, representing the amount shown on the books of the Logan Gas Company at the time this property was acquired by it from said company.

PROPERTY

Production Property and Gas Reserves

The Company, as of September 30, 1941, owned or controlled oil and gas leaseholds on approximately 271,000 acres in the Amarillo and Hugoton gas fields located in the Panhandle of Texas, Southwestern Kansas and Texas County, Oklahoma, and in addition controlled through gas purchase contracts the gas production from approximately 67,000 acres in this territory. The Company is currently producing gas from certain of these leaseholds by means of 57 gas wells in the Amarillo gas field and 80 gas wells (including 46 gas wells in which the Company has only a 50% interest) in the Hugoton gas field.

Ralph E. Davis, Inc., Engineers, have made a survey of the natural gas supply available to the Company from the Amarillo and Hugoton fields. Their letter with respect to such natural gas supply follows:

RALPH E. DAVIS, INC.
ENGINEERS

Petroleum and Natural Gas
1710 Union Bank Building
Pittsburgh

New York
150 Broadway

December thirteenth,
Nineteen forty-one.

Board of Directors,
Panhandle Eastern Pipe Line Company,
New York, N. Y.

Gentlemen:

In accordance with your request we have, during the past two months, completed a study as of June 30, 1941 of the natural gas supply available to your Company. The natural gas available to your Company is obtained almost entirely in the Amarillo field of northwest Texas and in the Hugoton field situated in southwestern Kansas, in the Oklahoma Panhandle and in Sherman and Hansford Counties, Texas. These two fields constitute one of the largest known reserves of natural gas.

The conclusions stated herein are based upon engineering and geological studies we have made of both of these fields since they each became important as a source of natural gas. We have from time to time in the past made several studies of your Company's gas supply. In the present study we have relied upon information furnished by officials of your Company regarding acreage controlled, wells owned or under gas purchase contract, production of these wells, their pressure history, et cetera.

Our most recent study of the Amarillo field indicates that the proven gas acreage covers an area of approximately 1,467,000 acres and that the recoverable gas reserves as of December 31, 1940 were not less than 16.8 trillion cubic feet. The total past production to December 31, 1940 is estimated at 8.326 trillion cubic feet. We have estimated the average top of well pressure in the field at December 31, 1940 to be approximately 318 pounds. The virgin average pressure as measured at the top of the wells was approximately 430 pounds. It is thus seen that during the withdrawal of more than 8 trillion cubic feet of gas there has been an average approximate decline in pressure of 112 pounds.

Your Company owned on June 30, 1941 leases in the Panhandle field which we consider proven for natural gas production covering a total of 41,736 acres. Your Company held gas purchase contracts good for the life of production covering an additional 23,233 acres which we consider proven for natural gas production. The above acreage is centrally located in the field, being largely in what we consider the best productive area.

In our study of the reserves available from the above acreage we have considered as a unit an area of 295,488 acres within which is located the major portion of Panhandle's lease and contract acreage, to the end that we might observe the relation between the productiveness of the acreage from which the Company is securing its supply as compared to the immediately surrounding acreage. The

results of this study show that during the 6-year period from July 1, 1935 to June 30, 1941 the average weighted pressure of the selected area dropped from 378 pounds as of July-August, 1935 to 333 pounds as of July-August, 1941, or an average of 7½ pounds per year. The total gas withdrawal from the area during the 6-year period was 738,184,846 M cubic feet, of which Panhandle Eastern produced 87,024,001 M cubic feet and purchased 77,871,301 M cubic feet, thus withdrawing from the area 22.3% of its total production from approximately a like percentage of the acreage within the area.

It is evident from the very substantial production obtained with a modest decline in pressure that the acreage upon which your Company controls its gas supply in the Amarillo field has a very substantial productive capacity. The total proven acreage controlled through leasehold and gas purchase contracts, namely 64,969 acres, is located in the heart of the field and is equal to about 4.4 per cent of the total proven area of the Amarillo field. It is our judgment that your Company thus controls as of June 30, 1941 approximately this percentage of the total recoverable reserve, that is—not less than 700 billion cubic feet.

Of the above mentioned 41,736 acres proven for gas and controlled by your Company through leasehold contracts, 31,286 acres are classed as operated and had proven recoverable reserve as of June 30, 1941 estimated by us at 350 billion cubic feet. The above mentioned 23,233 proven acres controlled through gas purchase contract are classed as operated, and had a recoverable gas reserve on June 30, 1941 estimated by us at not less than 230 billion cubic feet.

The reserves controlled in a field such as the Amarillo field should, we believe, be considered with regard to the total available reserve of the field and the total annual or expected annual withdrawal. Having in mind that your Company is rapidly increasing its gas withdrawal from the field, the total having increased from 15,835,666 M cubic feet in the year ending June 30, 1936 to 39,985,134 M cubic feet for the year ending June 30, 1941, and having in mind the expectancy that further very substantial increases may be expected, we are of the opinion that this gas supply may be counted upon as a source of major production for a period of approximately fifteen years.

Our most recent study of the Hugoton field indicates the proven and semi-proven area to include not less than two million acres and the total recoverable gas reserves as of December 31, 1940 to be not less than 15 trillion cubic feet.

Your Company owned as of June 30, 1941 full interest leases covering a total of more than 175,000 acres in the proven or semi-proven portion of the Hugoton field, having a proven gas reserve estimated by us at not less than 1,250 billion cubic feet. In addition, the Company owned on said date a one-half interest in an additional 26,867 acres in the above area, having a total proven reserve estimated by us at not less than 200 billion cubic feet. Your Company also controlled under gas purchase contracts good for the life of production an additional 35,075 acres in this area, having an estimated proven reserve of not less than 260 billion cubic feet. The total proven reserves controlled by your Company in the Hugoton field are thus estimated by us to be not less than 1,700 billion cubic feet.

Of the above mentioned 175,000 acres controlled by your Company in the proven or semi-proven portion of the Hugoton field, 19,170 acres are classed as operated and had on June 30, 1941 a proven recoverable reserve estimated by us at not less than 137 billion cubic feet. Of the 26,867 acres located in the proven or semi-proven area and in which your Company owns a one-half interest, 17,320 acres are classed as operated and had on June 30, 1941 a recoverable gas reserve estimated by us at not less than 129 billion cubic feet. The 35,075 acres controlled under gas purchase contracts are classed as operated, and had a recoverable gas reserve as of June 30, 1941 estimated by us at not less than 260 billion cubic feet.

Both the Amarillo and Hugoton fields constitute reserves of gas from which gas withdrawals will not necessarily be proportional to the reserves controlled by the various producers. The reserves are, we believe, sufficient to meet the combined anticipated requirements for pipe line, carbon black and other uses for a period of more than 25 years. The combined gas supply controlled by your Company in the Amarillo and Hugoton fields is, in our judgment, adequate to supply its estimated market requirements for a period of more than 25 years.

Very truly yours,

RALPH E. DAVIS, INC.
by RALPH E. DAVIS,
President.

The Company also owns oil and gas leaseholds on (a) certain acreage outside proven limits of the Amarillo and Hugoton fields and (b) approximately 1,100 acres on which is located one well and a half interest in approximately 10,000 acres on which are located twelve wells in the Hugoton field, the gas from which is sold under contract to the Argus Natural Gas Company, Incorporated.

P. McDONALD BIDDISON
CONSULTING ENGINEER
Dallas Gas Building
Dallas, Texas

November 13, 1941

Board of Directors
Panhandle Eastern Pipe Line Company

Gentlemen:

On several occasions beginning in March 1937, I have been engaged in studies and investigations of the business and properties of your company and of its Subsidiary Company, Illinois Natural Gas Company. These studies and investigations have included the reviewing of construction plans, determining safe operating pressures and system capacities, the preparation of property valuations, and studies of property depreciation.

I have examined a great deal of the property and have inspected plans and specifications under which it was constructed. The Company owns or controls under purchase contracts, gas reserves in the largest gas fields ever known, adequate for the requirements now in prospect, for a term of at least twenty-five years. The compressor stations on the main system are carefully designed, their equipment is first class in all respects, they present a neat and attractive appearance and are maintained in excellent condition. All these features tend to produce reliability and economy of operation. The main transmission system has been constructed with a margin of safety as to pressure so that it may safely be operated at 500 pounds compressor station discharge pressure. Stream crossing locations have been carefully selected and multiple lines across streams have been so located and installed as to leave very slight probability of interruption at such locations. The transmission lines have been well located and well laid to secure stability and are carefully maintained. The main line loops provide additional protection against service interruption and this protection will be enhanced by the loop extensions now under construction. The Gasoline Plant at Liberal is of modern design and the dehydration plant in connection with it is an effective preventive of interruptions of service from freezing of lines. Measuring and Regulating Stations are of up to date equipment, are carefully maintained and the stations are neat and clean. Little evidence of deterioration in the main line property can be found. Pipe exposed in making connections for 1937 and 1940 additions did not indicate interior corrosion. Flow tests of the main lines in 1937 and 1938 showed some fouling, not corrosion, of the old lines westward from Olpe Station to Liberal Station. This condition has been effectively remedied as evidenced by subsequent flow tests and by capacity obtained under routine operations. My inspection of pipe in transmission mains in 1941 disclosed that there was little deterioration of protective coating and that pitting of pipe existed only in a few very restricted areas. Such areas are being protected cathodically as they develop.

My study of the system's capacity indicates a continuous sales capacity of the main line system as of November 1, 1941, including the delivery at Dana, Indiana, and with the distribution of the deliveries west of Dana as then indicated, of, in round numbers 250,000 M.C.F. per 24 hours. A main line looping program of 146 miles of loops, completing the double line eastward from Louisburg Station (near Kansas-Missouri state line) on which construction has begun and which is scheduled for completion in the Spring of 1942 (based upon the delivery schedule of pipe purchased under priority orders) will provide additional insurance against service interruptions and will give an additional sales capacity for short periods of approximately 30,000 M.C.F. per 24 hours. The completion of the main line loops, requiring 85 additional miles of main line construction (thus making a continuous double line from Liberal Station to Dana) which is contemplated as part of the 1942 construction program will provide a continuous sales capacity in excess of 300,000 M.C.F. per 24 hours.

Yours very truly,

P. McDONALD BIDDISON

P. McDONALD BIDDISON
Consulting Engineer

Character of Ownership

The statements under this caption "Property" with respect to ownership are made upon the authority of Glenn W. Clark, Esq., head of the Company's legal department. In his opinion, based in part upon opinions of various local counsel, the above-mentioned production property and transmission property are owned by the Company or by its wholly owned subsidiary (Illinois Natural Gas Com-

PANHANDLE EASTERN PIPE LINE COMPANY AND SUBSIDIARY COMPANY

NOTES TO THE BALANCE SHEETS

ATTACHED TO AND MADE AN INTEGRAL PART OF THE BALANCE SHEET (COMPANY ONLY) AND OF THE CONSOLIDATED BALANCE SHEET AS OF SEPTEMBER 30, 1941

A. (1) Property, plant and equipment and intangibles are stated at cost except for $4,816,350.71 thereof which was recorded at the amount assigned by the Board of Directors to assets acquired as of August 31, 1930 as a capital contribution. It is the belief of the present management of the Company that the amount assigned to the capital contribution represented the value of the assets contributed as determined by the donor, Missouri-Kansas Pipe Line Company. Of the total, $2,417,948.52, representing the amount at which the contributed tangible property was recorded on the books of Missouri-Kansas Pipe Line Company, was assigned to property, plant and equipment, and the balance of $2,398,402.19 was assigned to gas sales and purchase contracts.

(2) Investment in subsidiary company is stated at cost. The securities representing such investment are pledged as collateral to the First Mortgage and First Lien Bonds. In January, 1941, the Company received 807,367 shares of common stock, of a par value of 42 cents each, of Central Distributing Company in exchange for its former investment in that company (represented by no par common stock of $59,000.43, a note receivable of $250,000.00 and a demand loan of $25,000.00) and $5,093.71 additional cash investment. These shares were then distributed as a dividend to the Company's common stockholders, on a share for share basis, with a concurrent charge to earned surplus of $339,094.14.

(3) The amounts at which property, plant and equipment, intangibles and investment in subsidiary company are stated do not purport to represent the current realizable value thereof.

B. Debt discount and expense in process of amortization at September 30, 1941 consists of:

Discount and expense applicable to 6% bond issue redeemed in 1937 prior to original maturity of October 1, 1950 in process of amortization over the original life of such issue	$ 829,457.41
Items being amortized on the basis of bonds outstanding over the life of the 4% bond issue redeemed in 1941 prior to original maturity of March 1, 1952—	
Call premium on 6% issue	471,822.61
Debt discount and expense on 4% issue	374,436.79
Items being amortized on the basis of bonds outstanding over the lives of present outstanding issues—	
Call premium on 4% issue	190,061.40
Debt discount and expense on present outstanding issues	215,706.85
	$2,081,485.06

On December 19, 1941, the Board of Directors authorized the charging to earned surplus, as of the date of refunding, February 3, 1941, of the unamortized balance of debt discount, expense and call premiums applicable to refunded issues and the discount and expenses applicable to outstanding issues.

C. Surplus is restricted by the Mortgage and Deed of Trust dated November 1, 1940 as to payment of dividends, in the amount of $4,113,952.58. In the opinion of counsel for the Company, the requirements of Delaware law impose no restrictions on surplus by reason of the excess ($1,100,000 at September 30, 1941) of the liquidating value over the par value of its preferred stock. Class A preferred stock may be redeemed at any time in whole or in part at $100 per share if redeemed on or before January 1, 1942 or $110 per share thereafter.

D. At September 30, 1941 there were 1,285 unissued shares available for exercise of purchase option at $25.00 a share.

E. Contingent liabilities:

Effective January 1, 1940, the Company adopted a retirement annuity plan for employees (including officers) who had not attained age sixty-five on that date, by means of a group annuity

EXHIBIT 233.

PANHANDLE EASTERN PIPE LINE COMPANY AND SUBSIDIARY COMPANIES

NOTES TO THE INCOME ACCOUNT

ATTACHED TO AND MADE A PART OF THE CONSOLIDATED INCOME ACCOUNT FOR THE YEARS ENDED DECEMBER 31, 1938, 1939, AND 1940 AND THE NINE MONTHS ENDED SEPTEMBER 30, 1941

A. The formulae consistently used by the Company and its subsidiaries beginning with the year 1937 to develop an amount to be recommended to the Board of Directors as a proper provision for depreciation, depletion, and amortization gives consideration to the "wasting asset" theory and provides depletion on operated leaseholds on the basis of units of gas withdrawn, amortization of investment in unoperated land rights by the use of a composite life of ten years for such land rights, amortization of gas sales and purchase contracts at a specific monthly rate as provided in the Company's Certificate of Incorporation and in amounts to conform to the contract period in certain instances, and an amount for the other transmission system properties determined by its Board of Directors which recognizes amortization in addition to a composite rate based on the age and estimated life of the properties. The propriety of the aggregate annual provision, as well as the reasonableness of the total reserves provided to date, has been substantiated by P. McDonald Biddison, an independent Consulting Engineer of Dallas, Texas. The Company's Certificate of Incorporation, as amended, provides substantially that no dividends on the common stock or any participating dividends on the preferred and common stocks may be paid except out of net surplus earned subsequent to December 31, 1935 remaining after there shall have been deducted therefrom as provisions for depreciation, depletion and amortization of property, plant and equipment, an aggregate accrual equal to one-third of 1% per month (on monthly balances) of the consolidated tangible property of the Company and its subsidiaries; the provisions for depreciation, depletion and amortization of tangible property as computed in accordance with the Company's Certificate of Incorporation would have amounted to $2,337,597.71, $2,354,588.33, $2,378,393.37, and $1,993,360.66 for the years 1938, 1939, 1940, and the nine months ended September 30, 1941, respectively. The amounts claimed by the Company and its subsidiaries for depreciation for Federal income tax purposes are larger than the provisions as set forth in the income account.

B. The Company has provided amortization of gas sales and purchase contracts in the amount of $24,419.05 per month, which will extinguish the net ledger balance at December 31, 1935 ($2,930,286.40) over a period of ten years. Of the original amount of gas sales contracts—other, $371,076.00 is being amortized over a period of fifteen years from January 1, 1937 and the remainder is being amortized primarily over the lives of the respective contracts. No provision has been made for the amortization of organization expense and miscellaneous intangibles.

C. It is the practice of the Company to charge to maintenance the repairs of property and replacements and renewals of items determined to be less than units of property. Replacements and renewals of items considered to be units of property are charged to the property, plant and equipment accounts. At the time properties are disposed of, the cost (or estimated cost), less net salvage value, of property retired is charged to the reserve for depreciation, depletion and amortization of property, plant and equipment.

D. Charges in lieu of Federal income and excess profits taxes represent an amount equivalent to such taxes which would have been payable on current earnings if the Company had not had the benefit for tax purposes of deductions for discount, premium and expense resulting from the refinancing of long-term debt. Such amounts have been credited to unamortized debt discount and expense as a partial offset to the items included therein applicable to the bonds which were refunded.

E. Consists of—

	1938	1939	1940	Nine Months Ended September 30, 1941
On issue due October 1, 1950, redeemed in 1937—

[fol. 16095] (Exhibit 234.)

Summary of Construction and Retirement Budget and Work Order Procedure.

The initial work in connection with the Construction and Retirement budgets begins in the various departments late in the year preceding that in which the construction or retirement work is to take place. This work embraces a study on the part of departmental representatives prior to departmental determination of such requirements. When the anticipated requirements of a department have been considered along with the general system requirements, such tabulations are then ready for further study and consideration by the local management.

Upon receipt by the local management of the preliminary estimates from the various departments, these tentative recommendations are reviewed in much detail both from a departmental standpoint and from a system viewpoint as well. Having determined any necessary deletions or additions, the tentative budget is then ready for consideration by all of the senior officers.

At a meeting or meetings held in the Kansas City office, the proposed budget is then considered item by item by the entire management, and meeting all tests or requirements is then put in final form for presentation to the Board of Directors.

Action by the Directors under normal conditions usually occurs at a Board meeting held very early in the year in which the work is to be undertaken or later in the preceding year. To the extent that Board approval is had, work orders are then issued for routine or blanket budget items, and the work on such projects then follows in the order and to the extent thought necessary by department heads with the approval of the local management.

Notwithstanding approval by the Board, actual construction on major projects does not begin until the necessity for such work is again reviewed by the management generally, and only then after final approval by the President:

Work Orders:

The actual inception of work authorized by an approved budget item takes place only after a properly approved work order request, which originates in the department to benefit by the proposed work, has been obtained. Such work order request contains, among other things, an estimate of the job in substantial detail. When the project is completed the construction forces file a completion report containing an itemized record of materials used with the [fol. 16096] general accounting office where a comparison is made with the recorded costs and original estimate. If no major difference is found the completion report is accepted, engineering data taken off, and the order is closed.

Agreement

Between

Columbia Gas & Electric Corporation

and

Panhandle Eastern Pipe Line Company

Dated February 5, 1942

[fol. 16111] This Agreement, made and entered into this 5th day of February, 1942, by and between Columbia Gas & Electric Corporation, a Delaware corporation (hereinafter called Columbia Gas), and Panhandle Eastern Pipe Line Company, a Delaware corporation (hereinafter called Panhandle Eastern),

Witnesseth:

Columbia Gas represents and warrants that it owns with power to sell the entire outstanding capital stocks and certain other indebtedness as hereinafter stated (such capital stocks, notes and other indebtedness being sometimes hereinafter referred to as the "holdings" of Columbia Gas), of the following companies to wit:

44,800 shares of Common Stock, no par value, $5,900,500, principal amount, of 6% Demand Notes, $2,420,000, principal amount, of 6% Demand Loans, (open account) of Michigan Gas Transmission Corporation, a Delaware corporation; and 20 shares of Common Stock, no par value, $126,000, principal amount, of 6% Demand Notes, $15,000, principal amount, of 6% Demand Loans, (open account) of Indiana Gas Distribution Corporation, an Indiana corporation.

The Securities and Exchange Commission, by an order entered January 21, 1942, In the Matter of Columbia Gas & Electric Corporation, et al., has duly authorized the sale by Columbia Gas to Panhandle Eastern of the aforementioned holdings of Columbia Gas in Michigan Gas Transmission Corporation (hereinafter called Michigan Gas) and Indiana Gas Distribution Corporation (herein-[fol. 16112] after called Indiana Gas) at the prices hereinafter provided for.

Columbia Gas agrees to sell and Panhandle Eastern agrees to purchase the entire aforementioned holdings of Columbia Gas in Michigan Gas and Indiana Gas on the terms and conditions set forth below:

(a) Delivery of, and payment of the first instalment for, such holdings of Columbia Gas shall be made at the closing to be held on February 6, 1942, at 9:30 A.M. at the office of City Bank Farmers Trust Company, 22 William Street, New York, N. Y., or at any proper adjournment thereof. (The date on which the closing is to take place is hereinafter sometimes referred to as the "Closing Date".) It is agreed that all right, title and interest of Columbia Gas in and to its aforementioned holdings in Michigan Gas and Indiana Gas will pass to Panhandle Eastern upon the payment of such first instalment and the making of such delivery all in the manner hereinafter set forth. Payment of such first instalment, the amount thereof being that set forth in paragraph (c) below, shall be made by certified or bank cashier's check payable, in New York Clearing House funds, to the order of Columbia Gas, against delivery (i) of said 44,800 shares of Common Stock, no par value, of Michigan Gas and said 20 shares of Common Stock, no par value, of Indiana Gas, duly endorsed in blank for transfer, with all proper stock transfer tax stamps thereto attached, (ii) said $5,900,500, principal amount, of 6% Demand Notes of Michigan Gas and said $126,000, principal amount, of 6% Demand Notes of Indiana Gas duly endorsed without recourse by Columbia Gas and (iii) assignments of said $2,420,000, principal amount, of 6% Demand Loans (open account) of Michigan Gas and said $15,000, principal amount, of 6% Demand Loans (open account) of Indiana Gas in the form of the form of assignment attached hereto as Exhibit A.

[fol. 16113] (b) The price to be paid by Panhandle Eastern for the aforementioned holdings of Columbia Gas in Michigan Gas and Indiana Gas shall equal the sum of (i) $10,700,000, which is the amount of the investment of Columbia Gas in its aforementioned holdings of Michigan Gas plus (ii) $142,900, which is the amount of the investment of Columbia Gas in its aforementioned holdings of Indiana Gas plus (iii) all undistributed surpluses of Michigan Gas and Indiana Gas (other than Special Capital

Surplus of Michigan Gas) at the close of business on February 5, 1942, minus (iv) $103,500, such amount of $103,509 being the undepreciated portion of an item of $139,424 paid by the predecessor of Michigan Gas to an affiliated corporation and required by said order of the Securities and Exchange Commission to be excluded from the price to be paid by Panhandle Eastern to Columbia Gas in respect of Columbia Gas' holdings in Michigan Gas. Columbia Gas agrees that it will not, prior to the Closing Date, increase or reduce the amount of its investment in Michigan Gas or Indiana Gas. However, Columbia Gas expects that, on or before the Closing Date, Michigan Gas and Indiana Gas, respectively, will declare dividends in the amount of all Earned Surplus Since December 31, 1937, shown on unaudited balance sheets, as of December 31, 1941, annexed hereto prepared by Michigan Gas and Indiana Gas, respectively, payable in cash to Columbia Gas. Columbia Gas agrees that Michigan Gas and Indiana Gas, prior to the Closing Date, will pay no dividends out of surplus earned subsequent to December 31, 1941.

(c) The purchase price for the aforementioned holdings is to be paid in two instalments and there is to be an adjustment of the purchase price in accordance with the provisions of the next two succeeding paragraphs. The first instalment, to be paid on the Closing Date, is to be $10,766,715.02, which amount is equal to the sum of (i) the amount of the investment of Columbia Gas in its hold-[fol. 16114] ings in Michigan Gas and Indiana Gas plus (ii) the amount of the Earned Surplus Prior to January 1, 1938, and Capital Surplus Prior to January 1, 1938, of Michigan Gas, minus (iii) the aforementioned amount of $103,500. In addition to said first instalment, Panhandle Eastern agrees to pay to Columbia Gas, on or before the Closing Date, $896.00 in respect of New York State taxes on the transfer of the aforesaid shares of capital stock of Michigan Gas and Indiana Gas. The second instalment, to be paid at the office of Columbia Gas & Electric Corporation, 61 Broadway, New York, N. Y., on or before the fifteenth day after the enactment of the Federal Revenue Act applicable to the 1942 incomes of Michigan Gas and Indiana Gas, is to be an amount which shall be equal to the net incomes of Michigan Gas and Indiana Gas for the

period January 1, 1942 to February 5, 1942, inclusive. It is agreed that the amount of the net income of such companies for such period shall be considered to be the sum of (i) the net income of Michigan Gas and Indiana Gas for the period January 1, 1942 to January 31, 1942, inclusive, plus (ii) 5/28th of the amount of the net income of Michigan Gas and Indiana Gas for the period February 1, 1942 to February 28, 1942, inclusive. Such net income for such periods shall be computed on the basis of proper accounting principles followed by Michigan Gas and Indiana Gas in computing their net income for the year ended December 31, 1941, as it will be reflected on the balance sheets to be certified to by Messrs. Arthur Andersen & Co., referred to in paragraph (d) below. It is agreed that any dispute between Panhandle Eastern and Columbia Gas as to the amount of such net income for such periods will be submitted to Messrs. Arthur Andersen & Co., independent public accountants, whose determination of the amount thereof will be final and binding upon Panhandle Eastern and Columbia Gas. The charges of Messrs. Arthur Andersen & Co. in respect of the determination of any such [fol. 16115] question will be borne equally by Panhandle Eastern and Columbia Gas.

(d) Messrs. Arthur Andersen & Co., independent public accountants, are presently engaged in making an examination of the balance sheets of Michigan Gas and Indiana Gas as of December 31, 1941, and the balance sheets of such companies as of that date, certified to by such accountants, will be available on or before the date when the second instalment on the purchase price is due. Columbia Gas agrees that on the date when the second instalment on the purchase price is due, it will pay to Panhandle Eastern any amount by which the dividends paid by Michigan Gas or Indiana Gas prior to the Closing Date, based on their unaudited balance sheets as of December 31, 1941, exceeds the amount of Earned Surplus Since December 31, 1937, shown on such certified balance sheets as of December 31, 1941. Panhandle Eastern agrees that on the date when the second instalment on the purchase price is due, it will pay to Columbia Gas any amount by which the Earned Surplus Since December 31, 1937, of Michigan Gas or Indiana Gas, as shown on such certified balance sheets

as of December 31, 1941, exceeds the amount of dividends paid by Michigan Gas or Indiana Gas prior to the Closing Date, based on their unaudited balance sheets as of December 31, 1941.

(e) Michigan Gas and Indiana Gas follow the practice of charging to their respective earnings and setting up on their respective books of account in accounts entitled "Accrued Taxes" amounts estimated to represent accrued liabilities for Federal and other taxes and, in addition, Michigan Gas and Indiana Gas follow the practice of charging to their earnings and setting up on their books of account in accounts entitled "Reserve For Undetermined Federal And Other Taxes" amounts estimated to be sufficient to meet any deficiency in their "Accrued Taxes" accounts. The amounts so accrued by [fol. 16116] Michigan Gas and Indiana Gas are hereinafter sometimes referred to as the "Tax Provisions" of Michigan Gas and Indiana Gas. Columbia Gas is unable to state whether such Tax Provisions ultimately will be found to represent the actual tax liability of Michigan Gas and Indiana Gas, respectively, in respect of their operations prior to February 6, 1942, and, accordingly, an adjustment of the purchase price may be required when the actual tax liability in respect of such operations shall have been determined in order that the purchase price may represent the true investment of Columbia Gas in Michigan Gas and Indiana Gas at the date of the sale plus the respective undistributed surpluses of Michigan Gas and Indiana Gas at that date minus the aforementioned $103,500. Therefore, Columbia Gas agrees that it will promptly pay to Michigan Gas or Indiana Gas (as the case may be) any amount by which the Federal or other taxes (including interest or penalties applicable thereto) paid by Michigan Gas and Indiana Gas, respectively, subsequent to the Closing Date, in respect of their respective operations prior to February 6, 1942, shall exceed their respective Tax Provisions as of February 5, 1942. Panhandle Eastern agrees that it will promptly pay, or cause Michigan Gas or Indiana Gas (as the case may be) promptly to pay to Columbia Gas any amount by which the respective Tax Provisions of Michigan Gas and Indiana Gas at February 5, 1942, exceed the Federal or other taxes (including in-

terest or penalties applicable thereto) paid subsequent to the Closing Date by Michigan Gas and Indiana Gas, respectively, in respect of their operations prior to February 6, 1942. Columbia Gas and Panhandle Eastern agree that Columbia Gas is to be responsible for the conduct and cost of and in the name and on behalf of Michigan Gas and Indiana Gas entitled to undertake and conduct all negotiations with tax authorities and any litigation concerning taxes of Michigan Gas and Indiana Gas in respect of their respective operations prior to February 6, 1942. Pan- [fol. 16117] handle Eastern agrees that it will cooperate with Columbia Gas and cause Michigan Gas and Indiana Gas to cooperate with Columbia Gas in working out a procedure whereby Columbia Gas will be able effectively to assume such responsibility and Columbia Gas agrees in the conduct of such matters, to cooperate and consult with Panhandle Eastern with respect to such phases thereof as may affect the tax liability of Panhandle Eastern itself.

(f) Panhandle Eastern agrees that it will cause Michigan Gas and Indiana Gas to give to Columbia Gas any and all requested consents which shall be necessary to authorize or permit Columbia Gas to file consolidated Federal income or excess profits tax returns in which will be included the taxes of Michigan Gas and Indiana Gas for the whole or any portion of the period of ownership of their outstanding stocks by Columbia Gas.

[fol. 16118] Form of Assignment

Know all Men by These Presents, that the undersigned, Columbia Gas & Electric Corporation, a Delaware corporation, in consideration of the sum of $1 to it in hand paid by Panhandle Eastern Pipe Line Company, a Delaware corporation, receipt of which is hereby acknowledged, and of other good and valuable consideration, has assigned, transferred and set over and does hereby assign, transfer and set over unto said Panhandle Eastern Pipe Line Company; its successors and assigns, to it and their use and benefit, all the right, title and interest of the undersigned in and to all moneys owed on open account or otherwise, to the undersigned by Michigan Gas Transmission Corporation, a Delaware corporation, and Indiana Gas Distribution Corporation, an Indiana corporation.

In Witness Whereof, Columbia Gas & Electric Corporation has caused this assignment to be executed by its duly authorized officer and its corporate seal to to be affixed this day of February, 1942.

COLUMBIA GAS & ELECTRIC CORPORATION,

By.....
President.

Attest:

.....
Assistant Secretary.

[fol. 16126] Panhandle Eastern Pipe Line Company and Subsidiary Companies Note A to the Pro Forma Consolidated Income Account for the Year Ended December 31, 1941

This condensed pro forma statement of consolidated income of the company and its subsidiary, Illinois Natural Gas Company, and Michigan Gas Transmission Corporation and Indiana Gas Distribution Corporation has been prepared from the books of the companies (1) on the basis that the financing of the cost of the acquisition of the outstanding stock and indebtedness of Michigan Gas Transmission Corporation and Indiana Gas Distribution Corporation resulted in annual interest costs of $300,000, and which was consummated on February 6, 1942, had been effected January 1, 1941, that the interest expense applicable to obligations of Michigan Gas Transmission Corporation and Indiana Gas Distribution Corporation to Columbia Gas and Electric Corporation, their then parent, would have aggregated the same amount had the Panhandle Eastern Pipe Line Company been the parent company and that dividends had been paid by Michigan Gas Transmission Corporation and Indiana Gas Distribution Corporation to the extent of their net income for the year and (2) after giving effect (a) to estimated increases in Federal income taxes, which would have resulted had such interest and dividends been paid by Michigan Gas Transmission Corporation and Indiana Gas Distribution Corporation, to Panhandle Eastern Pipe Line Company to the full extent of their net income and (b) to the inclusion of certain authorized increased costs, not fully included in expense for the year 1941.

[fol. 16127] Panhandle Eastern Pipe Line Company and Subsidiary Companies Adjustments Pro Forma Consolidated Income Account For the Year Ended December 31, 1941

	(1)
Increase in Operation and Maintenance Expenses resulting from the inclusion of certain authorized costs not fully included in expense for year 1941	$389,000

(2)

Decrease in Federal income taxes and Federal excess-profits taxes resulting from reduction in Net Taxable Income by the inclusion of the amount shown in Adjustment No. 1

Federal Income Taxes	(389,000 X 12.4%)	48,000
Federal Excess-Profits Taxes	(389,000 X 60%)	234,000

Statement relating to Wholesale Prices for Week Ended September 20, 1941	13264	4335
Graph relating to Average Weekly Earnings in Manufacturing Industries of New York State from 1914 to 1941	13266	4339
Graph relating to Average Hourly Earnings and Average Actual Hours per Week per Worker in twenty-five Manufacturing Industries from 1914 to 1941	13267	4341
Graph relating to Average Cost of Living from 1935 to 1939	13268	4343
62, Deduction from Cost of Reproduction New for Depreciation and Present Value of Plant, Property and Business as of June 30, 1941	13270	4345
Letter from P. McDonald Biddison, Consulting Engineer, to Portland's Eastern Pipe Line Company, September 30, 1941	13271	4345
General Summary	13272	4347
63, Investors' Appraisal of the Risk of Capital in the Natural Gas Industry as compared with other Divisions of the Utility Industry, Summary of Analyses, prepared by Paul B. Coffman, Vice-President of Standard and Poors Corporation	13321	4349
Table of Contents	13322	4349
Statement of Experience and Qualifications of Paul B. Coffman	13327	4354
Investors' Appraisal of Capital Risks in Various Divisions of the Utility Industry	13348	4371
Statement A, Investors' Appraisal of Risks of Capital for the years 1937, 1938, 1939 and 1940	13351	4373

	Original	Print
Statement A-1, Investors' Appraisal of Risks of Capital for the Interim Period of 1941, January-August, Both Inclusive	13352	4375
Statement B, Investors' Appraisal of Risks of Capital for the years 1937, 1938, 1939 and 1940	13353	4377
Statement B-1, Investors' Appraisal of Risks of Capital for the Interim Period of 1941, January-August, Both Inclusive	13354	4379
Statement C, Investors' Appraisal of Risks of Capital for the years 1937, 1938, 1939 and 1940	13355	4381
Statement C-1, Investors' Appraisal of Risks of Capital for the Interim Period of 1941, January-August, Both Inclusive	13356	4383
Statement D, Investors' Appraisal of Risks of Capital for the years 1937, 1938, 1939 and 1940	13357	4385
Statement D-1, Investors' Appraisal of Risks of Capital for the Interim Period of 1941 January-August, Both Inclusive	13358	4387
Statement E, Investors' Appraisal of Risks of Capital for the years 1937, 1938, 1939 and 1940	13359	4389
Statement E-1, Investors' Appraisal of Risks of Capital for the Interim Period of 1941, January-August, Both Inclusive	13360	4391
Statement F, General Information Covering each Company as to the Nature and Size of the Business and the Territory served	13361	4393
64, Statistics supporting Data, Exhibit 63, Appendixes A, B, and C	13379	4414
Appendix A, Complete List of Companies studied and Reasons for eliminating those not used to determine Investors' Appraisal of Risks of Capital	13380	4414
Appendix B, Securities of forty-three Natural Gas Companies considered Representative of the Industry, etc.	13387	4426

Index, Volume X.

Appendix C, Working Papers showing the Computation of Investors' Appraisal of the Risks of Capital	13398	4446
Water Companies	13399	4447
Electric Operating Utility Companies	13420	4461
Manufactured and Mixed Gas Companies	13465	4501
Natural Gas Companies	13495	4521
65, Study relative to Rate of Return on Panhandle Eastern Pipe Line Company prepared by Paul B. Coffman, Vice President, Standard and Poors Corporation	13533	4547
Table of Contents	13534	4547
Chart No. 1, Main Transmission System of Panhandle Eastern Pipe Line Co. and Subsidiary	13542	4559
Chart No. 2, Growth of Natural Gas Industry in United States of America from 1906 to 1940	13548	4567
Chart No. 3, Consumption of Natural Gas in United States of America from 1919 to 1940	13550	4571
Chart No. 4, Revenue from Natural Gas Consumed in United States of America from 1919 to 1940	13552	4573

	Original	Print
Chart No. 5, Average Revenue per M. C. F. from 1929 to 1940	13554	4575
Chart No. 6, Panhandle Sales by States, vs. Industry Consumption of Natural Gas from 1934 to 1940	13556	4577
Chart No. 7, Trends of Gross Revenue from 1934 to 1940, Panhandle vs. other Pipe Line Companies and Industry	13558	4579
Chart No. 8, Operating Ratio of Panhandle Compared with other Pipe Line Companies from 1934 to 1940	13560	4581
Chart No. 9, Trend of Revenue and Expenses of Panhandle Eastern Pipe Line Company from 1934 to 1940	13562	4583
Chart No. 10, Percent Earned on Invested Capital of Panhandle Based upon Capital Structure	13564	4585
Chart No. 11, Percent Earned on Invested Capital of Panhandle Based upon Net Property, Intangibles and Working Capital	13566	4587
Chart No. 12, Return to Common Stockholders of Panhandle Eastern Pipe Line Company from 1934 to 1940	13568	4589
Chart No. 13, New Tax Bill will reduce Income sharply Computations based on Operations — Twelve Months ended June 30, 1941	13570	4591
Chart No. 14, Percent Earned on Invested Capital of Panhandle Eastern Pipe Line Company — as of June 30, 1941	13572	4593
Chart No. 15, Percent Earned on Invested Capital of Panhandle Eastern Pipe Line Company — as of June 30, 1941	13574	4595
Chart No. 16, Historical Costs of Debt Capital of Panhandle Eastern Pipe Line Company — from 1930 to 1941	13576	4599
Chart No. 17, Effect of 1941 Refinancing of Panhandle Eastern Pipe Line Company	13578	4603
Chart No. 18, Historical Costs of Preferred Stock Capital of Panhandle Eastern Pipe Line Company from 1937 to 1941	13580	4605
Chart No. 19, Earnings — Price Ratios of Natural Gas Pipe Line Common Stocks from 1937 to 1940	13582	4607
Chart No. 20, Current Earnings — Price Ratios of Natural Gas Pipe Line Common Stocks	13584	4609
Chart No. 21, Cost of Financing Northern Natural Gas Company Common Stock — Offered to Public on September 10, 1941	13586	4613
Chart No. 22, Estimated Current Cost of Financing Common Stock of Panhandle Eastern Pipe Line Company	13588	4615
Chart No. 23, Continuing Growth of Panhandle System Indicates Future Needs for New Capital	13590	4617
Chart No. 24, Panhandle Eastern Pipe Line Company Invested Capital as of June 30, 1941	13592	4621
Chart No. 25, Preferred Stock Unusual in Natural Gas Pipe Line Companies	13594	4623
Chart No. 26, Earnings Necessary to Maintain Credit Position of Panhandle Eastern Pipe Line Company	13596	4625
Chart No. 27, Earnings Necessary to Maintain Credit Position of Panhandle Eastern Pipe Line Company	13598	4627
Chart No. 28, Overall Cost of Capital to Panhandle Eastern Based on Ideal Capital Structure	13600	4629

	Original	Print
Chart No. 29, Dollars needed Annually by Panhandle for Operations and Maintenance	13602	4633
Chart No. 30, Dollars needed Annually by Panhandle for Taxes	13604	4637
Chart No. 31, Dollars needed Annually by Panhandle to return Capital to Investors when Gas Reserves are Exhausted	13606	4639
Chart No. 32, Dollars needed Annually by Panhandle for current Capital Requirements — Bonds	13608	4641
Chart No. 33, Dollars needed Annually by Panhandle for current Capital Requirements — Preferred Stock	13610	4643
Chart No. 34, Dollars needed Annually by Panhandle for current Capital Requirements — Common Stock	13612	4645
Chart No. 35, Dollars needed Annually by Panhandle for total current Capital Requirements — Total Invested Capital	13614	4647
Chart No. 36, Dollars needed Annually by Panhandle to provide Service to Customers, a Fair Return to Investors and restore Invested Capital when Gas Reserves are Exhausted	13616	4649
Chart No. 37, Dollars needed Annually by Panhandle to Provide Service to Customers, a Fair Return to Investors and restore Invested Capital when Gas Reserves are Exhausted	13618	4651
Table for Chart No. 2, Growth of Natural Gas in the United States of America for the years 1906 to 1940, Inclusive	13619	4653
Table for Chart No. 3, Consumption of Natural Gas in the United States of America for the years 1919 to 1940, Inclusive	13620	4655
Table for Chart No. 4, Revenue from Natural Gas Consumed in the United States of America for the years 1919 to 1940, Inclusive	13621	4657
Table for Chart No. 5, Average Revenue per M. C. F. from Natural Gas Consumed in United States of America at Points of Consumption	13622	4659
Table for Chart No. 6, Natural Gas Sales by States for the years 1934 to 1940, Inclusive	13623	4661
Table for Chart No. 7, Trend of Gross Revenue, Panhandle Eastern Pipe Line Company vs. Other Pipe Line Companies and the Natural Gas Industry, 1934 to 1940 Both Inclusive	13624	4663
Table for Chart No. 8, Operating Ratio of Panhandle Eastern Pipe Line Company compared with other Pipe Line Companies exclusive of Taxes, 1934 to 1940	13625	4665
Table for Chart No. 9, Panhandle Eastern Pipe Line Company, Trend of Revenue and Expenses	13627	4669
Table for Chart No. 10, Percent Earned on Invested Capital, based upon Capital Structure	13628	4671
Table for Chart No. 11, Percent Earned on Invested Capital, based upon Net Property, Intangibles and Working Capital	13629	4673
Table for Chart No. 12, Return to Common Stockholders 1934 to 1940 Both Inclusive	13630	4675

	Original	Print
Table for Chart No. 13, Consolidated Statement of Profit and Loss for the twelve months ended June 30, 1941	13631	4677
Table for Chart No. 14, Percent Earned on Invested Capital — twelve months ended June 30, 1941	13632	4679
Table for Chart No. 15, Percent Earned on Invested Capital in the twelve months ended June 30 1941	13633	4681
Table for Chart No. 16, Computation of Weighted Average Cost Ratio of all Bond Issues 1930 — June 30, 1941	13634	4683
Table for Chart No. 17, Projection of Average Interest Cost, Debt Retirement and Amounts to be outstanding of Debt issued in the 1941 Refinancing	13639	4693
Table for Chart No. 18, Preferred Stock	13640	4695
Table for Chart No. 19, Earnings — Price Ratios on Natural Gas Pipe Line Common Stocks from 1937 to 1940	13641	4697
Table for Chart No. 20, Current Earnings — Price Ratios on Natural Gas Pipe Line Common Stocks	13642	4699
Table for Chart No. 21, Data regarding Public Offering of 355,250 Shares Northern Natural Gas Company Common Stock	13643	4701
Table for Chart No. 23, Statistics of Growth from 1936 to 1940	13644	4703
Table for Chart No. 25, Ratio of Preferred Stock to total Capitalization in Natural Gas Pipe Line Companies as of December 31, 1940	13645	4705
Table for Chart No. 26, Earnings Necessary to Maintain Credit Position based on Invested Capital as of June 30, 1941	13646	4707
Table for Chart No. 27, Earnings Necessary to Maintain Credit Position, etc	13647	4709
Table for Charts Nos. 29 to 36, Inclusive, Dollars needed Annually to provide Service to Customers, a Fair Return to Investors and Return of Invested Capital when Reserves are Exhausted	13648	4711
Table for Chart No. 37, Dollars needed Annually to provide Service to Customers, a Fair Return to Investors and Return of Invested Capital when Reserves are Exhausted	13649	4713
69, Statement showing Amount of Depreciation on Book Cost of Property as of June 30, 1941	13709	4715
70, Reproduction Cost New of Plant, Property and Business as of June 30, 1941 (Determined from Valuation of September 30, 1938 by addition of Net Property Additions, plus Items of Working Capital, Value of Gas Purchase Contracts and Cost of Business Development from Valuation of June 30, 1941)	13711	4719
71, Valuation of Property, Plant and Equipment, September 30, 1938	13712	4719
Letter from P. McDonald Biddison, Consulting Engineer, to Panhandle Eastern Pipe Line Company, October 14, 1938	13713	4719

	Original	Print
Statement relating to Appraisal of Property of Panhandle Eastern Pipe Line Company as of September 30, 1938	13719	4721
72, Statement of Net Additions to Gas Plant per Books from October 1, 1938 to June 30, 1941	14178	4723
74, Working Capital	14198	4724
Table I, Total Additional Necessary Materials and Supplies by Departments	14198	4724
Table II, Additional Necessary Materials and Supplies by Departments, Classified to show the Aggregate Supplies	14199	4724
Table III, Summary of Minimum Reasonable Amounts of Working Capital Currently Needed	14200	4725
Table IV, Total Cash, Prepayments, and Materials and Supplies Actually Maintained by the Company at Certain Dates in the Past	14201	4725
75, Natural Gas Supply, Value of Gas Reserves and Wells, February 1, 1937	14202	4726
Letter Ralph E. Davis, Inc., Engineers, to Panhandle Eastern Pipe Line Company and others, February 10, 1937	14203	4726
Table No. 2, Valuation of Producing and Proven Leases in Producing Area of Amarillo Field	14227	4744
Table No. 3, Valuation of Producing and Proven Leases in Producing Area of Hugoton Field	14228	4745
Table No. 8, Classification of Acreage Under Lease, February 1, 1937	14233	4745
76, Panhandle Eastern Pipe Line Company Natural Gas Supply	14243	4746
Letter, Ralph E. Davis, Inc., Engineers, to Board of Directors of Panhandle Eastern Pipe Line Company, November 12, 1940	14244	4746
Summary of Acreage in Amarillo and Hugoton Fields	14248	4751
77, Description of Physical Property of Michigan Gas Transmission Corporation	14251	4753
Testimony of George S. Young	14252	4753
Schedule 1; Compressor Stations	14272	4770
Schedule 2, List of Communities receiving Service from Public Utilities to whom Michigan Gas Transmission Corporation sells Gas Purchased from Panhandle Eastern Pipe Line Company, Population and Number of Customers as of June 30, 1941	14274	4771
Schedule 3, List of Industrial Consumers receiving Service on an Interruptible Basis indirectly from Michigan Gas Transmission Corporation System, June 30, 1941	14277	4779
Schedule 8, Michigan Gas Transmission Corporation Summary of Miles of Pipe by Sizes, June 30, 1941	14295	4781
79, Comparision of Daily provided Capacity to deliver Firm Gas with Maximum Daily Delivery of Firm Gas from System of Michigan Gas Transmission Corporation	14311	4783
79-A, Comparison of Daily provided Capacity to Deliver Firm Gas with Maximum Daily Delivery of Firm Gas and total delivery of Gas from the Pipe Lines owned or operated by Michigan Gas Transmission Corporation for the Winter Period of 1941-1942 to February 27, 1942	14312	4785

	Original	Print
79-B, Total Delivery of Gas from Pipe Lines owned and operated by Michigan Gas Transmission Corporation on Days on which the Delivery of Firm Gas from System was the Maximum	14313	4787
80, Report of Inspection of Equipment in the Compressor Stations of the Michigan Gas Transmission Corporation by H. C. Lehn	14314	4789
81, Depreciation Study, Michigan Gas Transmission Corporation by H. S. Riddle	14321	4794
Letter, H. S. Riddle, Gas Engineering Department, to G. S. Young, Vice President; of Michigan Gas Transmission Corporation, November 10, 1941	14322	4794
Summary of Inspection Data	14323	4795
82, Accrued Depreciation on Compressor Station Structure, measuring and regulating Station Structures and Equipment and other Transmission Structures and general Equipment as of June 30, 1941 by Francis S. Haberly	14369	4796
83, Reproduction Cost new of Plant and Property of Michigan Gas Transmission Corporation as of June 30, 1941 by Francis S. Haberly	14375	4801
Letter Francis S. Haberly, Engineer, to G. S. Young, Vice President, Michigan Gas Transmission Corporation, October 27, 1941	14377	4801
Table of Contents	14378	4802
Statement of Francis S. Haberly	14379	4802
Summary	14389	4810
Reconciliation of Original Cost and of Reproduction Cost to reflect Changes due to Reclassification	14390	4811
Compressor Station Structures and Improvements	14391	4813
All Stations	14391	4813
Montezuma Compressor Station	14392	4813
Zionsville Compressor Station	14398	4818
Edgerton Compressor Station	14402	4821
Other Transmission System Structures and Improvements	14405	4824
All Locations	14405	4824
Montezuma Compressor Station	14406	4824
Zionsville Compressor Station	14407	4825
Edgerton Compressor Station	14408	4826
Mains	14409	4826

	Original	Print
Summary	14444	4850
Compressor Station Structures and Improvements	14445	4851
Measuring and Regulating Station Structures	14446	4852
Other Transmission System Structures	14447	4852

Index, Volume XI.

Mains	14448	4853
Compressor Station Equipment	14449	4853
Measuring and Regulating Station Equipment	14450	4854
General Equipment	14451	4855
87, Materials and Supplies Restatement of Cost of Major Items as of June 30, 1941, Michigan Gas Transmission Corporation by Francis S. Haberly	14466	4856
Materials and Supplies	14467	4856
88, Michigan Gas Transmission Corporation — Comparative Balance Sheets, per Books as at December 31, 1936 to 1940, Inclusive, and June 30, 1941	14475	4863
89, Michigan Gas Transmission Corporation Statement showing earned Surplus per Books for the Ten Months ended December 31, 1936, years 1937 to 1940, inclusive, year and six months ended June 30, 1941	14477	4867
90, Michigan Gas Transmission Corporation — Statement showing Capital Surplus, per books, for the Ten Months ended December 31, 1936, years 1937 to 1940, inclusive, year and six months ended June 30, 1941	14478	4869
91, Michigan Gas Transmission Corporation — Preliminary Report on Original Cost Studies by Central Service Corporation	14479	4871
Statement A, Outline of Origin and Development	14489	4878
Statement A-1, Common Stock issued and Outstanding at January 1, 1940 and June 30, 1941	14492	4881
Statement B, Statement showing Acquisition by Reporting Company or Predecessors of Gas Operating Unit or System, etc.	14493	4883
Statement D, Statement relating to Gas Plant as of January 1, 1940, etc.	14494	4885
Statement E, Statement showing Summary of Adjustment relating to Gas Plant, etc.	14495	4886
Statement F, Statement relating to Gas Plant as of January 1, 1940, etc.	14496	4887
Statement G, Statement relating to Balance Sheet as of January 1, 1940, etc.	14498	4891
Statement H, Statement relating to Suggested Plan for Depreciation, etc.	14499	4893
Statement I, Statistical Information Relative to Gas Plant at June 30, 1941	14500	4893
92, Michigan Gas Transmission Corporation Statement showing Original Cost Depreciated to present Conditions as at June 30, 1941 and observed Depreciation as at June 30, 1941	14507	4903

	Original	Print
93, Michigan Gas Transmission Corporation — Statement of Contributions made to Customers for Business Development for the years 1936, 1937 and five months ended May 31, 1938	14508	4905
94, Michigan Gas Transmission Corporation Statement showing working Capital as of June 30, 1941	14510	4908
95, Michigan Gas Transmission Corporation — Estimated Cost of Completing work in Progress at June 30, 1941 and Estimated Gross Income to be derived from the Completed Projects	14517	4919
97, Michigan Gas Transmission Corporation — Variation in Purchase Power of Dollar as Related to Gas Plant	14519	4921
Graph relating to Variation in Purchasing Power of the Dollar spent for Main Compressor Units	14522	4923
Graph relating to Variation in Purchasing Power of the Dollar spent for Steel Pipe	14523	4925
Graph relating to Variation in Purchasing Power of the Dollar spent for Station Structure Materials	14524	4927
Graph relating to Variation in Purchasing Power of the Dollar spent for Station Structure Labor	14525	4929
Graph relating to Variation in Purchasing Power of the Dollar spent for Station Equipment Labor	14526	4931
Graph relating to Variation in Purchasing Power of the Dollar spent for Mains Installations	14527	4933
Statement relating to Variation in Purchasing Power of the Dollar as related to "Gas Plant"	14528	4935
99, Michigan Gas Transmission Corporation — Statement of Income and Expense per books for years ended December 31, 1936 to 1940, inclusive, twelve Months ended June 30, 1941 and six Months ended June 30, 1941 and December 31, 1940	14530	4937
100, Michigan Gas Transmission Corporation — Statement of Income and Expense per books and after Adjustments and redistributions necessary to reflect the 2-6 months Period per books on an annual basis, for six months ended December 31, 1940 and June 30, 1941 and for twelve months ended June 30, 1941	14533	4943
101, Michigan Gas Transmission Corporation — Comparative Statement of Operating Revenues, for years ended December 31, 1936 to 1940, inclusive, twelve months ended June 30, 1941 and six months ended June 30, 1941 and December 31, 1940	14537	4951
102, Michigan Gas Transmission Corporation — Operation and Maintenance Expense per books for the twelve months ended June 30, 1941	14538	4953
103, Michigan Gas Transmission Corporation — Statement showing Gas Sales, Gas Transported, Gas used by Company, Line Losses and Gas Purchased for the years ended December 31, 1936 to 1940, inclusive, twelve months ended June 30, 1941 and December 31, 1940	14540	4957
106, Registration Statement of Panhandle Eastern Pipe Line Company No. 2-4597, filed with the Securities & Exchange Commission November 18, 1940, Excerpts from:	14548	4959

	Original	Print

Note: "Investors' Appraisal of Overall Capital Risks" as used here represents the percentage obtained by dividing "Total Earnings Available for Capital" of each group of companies by the "Total Market Value of Capital" as represented by bonds, preferred stocks and common stocks. The methods of selecting companies, as well as all working papers covering the years 1937, 1938, 1939 and 1940 have already been presented in these Hearings in Exhibits Nos. 63 and 64. Working papers for 1941 appear in Section IV of the accompanying exhibit.

TABLE OF CONTENTS

INVESTORS' APPRAISAL OF THE RISKS OF CAPITAL IN 153 STABLE INDUSTRIAL COMPANIES

1. Purpose of this Exhibit
2. Method of Selecting Companies to be Included in Study
3. Method of Procedure
4. Summary of the Analyses

SECTION I

Complete List of Industrial Companies Whose Common Stocks Were Listed on the New York Stock Exchange from January 1, 1932 to April 1, 1942 and Selection Showing Such Companies Which Paid Common Dividends in Each Year 1932-1941, Inclusive

SECTION II

Summary Showing Computation of "Investors' Appraisal of the Risks of Capital" Represented by 153 Stable Industrial Companies

SECTION III

Working Papers Showing the Computation of "Investors' Appraisal of the Risks of Capital" of Each of the 153 Stable Industrial Companies

SECTION IV

Working Papers Showing the Computation of "Investors' Appraisal of the Risks of Capital" in the Natural Gas Industry as Compared with Other Divisions of the Utility Industry for the Full Year 1941 Supplemental to Data for the Years 1937, 1938, 1939 and 1940 Already Filed in these Proceedings as Exhibits Nos. 63 and 64

Exhibit 254

INVESTORS' APPRAISAL OF THE RISKS OF CAPITAL IN 153 STABLE INDUSTRIAL COMPANIES

1. Purpose of this Exhibit:

The purpose of this exhibit is to present data showing the investors' appraisal of the risks of capital in stable industrial companies which, it was believed, would be a helpful addition to the material already prepared and presented in these Hearings as Exhibits Nos. 63 and 64 covering the natural gas industry as compared with other divisions of the utility industry.

2. Method of Selecting Companies to be Included in Study:

Throughout the United States there are operating thousands upon thousands of industrial companies whose securities are outstanding in the hands of the general public and upon which the "Investors' Appraisal of Overall Capital Risks" could be computed. For the present purpose, however, I was not interested in the appraisal of risk that might be shown for highly speculative ventures. Rather, I wished to ascertain what the investing public was demanding by way of rate of return on overall earnings-price ratio from stable industrial companies with a long record of profitable operation.

Many methods can be propounded for making a selection of such companies. The test of stability over a period of years, however, it seems to me, lies in the dividend paying ability of a company through periods of depression and prosperity. Therefore, for the purpose of this study I decided to limit the analyses to companies which had paid dividends not only on preferred stocks but also on common stocks in each year of the decade, 1932-1941, inclusive. This period was selected since it included the worst year of depression ever experienced in the United States and was sufficiently long to eliminate from consideration those companies with only a short successful background.

In past studies of "Investors' Appraisal" criticism has sometimes been levied at findings on the score that marketability of stocks was in some instances rather thin and that the results shown therefore did not necessarily present an accurate picture. While I do not agree with such criticism, in order to avoid its recurrence in the present study, I confined my selection of companies to those whose common stocks had been listed on the New York Stock Exchange for at least the ten year period, 1932-1941, inclusive, and for which there could be no question as to their marketability.

As is shown in Section I of this exhibit, there were 470 companies whose common stocks were listed on the New York Stock Exchange throughout the complete

period from January 1, 1932 to April 1, 1942. Of these 470 companies, a total of 153 paid dividends in each year of the decade 1932-1941, inclusive.

3. Method of Procedure:

The method of procedure followed here was exactly identical to that used to determine the "Investors' Appraisal of the Risks of Capital in the Natural Gas Industry as Compared with Other Divisions of the Utility Industry" and outlined fully in Exhibit No. 68, pages 5-8, inclusive. In summary, such method was as follows:

(1) For each of the years, 1937-1941, inclusive, the indicated total market value of all of the securities of a single company was determined by multiplying the number of each class of security (bonds, preferred and common stocks as the case may be) outstanding at the end of each year by the average of its high and low market quotations in that year.

(2) Next there was determined for the individual company the total earnings available for distribution to the securities after taxes, depreciation and all other miscellaneous charges, as reported in the particular company's reports to stockholders.

(3) The earnings so determined under (2) above were then divided by the indicated market value of all securities as determined under (1) above and a rate for the period in question was thus obtained.

(4) Having determined in the manner described above the investors' appraisal of the risks of capital employed in each company selected, the indicated market value of the 153 industrial companies determined under (1) was added to obtain the indicated market value of the capital securities of the entire group. Similarly, the earnings available for distribution to the securities of each of the companies, as determined under (2) were added to obtain the total earnings available for distribution to securities of the entire group. The latter figure was then divided by the former in order to obtain the investors' overall appraisal of the risks of all capital in the group. This was done for each of the years 1937-1941, inclusive.

4. Summary of the Analyses:

A summary of the analyses of the 153 stable industrial companies is contained in the following table:

Investors' Appraisal of Overall Capital Risk
153 Stable Industrial Companies

	Indicated Market Value of Capital	Earnings Available for Capital	Investors' Appraisal of Risks of Capital
	($1,000)	($1,000)	%
1937	22,692,237	1,550,677	6.83
1938	19,423,780	1,011,742	5.21
1939	21,068,880	1,315,905	6.25
1940	19,871,449	1,418,677	7.14
1941*	14,601,745	1,166,698	7.99
(a) Weighted Average Percent			6.97%

Notes: * Based on 119 companies for which 1941 annual reports were available prior to April 1, 1942.
(a) Based on applying weights of 1 to 5 respectively to the years 1937-1941 respectively.

SECTION III

WORKING PAPERS SHOWING THE COMPUTATION OF "INVESTORS' APPRAISAL OF THE RISKS OF CAPITAL" OF EACH OF THE 153 STABLE INDUSTRIAL COMPANIES

Note: Unless otherwise indicated all market price ranges on bonds were obtained from Standard & Poor's Corp. (formerly Standard Statistics Company, Inc.) Bond Guides dated January 7, 1942, January, 1941, January, 1940, January, 1939 and January, 1938; and all market price ranges on stocks were obtained from the Commercial and Financial Chronicle - Bank & Quotation Section, issue of January each year 1938-1942, both inclusive.

All company data, i.e., amount of capital securities outstanding and earnings available for capital were taken directly from published annual reports of the various companies.

Statement B, Investors' Appraisal of Risks of Capital for the years 1937, 1938, 1939 and 1940	13353	4377
Statement B-1, Investors' Appraisal of Risks of Capital for the Interim Period of 1941, January-August, Both Inclusive	13354	4379
Statement C, Investors' Appraisal of Risks of Capital for the years 1937, 1938, 1939 and 1940	13355	4381
Statement C-1, Investors' Appraisal of Risks of Capital for the Interim Period of 1941, January-August, Both Inclusive	13356	4383
Statement D, Investors' Appraisal of Risks of Capital for the years 1937, 1938, 1939 and 1940	13357	4385
Statement D-1, Investors' Appraisal of Risks of Capital for the Interim Period of 1941 January-August, Both Inclusive	13358	4387
Statement E, Investors' Appraisal of Risks of Capital for the years 1937, 1938, 1939 and 1940	13359	4389
Statement E-1, Investors' Appraisal of Risks of Capital for the Interim Period of 1941, January-August, Both Inclusive	13360	4391
Statement F, General Information Covering each Company as to the Nature and Size of the Business and the Territory served	13361	4393
64, Statistics supporting Data, Exhibit 63, Appendixes A, B, and C	13379	4414
Appendix A, Complete List of Companies studied and Reasons for eliminating those not used to determine Investors' Appraisal of Risks of Capital	13380	4414
Appendix B, Securities of forty-three Natural Gas Companies considered Representative of the Industry, etc.	13387	4426

Index, Volume X.

Appendix C, Working Papers showing the Computation of Investors' Appraisal of the Risks of Capital	13398	4446
Water Companies	13399	4447
Electric Operating Utility Companies	13420	4461
Manufactured and Mixed Gas Companies	13465	4501
Natural Gas Companies	13495	4521
65, Study relative to Rate of Return on Panhandle Eastern Pipe Line Company prepared by Paul B. Coffman, Vice President, Standard and Poors Corporation	13533	4547
Table of Contents	13534	4547
Chart No. 1, Main Transmission System of Panhandle Eastern Pipe Line Co. and Subsidiary	13542	4559
Chart No. 2, Growth of Natural Gas Industry in United States of America from 1906 to 1940	13548	4567
Chart No. 3, Consumption of Natural Gas in United States of America from 1919 to 1940	13550	4571
Chart No. 4, Revenue from Natural Gas Consumed in United States of America from 1919 to 1940	13552	4573

	Original	Print
Chart No. 5, Average Revenue per M. C. F. from 1929 to 1940	13554	4575
Chart No. 6, Panhandle Sales by States, vs. Industry Consumption of Natural Gas from 1934 to 1940	13556	4577
Chart No. 7, Trends of Gross Revenue from 1934 to 1940, Panhandle vs. other Pipe Line Companies and Industry	13558	4579
Chart No. 8, Operating Ratio of Panhandle Compared with other Pipe Line Companies from 1934 to 1940	13560	4581
Chart No. 9, Trend of Revenue and Expenses of Panhandle Eastern Pipe Line Company from 1934 to 1940	13562	4583
Chart No. 10, Percent Earned on Invested Capital of Panhandle Based upon Capital Structure	13564	4585
Chart No. 11, Percent Earned on Invested Capital of Panhandle Based upon Net Property, Intangibles and Working Capital	13566	4587
Chart No. 12, Return to Common Stockholders of Panhandle Eastern Pipe Line Company from 1934 to 1940	13568	4589
Chart No. 13, New Tax Bill will reduce Income sharply Computations based on Operations — Twelve Months ended June 30, 1941	13570	4591
Chart No. 14, Percent Earned on Invested Capital of Panhandle Eastern Pipe Line Company — as of June 30, 1941	13572	4593
Chart No. 15, Percent Earned on Invested Capital of Panhandle Eastern Pipe Line Company — as of June 30, 1941	13574	4595
Chart No. 16, Historical Costs of Debt Capital of Panhandle Eastern Pipe Line Company—from 1930 to 1941	13576	4599
Chart No. 17, Effect of 1941 Refinancing of Panhandle Eastern Pipe Line Company	13578	4603
Chart No. 18, Historical Costs of Preferred Stock Capital of Panhandle Eastern Pipe Line Company from 1937 to 1941	13580	4605
Chart No. 19, Earnings — Price Ratios of Natural Gas Pipe Line Common Stocks from 1937 to 1940	13582	4607
Chart No. 20, Current Earnings — Price Ratios of Natural Gas Pipe Line Common Stocks	13584	4609
Chart No. 21, Cost of Financing Northern Natural Gas Company Common Stock — Offered to Public on September 10, 1941	13586	4613
Chart No. 22, Estimated Current Cost of Financing Common Stock of Panhandle Eastern Pipe Line Company	13588	4615
Chart No. 23, Continuing Growth of Panhandle System Indicates Future Needs for New Capital	13590	4617
Chart No. 24, Panhandle Eastern Pipe Line Company Invested Capital as of June 30, 1941	13592	4621
Chart No. 25, Preferred Stock, Unusual in Natural Gas Pipe Line Companies	13594	4623
Chart No. 26, Earnings Necessary to Maintain Credit Position of Panhandle Eastern Pipe Line Company	13596	4625
Chart No. 27, Earnings Necessary to Maintain Credit Position of Panhandle Eastern Pipe Line Company	13598	4627
Chart No. 28, Overall Cost of Capital to Panhandle Eastern Based on Ideal Capital Structure	13600	4629

	Original	Print
Chart No. 29, Dollars needed Annually by Panhandle for Operations and Maintenance	13602	4633
Chart No. 30, Dollars needed Annually by Panhandle for Taxes	13604	4637
Chart No. 31, Dollars needed Annually by Panhandle to return Capital to Investors when Gas Reserves are Exhausted	13606	4639
Chart No. 32, Dollars needed Annually by Panhandle for current Capital Requirements — Bonds	13608	4641
Chart No. 33, Dollars needed Annually by Panhandle for current Capital Requirements — Preferred Stock	13610	4643
Chart No. 34, Dollars needed Annually by Panhandle for current Capital Requirements — Common Stock	13612	4645
Chart No. 35, Dollars needed Annually by Panhandle for total current Capital Requirements — Total Invested Capital	13614	4647
Chart No. 36, Dollars needed Annually by Panhandle to provide Service to Customers, a Fair Return to Investors and restore Invested Capital when Gas Reserves are Exhausted	13616	4649
Chart No. 37, Dollars needed Annually by Panhandle to Provide Service to Customers, a Fair Return to Investors and restore Invested Capital when Gas Reserves are Exhausted	13618	4651

12, Statement showing United States Treasury Bond Yields	10801	4037
13, Chart showing History of Yields of United States Bonds, 1920–1939	10806	4045
14, Average Yield of United States Treasury Bond	10807	4047
14-A, Securities & Exchange Commission Releases Nos. 2778 and 2834 — Findings and Opinion of the Commission in the Matters of Panhandle Eastern Pipe Line Company, et al	10808	4047

Index, Volume IX.

Order of Securities & Exchange Commission Denying Applications in Part and granting Applications in Part	10842	4087
Supplemental Order of Securities & Exchange Commission amending Findings and Opinion	10844	4089
17, Miscellaneous Data concerning Property and Operations of Panhandle Eastern Pipe Line Company	10848	4090
Schedule 1, Panhandle Eastern Pipe Line Company System Compressor Stations	10848	4090
Schedule 2, List of Communities receiving Service directly or indirectly, from Panhandle Company including Population and Number of Customers as of June 30, 1941	10849	4091
Schedule 3, List of Industrial Customers receiving Service direct from Panhandle Company System, June 30, 1941	10853	4099
Schedule 11, Panhandle Eastern System Summary — Miles of Pipe by Sizes, June 30, 1941	10926	4101
30, Testimony of Rufus M. Smith	10958	4103
Schedule 2, Estimated Original Gas Content in the Texas Panhandle Field under Acreage constituting Reserves of Panhandle Eastern Pipe Line Company as of July 1, 1941	10986	4125

	Original	Print
Schedule 3, Estimated Remaining Gas Content in the Texas Panhandle Field under Acreage constituting Reserves of Panhandle Eastern Pipe Line Company as of July 1, 1941	10987	4125
Schedule 5, Comparison of Open Flow Potentials in Texas Panhandle Gas Field	10990	4129
Schedule 6, Gas Acreage owned and under Gas Purchase Contracts held by Panhandle Eastern Pipe Line Company as of June 30, 1941	10991	4131
Schedule 7, Hugoton Production to Argus Natural Gas Company, Inc. by Panhandle Eastern Pipe Line Company, et al	10992	4133
Schedule 8, Texas Production to Panhandle Eastern Pipe Line Company	10993	4135
Schedule 9, Hugoton Production to Panhandle Eastern Pipe Line Company	10997	4143
Schedule 10, Hugoton Production to Panhandle Eastern Pipe Line Company	11000	4149
Schedule 11, Analysis of Cumulative Production to Main Line to and including Fiscal Month of June 1941	11003	4155
Schedule 12, Comparative Statement of Production and Purchases from each District for the two Years ended June 22, 1940 and June 22, 1941	11004	4157
36, Testimony of Glenn G. Bartle	11010	4159
Schedule 3, Estimated Original Gas Content in the Hugoton Field, (Kansas, Oklahoma and North Texas Panhandle), under Acreage constituting Reserves of Panhandle Eastern Pipe Line Company as of July 1, 1941	11038	4176
Schedule 4, Estimated unmetered Gas from Panhandle Eastern Pipe Line Company Wells in the Hugoton Field Kansas, connected to Argus Natural Gas Company, Inc. as of July 1, 1941	11041	4181
37, Testimony and Exhibits, Market Value of Leases of Panhandle Eastern Pipe Line Co.	11047	4187
R. J. Wallace	11047	4187
Summary of Market Value of Leases	11064	4199
38, Basic Statistics used in calculating Interest, ad valorem Taxes and operating Expense attributable to unused Capacity	12159	4203
39, Reproduction Cost New of Plant, Property and Business of Panhandle Eastern Pipe Line Company and subsidiary Companies as of June 30, 1941	12162	4206
Letter P. McDonald Biddison, Consulting Engineer, to Panhandle Eastern Pipe Line Company, August 29, 1941	12163	4206
Statement relating to Reproduction Cost—New—June 30, 1941	12164	4207
Summary	12165	4207
39-A, Reproduction Cost New of Plant, Property and Business of Panhandle Eastern Pipe Line Company and subsidiary Companies as of June 30, 1941	13130	4208
Letter P. McDonald Biddison, Consulting Engineer, to Panhandle Eastern Pipe Line Company, August 29, 1941	13130	4208

	Original	Print
Statement relating to Reproduction Cost New—June 30, 1941	13131	4209
Summary	13133	4209
40, Table showing estimated Main Line Sales, years 1941-1946, inclusive	13149	4211
41, Graph showing Sales and Gas Plant by Years, Panhandle Eastern Pipe Line Company and Subsidiary Companies	13150	4213
42, Testimony of C. H. Hinton relating to Future Capital Expenditures and Operating Expenses in Production and Gathering System West and South of Liberal, Kansas	13151	4215
43, Schedules presented in connection with the written Testimony of C. H. Hinton	13193	4244
Schedule 1, Additional Capital Expenditures required to produce and gather Basic Load, or Present Requirements	13194	4244
Schedule 2, Additional Capital Expenditures required to produce and gather Anticipated Increased Load	13195	4244
Schedule 3, Estimate of Operation and Maintenance Costs —west of Liberal Panhandle Field — Basic Load	13196	4245
Schedule 4, Estimate of Operation and Maintenance Costs — west of Liberal Panhandle Field — Estimated Future Load	13199	4251
Schedule 5, Probable Production from Panhandle Eastern's own Wells and Wells under Gas Contracts (Panhandle Field) during the Period July 1, 1940 to December 31, 1956	13202	4257
47, Panhandle Eastern Pipe Line Company and Subsidiary Companies, future Capital Requirements, Gas Transmission Facilities, Liberal Station and Eastward	13206	4257
48, Statement showing Balance Sheets per Books Panhandle Eastern Pipe Line Company and Subsidiary Companies, as at each December 31, 1930 through 1940 and as at June 30, 1941	13207	4259
49, Income Statement per Books — Period from April 1, 1932 to December 31, 1941	13240	4265
50, Statement showing Earned Surplus per Books, Period from Commencement of Operations to June 30, 1941	13212	4269
51, Statement showing Capital Surplus per Books, Period from September 1, 1930 to June 30, 1941	13214	4273
52, Statement showing Investment in Gas Plant as at each December 31, 1930 through 1940 and as at June 30, 1941	13215	4275
53, Statement of Dividends paid on Class A and Class B Preferred Stocks from beginning to September 1, 1941	13217	4279
54, Statement of Dividends paid on Common Stock from Beginning to September 1, 1941	13219	4280
55, Statement showing Comparison of Sales and Revenue, Principal Industrial Customers, years 1939, 1940 and 1941	13220	4281
55-A, Statement showing Comparison of Sales and Revenue, Principal Industrial Customers, years 1939, 1940, and 1941	13221	4283
56, Statement of Gas Produced, Period from April 1, 1932 to June 30, 1941	13222	4284
57, Statement of Gas Purchased, Period from April 1, 1932 to June 30, 1941	13223	4285

	Original	Print
58, Statement of Gas Revenue, Period from April 1, 1932 to June 30, 1941 and Schedule showing Detail of Sales to various Types of Customers, 1939 and 1940	13224	4287
Schedule 1, Statement of Gas Revenue, Period from April 1, 1932 to June 30, 1941	13224	4287
Schedule 2, Detail of Sales to Gas Utilities, years 1939 and 1940	13225	4289
Schedule 3, Detail of Sales to Industrial Customers, years 1939 and 1940	13227	4293
59, Statement of Gas Revenue by States, Period from April 1, 1932 to December 31, 1941	13229	4297
60, Statement showing Sales Agreements with other Gas Companies as at June 30, 1941	13230	4299
61, Study of Current and Future Trends in Commodity Prices and Wages, by David Friday	13238	4310
Graph showing Wholesale Prices from 1800 to 1940	13239	4311
Index Numbers of Wholesale Prices of Commodities by Groups	13241	4313
Commodity Price Indexes of Ten Countries	13247	4318
Statement relating to Tax Collections in the United States, from 1913 to 1942	13258	4328
Index Numbers of Wholesale Prices of all Commodities by Months, from 1890 to 1940	13263	4333
Statement relating to Wholesale Prices for Week Ended September 20, 1941	13264	4335
Graph relating to Average Weekly Earnings in Manufacturing Industries of New York State from 1914 to 1941	13266	4339
Graph relating to Average Hourly Earnings and Average Actual Hours per Week per Worker in twenty-five Manufacturing Industries from 1914 to 1941	13267	4341
Graph relating to Average Cost of Living from 1935 to 1939	13268	4343
62, Deduction from Cost of Reproduction New for Depreciation and Present Value of Plant, Property and Business as of June 30, 1941	13270	4345
Letter from P. McDonald Biddison, Consulting Engineer, to Panhandle Eastern Pipe Line Company, September 30, 1941	13271	4345
General Summary	13272	4347
63, Investors' Appraisal of the Risk of Capital in the Natural Gas Industry as compared with other Divisions of the Utility Industry, Summary of Analyses, prepared by Paul B. Coffman, Vice-President of Standard and Poors Corporation	13321	4349
Table of Contents	13322	4349
Statement of Experience and Qualifications of Paul B. Coffman	13327	4354
Investors' Appraisal of Capital Risks in Various Divisions of the Utility Industry	13348	4371
Statement A, Investors' Appraisal of Risks of Capital for the years 1937, 1938, 1939 and 1940	13351	4373

	Original	Print
Statement A-1, Investors' Appraisal of Risks of Capital for the Interim Period of 1941, January-August, Both Inclusive	13352	4375
Statement B, Investors' Appraisal of Risks of Capital for the years 1937, 1938, 1939 and 1940	13353	4377
Statement B-1, Investors' Appraisal of Risks of Capital for the Interim Period of 1941, January-August, Both Inclusive	13354	4379
Statement C, Investors' Appraisal of Risks of Capital for the years 1937, 1938, 1939 and 1940	13355	4381
Statement C-1, Investors' Appraisal of Risks of Capital for the Interim Period of 1941, January-August, Both Inclusive	13356	4383
Statement D, Investors' Appraisal of Risks of Capital for the years 1937, 1938, 1939 and 1940	13357	4385
Statement D-1, Investors' Appraisal of Risks of Capital for the Interim Period of 1941 January-August, Both Inclusive	13358	4387
Statement E, Investors' Appraisal of Risks of Capital for the years 1937, 1938, 1939 and 1940	13359	4389
Statement E-1, Investors' Appraisal of Risks of Capital for the Interim Period of 1941, January-August, Both Inclusive	13360	4391
Statement F, General Information Covering each Company as to the Nature and Size of the Business and the Territory served	13361	4393
64, Statistics supporting Data, Exhibit 63, Appendixes A, B, and C	13379	4414
Appendix A, Complete List of Companies studied and Reasons for eliminating those not used to determine Investors' Appraisal of Risks of Capital	13380	4414
Appendix B, Securities of forty-three Natural Gas Companies considered Representative of the Industry, etc.	13387	4426

Index, Volume X.

Appendix C, Working Papers showing the Computation of Investors' Appraisal of the Risks of Capital	13398	4446
Water Companies	13399	4447
Electric Operating Utility Companies	13420	4461
Manufactured and Mixed Gas Companies	13465	4501
Natural Gas Companies	13495	4521
65, Study relative to Rate of Return on Panhandle Eastern Pipe Line Company prepared by Paul B. Coffman, Vice President, Standard and Poors Corporation	13533	4547
Table of Contents	13534	4547
Chart No. 1, Main Transmission System of Panhandle Eastern Pipe Line Co. and Subsidiary	13542	4559
Chart No. 2, Growth of Natural Gas Industry in United States of America from 1906 to 1940	13548	4567
Chart No. 3, Consumption of Natural Gas in United States of America from 1919 to 1940	13550	4571
Chart No. 4, Revenue from Natural Gas Consumed in United States of America from 1919 to 1940	13552	4573

	Original	Print
Chart No. 5, Average Revenue per M. C. F. from 1929 to 1940	13554	4575
Chart No. 6, Panhandle Sales by States, vs. Industry Consumption of Natural Gas from 1934 to 1940	13556	4577
Chart No. 7, Trends of Gross Revenue from 1934 to 1940, Panhandle vs. other Pipe Line Companies and Industry	13558	4579
Chart No. 8, Operating Ratio of Panhandle Compared with other Pipe Line Companies from 1934 to 1940	13560	4581
Chart No. 9, Trend of Revenue and Expenses of Panhandle Eastern Pipe Line Company from 1934 to 1940	13562	4583
Chart No. 10, Percent Earned on Invested Capital of Panhandle Based upon Capital Structure	13564	4585
Chart No. 11, Percent Earned on Invested Capital of Panhandle Based upon Net Property, Intangibles and Working Capital	13566	4587
Chart No. 12, Return to Common Stockholders of Panhandle Eastern Pipe Line Company from 1934 to 1940	13568	4589
Chart No. 13, New Tax Bill will reduce Income sharply Computations based on Operations — Twelve Months ended June 30, 1941	13570	4591
Chart No. 14, Percent Earned on Invested Capital of Panhandle Eastern Pipe Line Company — as of June 30, 1941	13572	4593
Chart No. 15, Percent Earned on Invested Capital of Panhandle Eastern Pipe Line Company — as of June 30, 1941	13574	4595
Chart No. 16, Historical Costs of Debt Capital of Panhandle Eastern Pipe Line Company — from 1930 to 1941	13576	4599
Chart No. 17, Effect of 1941 Refinancing of Panhandle Eastern Pipe Line Company	13578	4603
Chart No. 18, Historical Costs of Preferred Stock Capital of Panhandle Eastern Pipe Line Company from 1937 to 1941	13580	4605
Chart No. 19, Earnings — Price Ratios of Natural Gas Pipe Line Common Stocks from 1937 to 1940	13582	4607
Chart No. 20, Current Earnings — Price Ratios of Natural Gas Pipe Line Common Stocks	13584	4609
Chart No. 21, Cost of Financing Northern Natural Gas Company Common Stock — Offered to Public on September 10, 1941	13586	4613
Chart No. 22, Estimated Current Cost of Financing Common Stock of Panhandle Eastern Pipe Line Company	13588	4615
Chart No. 23, Continuing Growth of Panhandle System Indicates Future Needs for New Capital	13590	4617
Chart No. 24, Panhandle Eastern Pipe Line Company Invested Capital as of June 30, 1941	13592	4621
Chart No. 25, Preferred Stock Unusual in Natural Gas Pipe Line Companies	13594	4623
Chart No. 26, Earnings Necessary to Maintain Credit Position of Panhandle Eastern Pipe Line Company	13596	4625
Chart No. 27, Earnings Necessary to Maintain Credit Position of Panhandle Eastern Pipe Line Company	13598	4627

Summary	14444	4850
Compressor Station Structures and Improvements	14445	4851
Measuring and Regulating Station Structures	14446	4852
Other Transmission System Structures	14447	4852

Index, Volume XI.

Mains	14448	4853
Compressor Station Equipment	14449	4853
Measuring and Regulating Station Equipment	14450	4854
General Equipment	14451	4855
87, Materials and Supplies Restatement of Cost of Major Items as of June 30, 1941, Michigan Gas Transmission Corporation by Francis S. Haberly	14466	4856
Materials and Supplies	14467	4856
88, Michigan Gas Transmission Corporation — Comparative Balance Sheets, per Books as at December 31, 1938 to 1940, Inclusive, and June 30, 1941	14475	4863
89, Michigan Gas Transmission Corporation Statement showing earned Surplus per Books for the Ten Months ended December 31, 1936, years 1937 to 1940, inclusive, year and six months ended June 30, 1941	14477	4867
90, Michigan Gas Transmission Corporation — Statement showing Capital Surplus, per books, for the Ten Months ended December 31, 1936, years 1937 to 1940, inclusive, year and six months ended June 30, 1941	14478	4869
91, Michigan Gas Transmission Corporation — Preliminary Report on Original Cost Studies by Central Service Corporation	14479	4871
Statement A, Outline of Origin and Development	14489	4878
Statement A-1, Common Stock issued and Outstanding at January 1, 1940 and June 30, 1941	14492	4881
Statement B, Statement showing Acquisition by Reporting Company or Predecessors of Gas Operating Unit or System, etc.	14493	4883
Statement D, Statement relating to Gas Plant as of January 1, 1940, etc.	14494	4885
Statement E, Statement showing Summary of Adjustment relating to Gas Plant, etc.	14495	4886
Statement F, Statement relating to Gas Plant as of January 1, 1940, etc.	14496	4887
Statement G, Statement relating to Balance Sheet as of January 1, 1940, etc.	14498	4891
Statement H, Statement relating to Suggested Plan for Depreciation, etc.	14499	4893
Statement I, Statistical Information Relative to Gas Plant at June 30, 1941	14500	4893
92, Michigan Gas Transmission Corporation Statement showing Original Cost Depreciated to present Conditions as at June 30, 1941 and observed Depreciation as at June 30, 1941	14507	4903

	Original	Print
93, Michigan Gas Transmission Corporation — Statement of Contributions made to Customers for Business Development for the years 1936, 1937 and five months ended May 31, 1938	14508	4905
94, Michigan Gas Transmission Corporation Statement showing working Capital as of June 30, 1941	14510	4908
95, Michigan Gas Transmission Corporation — Estimated Cost of Completing work in Progress at June 30, 1941 and Estimated Gross Income to be derived from the Completed Projects	14517	4919
97, Michigan Gas Transmission Corporation — Variation in Purchase Power of Dollar as Related to Gas Plant	14519	4921
Graph relating to Variation in Purchasing Power of the Dollar spent for Main Compressor Units	14522	4923
Graph relating to Variation in Purchasing Power of the Dollar spent for Steel Pipe	14523	4925
Graph relating to Variation in Purchasing Power of the Dollar spent for Station Structure Materials	14524	4927
Graph relating to Variation in Purchasing Power of the Dollar spent for Station Structure Labor	14525	4929
Graph relating to Variation in Purchasing Power of the Dollar spent for Station Equipment Labor	14526	4931
Graph relating to Variation in Purchasing Power of the Dollar spent for Mains Installations	14527	4933
Statement relating to Variation in Purchasing Power of the Dollar as related to "Gas Plant"	14528	4935
99, Michigan Gas Transmission Corporation — Statement of Income and Expense per books for years ended December 31, 1936 to 1940, inclusive, twelve Months ended June 30, 1941 and six Months ended June 30, 1941 and December 31, 1940	14530	4937
100, Michigan Gas Transmission Corporation — Statement of Income and Expense per books and after Adjustments and redistributions necessary to reflect the 2-6 months Period per books on an annual basis, for six months ended December 31, 1940 and June 30, 1941 and for twelve months ended June 30, 1941	14533	4943
101, Michigan Gas Transmission Corporation — Comparative Statement of Operating Revenues, for years ended December 31, 1936 to 1940, inclusive, twelve months ended June 30, 1941 and six months ended June 30, 1941 and December 31, 1940	14537	4954
102, Michigan Gas Transmission Corporation — Operation and Maintenance Expense per books for the twelve months ended June 30, 1941	14538	4953
103, Michigan Gas Transmission Corporation — Statement showing Gas Sales, Gas Transported, Gas used by Company, Line Losses and Gas Purchased for the years ended December 31, 1936 to 1940, inclusive, twelve months ended June 30, 1941 and December 31, 1940	14540	4957
106, Registration Statement of Panhandle Eastern Pipe Line Company No. 2-4597, filed with the Securities & Exchange Commission November 18, 1940, Excerpts from	14548	4959
